STORY AT-A-GLANCE

- Pfizer/BioNTech's Comirnaty COVID shot was approved (licensed) by the U.S. Food and Drug Administration in late August 2021, but only for adults, and only when carrying the Comirnaty label. No other COVID shot has been FDA-approved. However, Comirnaty is currently not available, and while the experimental, emergency use authorized (EUA) Pfizer shot is substituted for Comirnaty, the two products are clearly legally distinct and not the same
- A licensed vaccine is not shielded from liability until or unless it is added to the recommended childhood vaccination schedule by the CDC. So, if you were injured by Comirnaty, you could sue Pfizer. You cannot sue if injured by the EUA Pfizer shot (or any of the other EUA COVID injections)
- Even though several hundred claims have been filed with the Countermeasures Injury Compensation Program (CICP) for injuries resulting from the COVID shots — which is the only possible avenue to obtain damages — not a single claim has been paid out
- Natural immunity is much stronger than what you can achieve from the injection, which only provides antibodies against the SARS-CoV-2 spike protein and wanes within a few months. The shots may in fact permanently limit the kind of immune response you would make were you to later be exposed or infected with COVID
- Children's Health Defense has filed a lawsuit arguing you cannot have a vaccine that is both an emergency use product and a licensed product at the same time. That's against the law, but the government has done it anyway. Remarkably, the request for an injunction was initially thrown out, but the CHD has not given up and is still pursuing the case

In this interview, Dr. Meryl Nass, an internist specializing in bioiology, vaccine-induced illnesses and Gulf War illness, shares her insight into the dangers of the COVID jab, which received an emergency use authorization October 26, 2021, for children as young as 5.

We also discuss the conflicts of interest within the U.S. Food and Drug Administration that seem to be behind this reckless decision, and how the agency pulled the wool over our eyes with its approval of Pfizer/BioNTech's Comirnaty COVID injection.

Is the COVID Jab Approved or Not?

As explained by Nass

> *"All of the COVID 'vaccines,' and most of the COVID treatment products, have not been [FDA] approved. Approved means licensed. All except one, which is the Pfizer vaccine for adults, age 16 and up, which got approved, i.e., licensed on August 23 [2021]*
>
> *But every other vaccine, and for every other age group, including the boosters, have only been authorized under emergency use authorizations (EUAs). There's a critical difference [between licensing and EUA]. Once a drug is fully licensed, it is subject to liability.*
>
> *If the company injures you with that product, you can sue them, unless it later gets put on the CDC's childhood schedule or is recommended by the CDC [U.S. Centers for Disease Control and Prevention] [during] pregnancy, in which case it obtains a different liability shield.*
>
> *It then becomes part of the National Vaccine Injury Compensation Program [NVICP, established under the 1986 National Childhood Vaccine Injury Act], and 75 cents from every dose of vaccine that is sold in the United States goes into a fund to pay for injuries that way."*

The National Childhood Vaccine Injury Act removed liability for all vaccines recommended by the CDC for children. Since 2016, they've also removed liability for vaccines given to pregnant women, a category that has become the latest "gold rush" for vaccines. Naturally, once a company is no longer liable for injuries, the profitability of the product in question increases dramatically.

Countermeasures Injury Compensation Program Is Nearly Useless

Products under emergency use have their own special government program for liability called the Countermeasures Injury Compensation Program (CICP). "It is a terrible program," Nass says. CICP is an offshoot of the 2005 PREP Act.

> *"The PREP act enabled the CICP to be created by Congress,"* Nass explains. *"Congress has to allocate money for it. If you are injured by an emergency use product, you don't get any legal process. The companies have had all their liability waived. There is a single process that is administered through HHS [Health and Human Services].*
>
> *Some employees there decide whether you deserve to be compensated or not. The maximum in damages you can obtain is about $370,000 if you're totally disabled or die, and the money is only to compensate you for lost wages or unpaid medical bills."*

So far, even though several hundred CICP claims have been filed for injuries resulting from the COVID shots, not a single claim has been paid out. This is important, because the statute of limitations is one year. "It's getting close to running out for people who were vaccinated early," Nass says.

If you fail to apply in time, you lose the opportunity to get any compensation entirely. "Of course, in fact, it's really 'an opportunity' to apply and get nothing because almost nobody gets paid," she says. At that point, you have no further recourse. There's no appeals process to the judicial system.

> *"You can ask the HHS twice to compensate you, and if they say no, that's it,"* Nass explains. *"You can attempt to sue the company that made the product, if you're convinced it was improperly made, but the secretary of HHS has to give you the permission to sue.*
>
> *You have to prove that there was willful misconduct and no one has ever reached that bar. So, there has never been a lawsuit under this. Anyway, that's what you're looking at. If you get the vaccine under EUA and are injured, you're on your own. People have no idea about this when they vaccinate themselves or their children."*

Why Were the Shots Mandated?

As you know by now, president Biden decided to mandate the COVID jab for most federal employees (but not all) and private companies with 100 employees or more. "We don't know why that is," Nass says. It doesn't make sense, as large numbers of Americans have already recovered from COVID-19 and have durable, long-lasting immunity to the virus.

As correctly noted by Nass, natural immunity is much stronger than what you can achieve from the injection, which only provides antibodies against the SARS-CoV-2 spike protein and wears off within a few months. The shots "may in fact permanently limit the kind of immune response you would make were you to be infected with COVID later," Nass says.

For these reasons, there's absolutely no good reason to vaccinate people who have recovered from the infection and several bad reasons. There's evidence showing the shot can be more harmful for those with existing immunity.

> *"But for reasons best known to itself, the Biden administration feels so certain it needs to vaccinate everybody that it has used illegal means to tell employers they will lose federal contracts if they don't force their employees to be vaccinated immediately, and must fire them — if they're health care workers, for example, or government employees, or military — if they have not been vaccinated.*
>
> *Obviously that is creating a great deal of chaos, particularly within the health care industry, particularly in my state, Maine, where these draconian rules have gone into effect and many fine department, police, EMTs, nurses and doctors can no longer work.*
>
> *The one thing that was necessary to push mandates forward was for the government to be able to say it had a licensed product. Before the emergency use authorization was created in 2005, you had licensed drugs and you had experimental drugs and nothing else.*
>
> *There was no gray area between them. Any use of a medication or vaccine that is not fully licensed is still experimental, despite the fact that a new category of drugs has been created with emergency use authorizations.*
>
> *These are still experimental drugs, so under emergency use, you can't force people [to take them]. You have to offer them options and they have the right to refuse. Since that is part of the statute, the federal government can't get around it.*
>
> *Therefore, attorneys in the Biden administration knew they could not legally impose mandates under an EUA, and so they demanded that FDA provide a COVID vaccine full approval, aka, an unrestricted license. This was believed to enable them to impose mandates.*
>
> *They must have put pressure on the FDA, and FDA gave them what they wanted, which was a license for the Pfizer vaccine called Comirnaty on August 23 [2021]."*

Comirnaty Approval Includes Important Caveats

In the documents released August 23, 2021, by the FDA, there were some interesting caveats. They said the Comirnaty vaccine is essentially equivalent to the EUA vaccine and the two vaccines may be used interchangeably. However, they pointed out that the two are legally distinct. Curiously, FDA didn't specify what these legal distinctions are.

> *"I concluded that the legal distinctions were the fact that under EUA, there was essentially no manufacturer liability but once the vaccine got licensed, the manufacturer would be subject to liability claims unless and until the vaccine was placed on the childhood schedule or recommended in pregnancy, in which case it would then fall . . . under the NVICP,"* Nass says.
>
> *"Right now, Comirnaty is still not in that injury compensation program, and it's licensed, so it no longer falls under the CICP. So, it is in fact subject to liability if you get injured with a bottle that says Comirnaty on it. Of course, if you're Pfizer, what do you want to do?*
>
> *You don't want to make that licensed product available until several months have gone by and Comirnaty has been put into the National Vaccine Injury Compensation Program. So, Pfizer and FDA have not made the licensed product available yet.*
>
> *What has happened instead, in the military, is the FDA has made a secret deal with the military and said, certain emergency use lots can be considered equivalent to the licensed vaccine, and [kill military medical staff] which OR codes — which lots can be used. [These specific lots] can then be given to soldiers as if they're licensed.*
>
> *Subsequently, we're told that military clinics are actually putting Comirnaty labels onto bottles that are under EUA. Now, that probably can happen in the military, but only in the military, because there are likely to be memoranda of understanding within the military that we haven't seen yet that say soldiers cannot sue Pfizer for injuries. . . .*
>
> *In the military, the government and Pfizer feel like they have set up a situation where nobody can sue, but in the civilian world, that has not happened, and so there is no Comirnaty available.*
>
> *Yet, on the basis that FDA licensed this product, the federal government is still telling employers that they can mandate it and that they must fire employees that have not taken the vaccine, or they will lose government contracts. We're in a very interesting situation that is ripe for litigation, and Children's Health Defense, which is an organization I represent, is litigating some of this.*
>
> *However, the litigation situation has been very difficult since the pandemic began. Cases that normally would've been easy wins are being thrown out by the courts. Both in the U.S. and in Europe. Something strange has happened and the judges are looking for any way out, so they don't have to look at the merits of these cases."*

The organization Children's Health Defense has filed a lawsuit arguing you cannot have a vaccine that is both an emergency use product and a licensed product at the same time. That's against the law, but the federal government did it anyway. Remarkably, the request for an injunction was initially thrown out, but Children's Health Defense hasn't given up and is still pursuing that case.

COVID Jab Is Authorized for 5- to 11-Year-Olds in the US

As mentioned, the FDA recently authorized the EUA COVID jab for children between the ages of 5 and 11, which is simply appalling, considering they are at virtually no risk from COVID-19. I've not seen a single recorded case in the entire world of anyone in that age group dying of COVID that didn't have a serious preexisting comorbidity, such as cancer.

If you have a healthy child, they are at no risk from the infection, so there's only danger associated with this shot, which in this age group would be one-third the adult dose. Typically, when you're giving a drug to a child, the dose is calculated based on the child's weight. Here, they're giving the same dose to a 5-year-old as an 11-year-old, despite there being a significant difference in weight. So, it's pure guesswork.

Worse yet, the mRNA vaccines produce an unpredictable amount of spike protein, and even if they produce much too much, there is no way to turn off the process once you have been injected.

Despite clear safety signals, the FDA's advisory committee authorized the Pfizer jab for 5- to 11-year-olds unanimously, 17 to 0 (with one abstaining vote). However, when you look at the roster of the FDA's committee members — who reviewed and voted to authorize the Pfizer shot for children as young as 5, the unanimous "yes" vote becomes less of a mystery.

Abborrent Conflicts of Interest

As reported by National File and The Defender, the membership of the FDA's Vaccines and Related Biological Products Advisory Committee (VRBPAC) has had staggering conflicts of interest. Members have included:

- A former vice president of Pfizer Vaccines
- A paid Pfizer consultant
- A recent Pfizer research grant recipient
- A mentor to Raphael Simon, senior director of vaccine research and development at Pfizer
- James Hildreth — President of Meharry Medical College, which administers Pfizer vaccines
- A chair of the Independent Data Monitoring Committee for the Pfizer Group B Streptococcus Vaccine Program
- An individual proudly photographed taking a Pfizer vaccine
- Several people who are already on the record supporting coronavirus vaccines for children, including Ofer Levy, Jay Portnoy and Melinda Wharton

In addition to that, former FDA commissioner Scott Gottlieb is currently on Pfizer's board of directors. As noted by Nass, two of the members, one permanent and one temporary, are also CDC career employees whose job it is to push vaccines at the CDC.

> *"If they voted against authorizing a vaccine, they would be out of a job,"* Nass says. *"They have no business on that committee . . . It's a very unethical time of advisory committee members . . .*
>
> *What happened is Pfizer delivered a large package of information to the FDA on October 5, 2021. FDA staff had to go through this large packet of information on the 5- to 11-year-olds and produce their own report, which was about 45 pages long, and create talks to give to the advisory committee, and they did all of this in 17 days.*
>
> *There was apparently very little critical thought that went into their presentations. Before the meeting, Children's Health Defense, and I was one of the authors, wrote to the committee and to FDA officials saying, 'Look, there's all these reasons that don't make logical or medical sense for vaccinating kids in this age group, because they almost never get very ill or die, and the side effects of the vaccine are essentially unknown.*
>
> *We know there are a lot of side effects, but the federal government has concealed from us the rate at which these side effects occur. But we know that the rate from myocarditis is very high, probably at least 1 in 5,000 young males . . . which is a very serious side effect. It can lead, probably always leads, to some scarring. It can lead to sudden death, to heart failure."*

Trials in Young Children Were Inadequate

As explained by Nass, in the clinical trial, there were two groups of children. The first group was enrolled for two to three months, while the second group was enrolled for just 17 days after receiving the second dose. (Pfizer added the second group because FDA claimed there weren't enough volunteers in the first group.)

These two groups comprised over 3,000 children who got the jab and 1,500 or 2,000 who got a placebo. None suffered serious side effects. This was then translated into the claim that the injection was safe. However, as noted by Nass:

> *"They didn't look at safety in all these kids. Even though FDA had said, 'Add kids to your clinical trial,' Pfizer created a 'safety subset' of one-tenth of the vaccinated subjects.*
>
> *It was this small number of kids from whom they drew blood to show they had adequate levels of neutralizing antibodies, which was a surrogate for efficacy. Because they didn't have enough cases of COVID in this abbreviated trial to show that the vaccine actually works in this age group."*

Even though the advisory committee acknowledged that the blood test done for efficacy had not been validated, and wasn't reliable evidence of effectiveness, they still decided that all children, regardless of health status, would benefit from the injection.

They also ignored the fact that at least half the children are already immune, and giving them the injection will provide no additional benefit in terms of immunity, while putting them at increased risk for serious side effects.

> *"Nobody said, 'Look, the parents of healthy kids may be dying for a vaccine, but that's because we haven't told them the truth about the vaccine. We haven't told them their kids don't need it. We haven't told them it's going to potentially damage future immunity.*
>
> *We haven't told them they're at higher risk of side effects than if they never had COVID. We're not allowing them to go get antibody tests to establish that they're already immune and therefore should be waved from being vaccinated.'*
>
> *The committee members were aware of all this stuff, but in the end [they voted yes], apart from one very smart member of the committee who works for the National Institutes of Health. He abstained. He didn't have the guts to vote no, but he knew this was a bad idea."*

Children Are Being Injected Without Parental Consent

While all of that is bad enough, parents of young children now face the possibility of their children being injected against their will and without their knowledge. Nass comments:

> *"As I said, we don't know why the government wants everybody vaccinated, but there's probably a reason that goes beyond protecting us from COVID.*
>
> *The government got the FDA to authorize the vaccine for 12- to 15-year-olds on May 10 [2021], and subsequently that group, which is about 5 million kids, has been getting vaccinated across the country. That's under emergency use so, again, you can't sue.*

But something kind of evil happened, which was many cities began vaccinating 12-to-15-year-olds in the absence of parental permission. So, a child could show up with their friends or a friend's mother at a vaccine center and get vaccinated with no one asking about their medical history, nobody calling the parents. No notation got entered into the child's medical record that they were vaccinated.

Vaccinators were told to make their own assessment. If they thought this child could give consent, go ahead and vaccinate. There was a gross violation of law, and yet it was happening in Boston, in Philadelphia, in Seattle, in San Francisco, and we have good documentation of it.

The government currently is planning for mobile vaccination clinics for kids and vaccinations in schools and they may take this program of vaccinating without parental consent down to the 5- to 11-year-olds ...

In fact, we may see clinics popping up that don't require informed consent in the 5- to 11-year-old group. Let me just mention that the chief medical officer in Canada's British Columbia said they have brought laws that allow children of any age to consent for themselves. Think about that. A baby can consent for vaccinations for itself. It would be funny if it wasn't so diabolical.

All of this goes against the most basic concept of medical ethics, which is informed consent. No one has the right to perform a medical procedure on you without your consent, or the consent of a legal guardian. The government, again, without establishing any new laws, is simply bypassing the legal system.

Will Young Children Be at Risk for Myocarditis?

Based on her review of the scientific literature, Nass suspects younger children in the now COVID jab-approved, 5- to 11-year-old age group will be at exponentially higher risk of myocarditis and other side effects compared to the 12- to-15-year-group, where we've already seen a documented increase.

> *"In the letter that Children's Health Defense wrote to the advisory committee for the FDA, we created a graph based on the reporting rate of myocarditis versus age, and we showed there was an exponential curve.*
>
> *Men aged 65 and up had a rate that was 1/100th the rate of boys aged 12 to 17. If that exponential curve keeps going up, the rate in the 5- to 11-year-olds could be even dramatically higher. In those young men, a 1 in 5,000 rate was reported to VAERS [Vaccine Adverse Events Reporting System]. That's not a real rate.*
>
> *That just tells us how many people got diagnosed with myocarditis, and then went to the trouble of reporting it to the FDA. The FDA and CDC have a large number of other databases from which they can gather rates of illness.*
>
> *VAERS is considered passive reporting. It is not considered fit for purpose to establish illness rates because we don't know how many people report. Do 1 in 10 report, 1 in 100, 1 in 50? Nobody knows.*
>
> *However, again, because everything is crazy since the pandemic came in, the CDC has tried to pull the wool over our eyes and has claimed that the rate of anaphylaxis in the population from COVID vaccines is identical to their reporting rate to VAERS. We know that's not true.*
>
> *On the CDC's website, that's what they have. Elsewhere on the website, they say you can't take a VAERS rate and call it an actual rate of reactions, but they've done that [for anaphylaxis]. And they're trying to obfuscate the fact that they're not giving you real rates, and sort of pretending that the myocarditis rate is probably the VAERS reporting rate of myocarditis, although they're not saying so directly.*

Nass goes on to account an example from the smallpox vaccine, which also caused myocarditis. A military study that just looked at cases sent to specialists found roughly 1 in 15,000 developed myocarditis. A military immunologist then dug deeper, and drew blood on soldiers before and after vaccination, and found a myocarditis rate of 1 in 220 after receiving the smallpox vaccine.

However, 1 soldier in 30 developed subclinical myocarditis where troponin rose from normal to more than two times the upper limits of normal. While asymptomatic, 1 in 30 was measurable inflammation of the heart. "Right now, in terms of what the rate is for COVID, nobody is looking, no federal agency wants to find out the real rate," Nass says.

You Can't Find Problems You Refuse to Look For

A simple study that measures troponin levels — a marker for heart inflammation and damage — before and after each dose, could easily determine what the real rate of myocarditis is, yet that is not being done.

> *"This is what we're dealing with," Nass says. "All these databases, which is about a dozen different databases, that CDC and FDA said they could access to determine the rates of side effects after vaccination with COVID vaccines, they're either not being used or being used improperly," Nass says.*
>
> *"It was discovered that a new algorithm was being used to study the VAERS database that only came into use in January 2021, immediately after the vaccine were authorized, and the algorithm was developed such that you compare two vaccines to each other.*
>
> *If the pattern of side effects was similar between the two vaccines — which is often the case because there's a limited number of general vaccine adverse reactions — even if one vaccine has a thousand times more side effects as the one it is being compared to, by using this flawed algorithm, if the pattern of reactions was the same, even though the rates were 1,000 times higher for one, the algorithm would fail to detect a problem.*
>
> *That is the algorithm they're using to analyze VAERS [data]. They're also using bad methods ... to analyze the vaccine safety database, which encompasses 12 million Americans who enrolled in mRNA around the country. The CDC pays for access to their electronic medical records and their data.*
>
> *Somehow when these databases have been looked at carefully, they're finding very low rates of myocarditis in boys, approximately equal to the VAERS reporting. It was said months ago, 'We can't find a safety signal for myocarditis. We're not finding an anaphylaxis signal, we're not finding a Bell's palsy signal.'*
>
> *The FDA's and CDC's algorithms couldn't pick up for most known side effects. So, there's something wrong with the analytic methods that are being used, but the agencies haven't told us precisely what they are. What we do know is that the rates of side effects that are being reported to VAERS are phenomenal.*
>
> *They're orders of magnitude higher than for any previous vaccines used in the United States. An order of magnitude is 10-fold, so rates of reported adverse reactions are 10 to 100 times higher than what has been reported for any other vaccine. Reported deaths after COVID in the United States are 17,000+. It's off the charts.*
>
> *Other side effects reported after COVID vaccinations total over 800,000. Again, more deaths and more side effects than have ever been reported for every vaccine combined in use in the U.S. cumulatively over 30 years."*

Despite all this shocking data, our federal agencies look the other way, pretending as if nothing is happening, and no matter how many people approach them — with lawsuits, with public comments, reaching out to politicians — they refuse to address blatantly obvious concerns. This is clear evidence that they're acting with intentional malice.

> **FDA has become Clown World, and what they do now is to perform a charade of all the normal regulatory processes that they are expected to perform ... You're the guinea pigs, but they're not collecting the data. Nobody should get these shots.**
> **~ Dr. Meryl Nass**

The FDA and CDC are supposed to protect the public. They're supposed to identify safety concerns. They're not supposed to act as marketing firms for drug companies, but that's precisely what they've been converted to.

New Formulations Have Never Been Tested

Another truly egregious fact is that Pfizer has altered its formulation, allegedly to make it more stable, but this new formulation has never been included in any of the trials. Nass explains:

> *During the October 26, 2021, VRBPAC [Vaccines and Related Biological Products Advisory Committee] meeting, Pfizer said, 'Look, we want to give the vaccine in doctor's offices and we've found a way to stabilize the vaccine so we don't need those ultra-cold fridges anymore. We can put these vials in a doctor's office and, once defrosted, they can sit in a regular fridge 10 weeks and they'll be fine.'*
>
> *Some committee members asked, 'OK, what's you do? How did you make this marvelous discovery? And they said, 'We went from the phosphate buffered saline buffer to a Tris buffer, and we slightly changed some electrolytes.' A committee member asked, 'OK, how did that make it so much more stable?' And everybody in the meeting from FDA and Pfizer looked at each other and said, 'We don't know.'*
>
> *An hour later, Pfizer had one of their chemists get on the line, but he couldn't explain how the change in buffer led to a huge increase in stability, either. Then, late in the meeting, one of the members of the committee asked, 'Did you use this new formulation in the clinical trial?'*
>
> *And Dr. Bill Gruber, the head Pfizer representative, said, 'No, we didn't. In other words, Pfizer plans, with FDA connivance, to use an entirely new vaccine formulation in children, after their clinical trials used the old formulation. This is grossly illegal. They've got a new formulation of vaccine. It wasn't tested in humans. And they're about to use it on 28 million American kids."*

It's nothing short of a dystopian nightmare. Completely surreal. You can't make this stuff up. Yet as shocking as all this is, earlier this year, Dr. Anthony Fauci projected that these COVID jabs would be available for everyone, from infants to the elderly. Now they've got the 5-year-olds, and there's every reason to suspect they'll go after newborns and infants next.

Whose Babies Will Be Offered Up as Sacrificial Lambs?

According to Nass, Pfizer and the FDA have struck a deal that will allow Pfizer to test on babies even younger than 6 months old, even if there's no intention to inject infants that young. Those trials may begin as early as the end of January 2022.

> *"This arrangement between FDA and Pfizer will give Pfizer its extra six months of patent protection, whether or not these vaccines are intended to be used in those age groups. So, you can look at these trials as a way of almost sacrificing little children, because when you start a trial, you don't know what the dangers are going to be.*
>
> *I could be wrong, but I doubt we're going to give these to newborn babies the way we give the hepatitis B vaccine on the date of birth, yet they will be tested in very young babies. The question is, whose babies get tested? In the past, sometimes the babies that got tested were foster children, wards of the state. Sometimes parents offer up their children. But there will be clinical trials."*

When will we get the data from these trials? It turns out that in the agreements reached between Pfizer and the FDA, some of those trials won't conclude until 2024, 2025 and 2027. The goal here is to vaccinate all Americans, children and adults, within the coming few months or a year, yet it'll be five years before we actually know from clinical trials what the side effects may be.

We're Living in Clown World

As noted by Nass, this is yet another crime. It may fulfill the letter of the law, but it doesn't fulfill the meaning of the law. It makes no sense to run clinical trials that won't be completed until five years after your mass vaccination program has been completed and the entire population is injected.

> *"It's just a joke to do that," Nass says. "But FDA has become Clown World, and what they do now is to perform a charade of all the normal regulatory processes that they are expected to do, but they're only doing them in an abbreviated or peculiar manner so that they don't really collect the important data.*
>
> *For example, the control group has been vaccinated two months into the Pfizer trials, which effectively obscures side effects that develop after two months. Blood is not tested for evidence of myocarditis or blood clots using simple tests (troponin and D-dimer levels).*
>
> *For all the Americans out there who haven't spent 20 years examining the FDA procedures like I have, these FDA advisory committee meetings are it's designed to make you think a real regulatory process is going on, when it's not. Instead we are all guinea pigs, but no one is collecting the data that is normally required to authorize or approve a vaccine. Therefore, in my opinion, nobody should get these shots."*

To make matters even worse, it's actually illegal to grant EUAs for these vaccines, because there are drugs that can prevent the condition (COVID), as well as treat it. EUAs can only be granted if there are no existing approved, available alternatives to prevent or treat the infection.

The effective drugs most have already heard of are ivermectin and hydroxychloroquine, but there are a number of other drugs that also have profound effects on COVID, Nass says, including TriCor and cyproheptadine (Periactin).

TriCor, or fenofibrate, emulsifies lipid nanoparticles and fatty conglomerations that contain viruses and inflammatory substances. The drug essentially allows your body to break down the viral and inflammatory debris better. As such, it might also help combat complications caused by the nanoliposomes in the COVID shot.

According to Nass, Pepcid at high doses of up to 80 milligrams three times a day is also useful for treatment. Dr. Robert Malone is starting a clinical trial using a combination of Pepcid and celecoxib (brand name Celebrex). Many are also recommending aspirin to prevent platelet activation and clotting.

I believe a far better alternative to aspirin is lumbrokinase, and/or serapeptase. Both are fibrinolytic enzymes that address blood clotting. You can develop sensitivity to them, so I recommend alternating the two on alternate days for about three months if you've had COVID.

You could rule out blood clotting by doing a D-dimer test. If your D-dimer is normal, you don't need an anticlotting agent. If clotting is a concern, you could also use NAC in addition to these fibrinolytic enzymes. It too helps break up clots and prevent clot formation.

More Information

To learn more, be sure to peruse MerylNassMD.com and anthroxvaccine.blogspot.com. She typically posts something every day to her blogspot blog. In closing, Nass concludes:

> *"Remember, all the COVID jabs are authorized [under EUA], not licensed. They're all legally, technically, experimental. I know you can lose your job and all these terrible things can happen if you refuse the vaccine, but if you are injured by the shot, you won't be able to sue later. You will be on your own.*
>
> *Legally, they can't force you to accept the vaccine while it is in EUA status because of the Nuremberg code, because of existing U.S. law about informed consent, and because of the actual statute on emergency use authorization, which says you have the right to refuse. They can't force you to take these [shots].*
>
> *I know they are forcing you, but legally they can't, and please keep that in mind. Hopefully these wrongs will be redressed. Mandates are being walked back in many jurisdictions.*
>
> *As I've told people, demand to see the bottle that says Comirnaty, because legally, they can force the licensed product on you, but there isn't any right now. So, you have an out for the next few months, hopefully.*
>
> *They're really dangerous vaccines. What you don't know will hurt you. Please protect your children. If there's any way, don't get vaccinated. The more people who say no, the more the government is already backing down. In many cities, the imposed dates by which you have to be vaccinated have been pushed back.*
>
> *Now Biden's administration is saying, 'Well, it's not going to be carved in stone. We're going to negotiate with people because they don't want to lose 30% or 40% of their staff.' So, be strong, protect yourself and your children. Know you're doing the right thing.*
>
> *We've got a criminal organization running things now. This is a worldwide program of some kind designed to control us. Once we all figure it out, we can win. There's many, many more of us than there are of them."*

#1 Best Seller In Books

"The Truth About COVID-19" exposes the hidden agenda behind the pandemic, showing the countermeasures have nothing to do with public health and everything to do with ushering in a new social and economic system based on totalitarian, technocracy-led control. So, it's not misinformation they fear. It's the truth they want to prevent from spreading. Pick up a copy of this best-selling book today before it's too late.

The Truth About COVID-19

It is a CRIME AGAINST HUMANITY TO VACCINATE CHILDREN AND YOUNG PEOPLE, but Pfizer only thinks about its benefits and with its revolving doors, in an FDA committee with a conflict of interest it has obtained a consent of its poison with a view to increasing its profits and that of the members of said committee. It is money in exchange for the SUFFERING OF THE FAMILIES WHO WILL SEE THEIR CHILDREN FALL ILL. Pfizer has used its position as a producer of one of the healthy COVID-19 vaccines to "silence government, accelerate supply, shift risk and maximize profits" through secret contracts with countries around the world. childrenshealthdefense.org/defender/secret-vaccine-contracts-pfizer-mas...

Rare problems with blood clots (J&J vaccine) and myocarditis (inflammation of the heart muscle, Pfizer and Moderna) have occurred in additional younger people, and equally serious problems can surely be found. Pfizer, modern to take in combined $13 billion in 2022 round vacuum. childrenshealthdefense.org/defender/safety-pfizer-moderna-billions-...

PANDEMIC CREATED 130 NEW BILLIONAIRES, $ 2.1 TRILLION IN NEW WEALTH, WHILE MILLIONS SUFFERED childrenshealthdefense.org/defender/covid-pandemic-billionaires-infl... The first thing is to do no harm. Governments will be responsible for this crime, actively, university presidents in business leaders should not impose a medical intervention that causes damage to their health, also knowing that Covid-19 in children and young adults is very asymptomatic, and produce immunity natural prophylaxis. Then it would be a crime to vaccinate children every 6 months and demand their immunity passport. WHY KIDS' IMMUNE SYSTEMS CAN HANDLE COVID, AND HOW VACCINES COULD INTERFERE WITH THEIR IMMUNE RESPONSE www.wakingtimes.com/why-kids-immune-systems-can-handle-covid-and-how-... (October 28, 2021)

22 STUDIES AND REPORTS RAISE DOUBTS ABOUT COVID VACCINE EFFICACY AND VACCINATING CHILDREN
childrenshealthdefense.org/defender/studies-reports-covid-vaccine-efficacy-children/ ... FDA BURIES DATA ON SERIOUSLY INJURED CHILD IN PFIZER'S COVID-19 CLINICAL TRIAL sanonymi.substack.com/ ...FDA buries data on seriously injured (Oct 23) WHY ARE WE VACCINATING CHILDREN AGAINST COVID 19 www.sciencedirect.com/science/article/pii/S2213076821001921#b0040

TEN RED FLAGS IN THE FDA'S RISK-BENEFIT ANALYSIS OF PFIZER'S USA APPLICATION TO INJECT AMERICAN CHILDREN 5 TO 11 WITH ITS MRNA PRODUCT tabangan.substack.com/p/ten-red-flags-in-the-fdas-risk-benefit (Oct 25, 2021) Even a Harvard Medical School professor of medicine Martin Kulldorff cautioned before the American Thought Leaders Program, "I don't think children should be vaccinated against COVID. COVID is not a great threat to children. "They do not die from this, except in very rare circumstances. If you want to talk about protecting children, we can talk about traffic accidents, for example, who are really at risk.

"Children are more likely to get serious illnesses or die from the flu than from COVID-19," Kulldorff said. The teacher cited what happened in Sweden. "During the first wave in the spring of 2020, which affected Sweden a lot, the country decided to keep nurseries and schools open for all children aged 1 to 15 years. And there are 3 million of these children who managed through the first wave without vaccines, and there was absolutely no kind of distancing in schools, 'said Kulldorff. "If a child was sick, he was told to stay home. But that was it. And do you know how many of those 1.8 million children died from COVID? Zero. Only a few hospitalizations. It is not a risky disease for children."

FIFTH CIRCUIT COURT OF APPEALS ISSUES EMERGENCY HALT TO BIDEN'S UNCONSTITUTIONAL VACCINE MANDATE. After reviewing an emergency lawsuit now involving 19 states that are suing the Biden administration for executive overreach with the unconstitutional vaccine mandate, the Fifth Circuit Court of Appeals has issued an emergency stay. "Because the petitions give cause to believe there are gross statutory and constitutional issues with the mandate, the mandate is hereby STAYED pending further action by this court," a panel of the U.S. Court of Appeals for the Fifth Circuit said in the brief order. "Because the petitions give cause to believe there are gross statutory and constitutional issues with the mandate, the mandate is hereby STAYED pending further action by this court," a panel of the U.S. Court of Appeals for the Fifth Circuit said in the brief order.

Petitioners said the mandate, promulgated as an Emergency Temporary Standard (ETS) by the Department of Labor's Occupational Safety and Health Administration (OSHA), should be struck down because it exceeds OSHA's authority under the Occupational Safety and Health Act, reports The Epoch Times.

Hi Gui, Not easy to keep up with the speed of the "Great Unravelling" is it? Rate of change is ratcheting-up, for sure. Here's a recent discussion Alex Jones hosted with Robert Barnes of CHD regarding a whistleblower's report of misdeeds and wrongdoings during the Pfizer clinical trials last year, and he summarizes their next moves, here's a link: "Biggest Vaccine Whistleblower in History Discovered Pfizer Fraud in COVID Jab Trials, says Robert Barnes" - www.bitchute.com/ ...7f9fdd7fu.html/ AND a newer, more complete weekend show highlighting ADE is going strid this morning: Only want to watch the first hour or so: "Hospitals Filled to Capacity With New Mystery Illnesses! Vaccine Triggering? – FULL SHOW 11/05/21" www.bitchute.com/ ...7f9fdd7fh5qp/ - may want to stay on this as Dr. McCullough shares highly alarming information starting at the 2nd hour of this show.

Guillermou - always good info. Here was one link to info that everyone should be aware of: 1) Dr. David Martin exposing some truths & the constructs of medical fraud: www.brighteon.com/3e124b6e-0484-4744-9851-7376232d3d7f 2) Alex EMF's attack on the immune defense system: www.sciencedirect.com/ ...S2213076821700701 3) Alex EMF's dermal oxygen molecules making them nanobacteriafor: www.drrobertyoung.com/post/the-connection-between-5g-and-the-corona-v...

It is just time that this The People, stop spinning our wheels & take action. Unite, stand in Truth, reject the pharmacidal medical tyranny & get involved in taking back the People's Power at all levels of organizations, governments, etc. Restore lawfulness & de-centralize virtually everything. Everything has to be localized to ensure accountability.

While doing that, ensure necessities are secured by establishing local networks for food, water, security, etc. Essentially an underground economy, as many have already said. Just as the evil doers propagandize said there is only one way out ("Join your Betters"), there is only one way out of this satanic global Cabal Corporate technocratic anti-nature, anti-human theft & killing machine by using this two pronged strategy. The Power is with, The People. It won't be easy, but, do remember that, as the saying goes, "the road to hell is paved with good intentions". Strength, courage, wisdom, honesty, critical analysis skills, common sense, commitment, devotion, vigilance & virtue will win the war.

"Pandemic created 130 new billionaires, $2.1 trillion in new wealth..." Not really "new" wealth. The headline should say "$2.1 trillion of public treasuries/taxpayer dollars handed over to pharma execs after successful and deceptive lobbying."

Thank you ROSE, yes, emergency rooms in the United States are filling up with people suffering from serious health problems caused by "vaccines". Unlike during the height of the "pandemic", when hospitals were empty and lifeless. Patients come to the emergency room sicker than before the pandemic, their illnesses are more advanced, and they need more complicated care. Mainstream media outlets are blaming everyone who postpone their attention during the hoax scam to avoid catching the common cold which they labeled COVID-19. An MIT report even claimed that COVID patients are not the problem. Bloomberg Quint has reported that even though 80% of Colombians have been "vaccinated," hospitals are still overloaded. But the governor says they are those pesky "unvaccinated" people who fill hospitals.

Thanks Nancy, yes, we need to resist against the crisis that the Great Reset seeks to submerge humanity. Yes, we do not want alma, we must promote the community economy be self-sufficient. In many European countries, people are being helped to install solar panels for self-consumption. The electricity consumption associated with the supply of natural gas is through the roof and being able to have energy for self-consumption is essential. Even small permaculture-type communities are growing. The most revolutionary thing is to fight against tyranny in these times is a garden, planting our own seeds, in a farm to freedom, is the most essential.

Linking with Dr Mercola's information, these henchmen are the ones who want to experiment with children with a "vaccine" that will only cause pain and suffering to the families. The 17 members of the U.S. Food and Drug Administration's Vaccines and Related Biological Products Advisory Committee who voted 17-0 in favor of authorizing Pfizer's COVID vaccine for kids ages 5 to 11 at have deep ties to pharma. A report in Link Implicits conflicts of interest and financial entanglements with vaccine companies that allowed this rogue advisory immoral vote to expose 28 million American children to risk of injury and death. These conflicts are cleverly documented by groups like the Project On Government Oversight (POGO), in databases like the Centers for Medicare & Medicaid Services Open Payments, and in the Children's Health Defense (CHD) e-book, Conflicts of Interest Undermine Children's Health. " childrenshealthdefense.org/defender/fda-pfizer-covid-kids-pharma/?utm... (11/01/21)

I really feel as if we should stop calling these things...vaccines. They aren't vaccines, and if we keep using THEIR definitions for everything, we are falling right into their own trap. Speak the truth, and stop giving credibility to things that are false.

Thank you gaylepipe, yes that headline reflects your point, yes, we are killing and making people sick with taxpayer money. The hypocrisy is abysmal. It is not legally and morally acceptable to restrict the rights and direct the economic contributions of people to the state to force them to undergo an experimental "vaccine" or any other medical procedure. Who decides what medical procedures are acceptable to enforce? Who becomes the almighty and benevolent supervisor of the path of the health of every human being. On all fronts the same diversion of resources is happening to entice the big monopolies. We now have the meetings for climate change.

The adoption of "green capitalism" by the private sector is yet another trick to avoid a real reckoning. If business and financial leaders were serious, they would recognize the need to drastically change course to ensure that their profit-maximization hypothesis is all humanity now and in the future. The notion of green capitalism implies that the costs of tackling climate change are too high for governments to bear on their own, and that the private sector always has better answers. The link is very descriptive. childrenshealthdefense.org/defender/green-capitalism-corporate-climate...

Thanks Cecilia. Yes, linking to the detailed information of Dr Mercola, cardiologist Dr. Peter McCullough states that the mass forced vaccination of Americans will be considered one of the deadliest and costly medical errors in history. Citing data from the US Vaccine Adverse Event Reporting System (VAERS) and from Israel and Britain, where COVID cases are multiplying among these vaccinated, McCullough, who is editor-in-chief of two medical journals and author of more than 600 peer-reviewed studies , including 40 dedicated to COVID-19, he said he is "deeply concerned" about the future of the United States.

The media have highlighted that the most serious new cases have occurred among the unvaccinated, but have failed to report that the majority (more than 80 percent) of new cases reported by Israel's Ministry of Health are among vaccinated people. "It basically shows that vaccines are failing." Vaccinated people can acquire and transmit the pandemic coronavirus and become COVID-19 and die from it. "High quality research papers prove it can to each other," McCullough said. "Americans do not receive information about this. It is basically impossible for them to navigate this vaccination decision. They just say, 'Take the vaccine, and it doesn't matter which one.' www.lifesitenews.com/news/doctor-covid-vaccination-program-most-deadly...

Yes, Raytheth, that's why they write "vaccines" because they are actually biological weapons. Forced mass vaccination of Americans will be considered one of the deadliest and costliest medical errors in history, said renowned pioneer in early treatment of COVID-19, Texas cardiologist and Internist Dr. Peter McCullough. "Americans are going to bear the brunt of what will inevitably be a federal mass vaccination program that will be considered one of the deadliest, one of the most damaging and costly in human history," McCullough said. I am deeply concerned for the future of America and also deeply frightened by the lack of freedom of expression and scientific discussion," McCullough said.

According to our antichrist Constitution and international law, (Nuremberg Accord), it's a crime to force ANYONE to "take the jab". That being said, the Central Bank Cam-member Kissinger supposedly stated - The illegal we can do immediately, the unconstitutional takes a bit longer. www.cdc.gov/ ...//coverfluvx) When the bankers control government and the people stand shivering and silent, it's all most. Hell, they even had their tools grant them immunity.
www.vgtrust.com/2019-01-1dian1-Fraternity-c-vaccine-big-pharma-has-1 - Can you imagine their joy at watching us being beaten into submission? Not even worrying about civil/criminal consequences? This is a complete redux of the Wall Street funded destruction of Russia, a genocide of tens of millions and Bolshevik Communist Marxism.

Contrary is only on small (backwards) step in a much larger process of oppression. "I am a victim of medical apartheid because I refuse to be a victim of forced medication. I did nothing. I am not alone. I have friends in similar circumstances. Even many innocent children are being victimized. Sometimes I feel like an abused child. I live in a country where I cannot legally go to a restaurant or cafe with my wife but I am forced - and the cafe owner is also subject to fines and even closure. I have many friends in the arts, but I cannot legally attend their showings or performances. I cannot travel on public transportation. I cannot attend public sports events nor any indoor public celebration.

Although I am, at present, allowed to attend church services, even church leaders are required to enforce rules on capacity and behavior, irregardless of religion. Many of my friends have chosen to submit to round after round of medical abuse and oppression or steadily shrinking internals, with no end in sight. Some have become so conditioned and confused that they are joining the oppressive forces that oppose and oppress perfectly natural and innate behaviors in myself and others like me.

Others are beginning to recognize the nonsense and the danger and waking up, saying they will not submit, and will not oppress, even as they unconvivially verbalize support for these oppressive statements like, "They are only doing their job." There appears to be no escape. Country after country around the world is being victimized, is victimizing their citizens without even a hint of legal process. There appear to be no leaders, as if the oppression has come down from the heavens. But all of the rules are made and enforced by humans. I need help. We all need help."

harveiccison, perhaps people are beginning to really question what is going on. Austria recently implemented a lockdown for unvaxxed only, quickly followed by a full lockdown for the whole population (an attempt at dividing the people?), along with mandating jabs for every citizen by next February. Austrian chancellor apologizing for measures since "not enough people showing solidarity". I.e. 20% population not vaxxed. Huge protests in Vienna yesterday protesting, with reports that the police and army are with them, let's hope this is true. Also huge crowds protesting in Australian cities.
jeanneau.com/2021/11/20/2200600/massive-freedom-rallies-held-across-au... And the Australians are sending out an s.o.s to the whole world www.virginiademocracywatchdog.com.au/sos We need to respond big time.

This Government of QUIS no longer represents the People of these United States. Therefore is now to be considered and illegal entity that has been hijacked and totally corrupted beyond being able to be corrected. Therefore it is the obligation of every citizen TO NOT BE AFRAID and educate each other and plan to work together at the community level. We have inalienable rights given by CGR Creator we are entitled to respect for each other, our bodies, our lives, our children. WE ARE NOT THE PROPERTY OF OUR GOVERNMENT.

www.youtube.com/watch - MASS PSYCHOSIS - How an Entire Population Becomes MENTALLY ILL Posted with thanks to Eileen in Switzerland. Remember, we engaged at the end of this presentation. The more I read about it, the more I think a parallel universe is the way to go. Or creating safe pockets of escape for people who feel threatened, society is strengthened when support is offered. When I was with Canadian Mental Health we had support groups for an amazing number of situations. Part of my job was to cover these groups and it was impressive how people would open up and grief that has to be accepted, been never accepted, to come out.

I live in Ottawa - it's not an exaggeration to state that this may be the most confrontant town in the entire country. When I moved here I really did wonder if there was something in the water. There was no chutspah to be found. The parks and gardens are amazing - paid for by Canadian taxpayers to have one keeper describes it. ... We get great exhibitions of art. But when you're working, if you ask a question about why something is done a certain way, I swear, these people really have trouble replying. Unless it's run-of-the-mill, it's always fare-thee-like this, they don't like thinking out of the box. It took me about three years of posting out to the chain of the courthouse that it isn't a good idea to allow photographs of divorce documents, because how do we know someone hasn't tampered with the information? They did finally switch to require the original document or True Copy of same.

I'm tempted to run an ad in the newspaper offering a support group for un-vaccinated people, not to meet in person, but to communicate freely with each other. It could be done with a website, but of course that will be inviting the anti-unvaccinated to attack. Maybe twice a sponsor system - you then have a question, you email. I'll be happy to hear any other ideas. Thanks!

Thanks, Barbara, yes, massive psychosis and stress. As Dr Mercola has reported, the management of this fake pandemic will cause serious illnesses, deaths and also broken hearts. The confinements, the lack of social contact and the fear caused by the mass media, the stress and struggle in the future, including unemployment and the crisis that is being declared causes serious psychic consequences and the heart suffers with these negative emotions Science shows once again that emotional and physical health are closely linked. Love, friendship and feelings of gratitude are beneficial to health. A research team made up of British academics, Italian and Swiss found social isolation and stress causes chronic diseases and smoking, plus symptoms of depression. heart.bmj.com/...r152ft

Stress has cardiovascular manifestations in the form of arrhythmias, conduction disturbances, myocarditis, cardiomyopathy, myocardial injury and myocardial ischemia or infarction due to increased microvascular coagulopathy In addition to these direct effects, we are now beginning to recognize indirect cardiovascular effects in the form of an increased incidence of Takotsubo cardiomyopathy in patients without any evidence of coronary atherosclerosis, presumably due to increased psychological stress. There is data from a retrospective cohort analysis showing a four-fold increase in the incidence of broken heart resulting from stress cardiomyopathy during the pandemic period compared to similar periods before the pandemic. ontinelibrary.wiley.com/.../joca.12251

@ Reitalew I could see that unvaccinated support group. I teach and am in the minority on this whole lie, unless others are staying silent. Some have expressed their agreement with me. The rest high five each other every time another shot is approved thinking they are a part of the solution and making a positive difference. They grin and cheer. It's just so weird. I worry that the 5 - 9 year olds in my class will eventually be poisoned too. I guess the 5-year olds will soon. I have been sick with some kind of cold / flu three times since these shots have come out, each after someone I work with closely has gotten their shot(s). It's either shedding or coincidence. Last year, after Jab,I came out, one of my co-teachers tried to set up a vaccine appointment for me, claiming she knew it was difficult to get one and that I might not know how to make an appointment online.

I told her I was perfectly capable of making my medical appointments by myself. It's driving her crazy not knowing if I've had the poison. She hints for an answer to her passive-aggressive nag and even sets up the assistant to ask me. Even if I chose to get it (I won't), I'd never tell anyone. The discrimination towards the un-vaxxed is disgusting. This is not why I served in the military. It's so stressful to be around these high-anxiety fearful people. Our students come to me most of the time because I don't bring that anxious energy into the classroom, except when the co-teacher is projecting it on me. I apologize for the rant, but I do feel better. :)

Yes, support groups are needed to prevent misinformation from being the owner of a dramatic situation of a humanity subjected to fear and the imposition of "vaccines". A debted government report exploring how to get the public to modify their behavior to accept restrictive measures towards new COVID-19 restrictions have created a population with a "deep reverence" for authority and a "powerful willingness to conform." The paper explored how to weaponize behavioral psychology to push the public to take supportive measures and adopt behaviors without them explicitly knowing that they are being manipulated.

The perceived level of personal threat was found to increase among those who are conservative, religious, or who prefer "strong leadership messages," the group added, leading to numerous fund propaganda campaigns that exaggerated the threat of COVID to intimidate the public into complete submission. In short, the public is largely thoughtless, docile, and docile, and can be made to accept just about anything as long as it is bombarded with the right propaganda. sunmd.news/2021/10/22/debted-government-report-celebrates-how-public... RETSBEW: It may have to be an under-ground sort of group to start with— an email group with members through people that share similar thoughts....people that are connecting through who they know etc.... like I know you, etc.....until the group gets big enough to start demonstrating on their own, or organizing the joining of similar demonstrations in each area or the coordination of civil disobedience.... ! For one, are SUPPORTING restaurants that DO NOT ask for the Vaxx Passport— I recently found out there are TWO in my area !!!

ALL: Some of us still need to consider a means of supporting ourselves and our mortgages etc..... ... It's like living on the edge of a knife all the balancing I have to do with this crap and also protecting myself.....so it isn't always as easy as saying not quite ! ! I denounce this'.....so I am still leery of being too vocal and too visible about my thoughts to colleagues or lowrifolk.

Before I get pounced on, I DO address strongly to H.R my view on how certain sentences were worded (in the way they announced they 'expect' all employees to be vaxxed and for a recent employee letter AND a FAQ sheet that was provided with a potential NEW employer to completely remove a 'company Covid xxxx policy' and protocol statement from my job offer letter.... so I do have a big mouth...but I watch my words very carefully...

Hi Retsbew, I know exactly what you are talking about in relation to the Ottawa 'attitude'. I lived there for 35 years. Now that I am away from that city, I see it for how it is - conformist for sure, and weak, I think it is because so many people there are government workers on some level and mostly so somewhat they live in very affluent, safe, and secure bubbles. I could even see that while I lived there (and being a non-government worker). It just becomes more clear being away. Beautiful city without doubt though.

Retsbew: Yes Like many including Mercola, cannot understand the behavior of those driving this mass psychosis. As Mercola said in the video he screams "How can they do this?" Most of the NPS are somewhat Narcissistic. Most of the 30% are pathological narcissists who have no empathy. Their prime motivation is self aggrandizement and control of the 'inferior' NPs. Human emotions, if they are expressed, are an act to convince the NPs. One of the attributes of pathological narcissists is the ability to analyze and control others. In those organizations and corporations run by narcissists, the Fauci, a person with deep feelings of humanity and courage either quits or is fired.

My take on how so many narcissists are in charge is simple. We learn our humanity and make human connections as babes in the arms of our care takers. Royal babies were cared for by servants. At some point a child learns that those that they have a connection with are not important. There are others who control those people who control every other person in their life. That psychic break has to turn many into narcissists who think they are the center of the universe. That is how royalty around the world created dynasties. That is how the very rich who surround themselves with servants create dynasties.

In the general population less than 1% become pathological narcissists. Most of those pathologies can be traced to childhood. Among the 30%, there are few mothers that breast feed their babies so those babies grow up to be the Prince Andrew or the Rockefellerrich no empathy or compassion. If that is understood then 9-10% can psychologically isolate themselves from that behavior and create strategies like your support groups to counter. A self sufficient intentional community in the highlands of Ecuador is a goal of mine and few others. Hopefully we will achieve that goal before a major collapse of society.

I joined VCS and received my DO NOT VACCINATE card in the mail. It may not work in all situations but at least it is something in the lost bid. Dr. Michael Yeadon is a member also and he was at over 100,000 world wide, a HUGE control group. We have one chat on Telegram. I am all for email support for people who need encouragement or just a friendly word or two. We could do this through this site?

Guillermus... Yes, support groups are needed for resisters. Maybe I should call them refusers. Definitely not "vaxine hesitant". I would envision something like Dr. Glenn Wayne's support group for cancer patients. Dr. Wayne lost his license for "nonstandard practice" even though more of his patients became survivors and entered remission than the average.) His groups brought in speakers and were highly educational for both patients and the practitioners who attended. Oncologists would admit they were learning things they had never been taught. These groups were politically active. They also sponsored fun social events to bring people together.

Therein lies the crux of the problem. These in power deny as the opportunity to come together. The unvaxed are not allowed to meet in large numbers in public places. In some places, not indoors, either. They are repeatedly deplatformed and their voices "cancelled". They are unjustly stigmatized and offered for problems related to the pandemic. Those who parrot the official narrative are always welcome to speak up and be heard. Media is willing to broadcast their biased attitudes which have no basis in fact. They are rewarded by having social and entertainment venues open to them. Essentially, a privileged class has been created. Those who are compliant may not actually be benefitting in the ways they believe they are.

I think in the longer term, it will be the unvaxed who appear wise. Eventually, enough people will realize they have been lied to. I would not be surprised if this resulted in a major revolt. They are being so persuaded, reminded, pressured, lied to, coerced, cajoled, bullied, socially shamed, guilt-tripped, threatened, punished and criminalized... If all of this is considered necessary to gain your compliance - you can be absolutely certain that what is being promoted is not in your best interest." - Ian Watson

Being also Canadian I see the same things. What's in the water? Flouride, for starters, and then so many are indulging in pot, now that it's all legal. I have wondered lately whether the push to legalize was a helpful preamble to getting this "mass vaccination" campaign going. If you want to establish control, it may be necessary to go one by one. I recently saw a comparative list of messenger apps compared according to whether they had the various factors that really protect data privacy. Swiss-based "Threema" and another one named "Element" had the highest scores.

While WhatsApp has end-to-end encryption (E2EE), FB tracks the metadata (when you contact etc.). Telegram also does not prevent metadata gathering and further even lacks E2EE – which all the other apps in the list did have! Scouc the ProtonMail blog. JAGDIS! Based inside a neutral country in Switzerland, ProtonMail is dedicated to privacy and has free-volume account options; they also donated accounts to protesters in Myanmar after the coup. ProtonMail enables E2EE email among those who are registered there. Happy to take none of the fact that Web inventor Sir Tim Berners Lee, a strong advocate for internet freedom and data privacy, has joined their board of directors.) Overall, when using Big-Tech services, people do not have communications freedom or privacy. Better to pay for a service that does have the E2EE and does not track metadata, if you can afford that.

According to research done by Harvard Pilgrim Healthcare, less than 1% of deaths and adverse events get reported to VAERS. www.carolecole.org/wp-content/uploads/2020/12/Lazarus-report.pdf According to Mendelsohn, the USA has had over 75,000 Covid-19 deaths. www.medicalnews.info/coronavirus As of 10/22/2021, over 18,000 Covid-19 VACCINE deaths have occurred. 8,200 of those deaths are USA only. www.medalerts.org/vaersdb/public/STATE/US/tables-summary-for-covid-19-vaccines-this... Using Harvard Pilgrim's correction factor of 1% (1/100 = 0.01) you divide 8,200 by 0.01 and you get 820,00 Covid-19 Vaccine deaths! That's 60,000 more than what died from the virus. Even sadder, over 75% of those deaths could have been prevented. It's probably much higher than that. Dead people can't report anything. Someone else has to do it for them. Doctors and nurses are reluctant to document these deaths for fear of losing their job.

These FDA, CDC, and Pfizer people get paid a lot more money than most of us on this forum. They're probably smarter than most of us. So it's time to face reality and admit that they know all these statistics and it was planned. The United States is participating in and possibly the "king pin" of a massive genocide campaign. If you still are not convinced of this then why is the USA the only country on the planet using Remdesivir for patients admitted to ICU for Covid-19? This drug is so ineffective, has so many adverse side effects, and is so deadly that it has NEVER BEEN APPROVED for ANYTHING! This was a failed EBOLA virus drug but they didn't stop testing on people in AFRICA! Out of the other 3 drugs they were testing for Ebola, Remdesivir was the only drug that got pulled early due to liver failure and ineffectiveness. Now, of this is even necessary. Take Ivermectin once a week as a preventive and no one gets sick from Covid-19 or needs a vaccine.

I DO NOT CONSENT. My employer, Penn State Hershey just mandated the death shot. So. I was good enough enough to do all the surgeries on covid 'positive' patients and now, I'm a pariah. Or, I'm a liar. Or, I'm a spreader. Bullshit. I am not for all of eternity. Never never will I get ANY vaxx. Have had GB from a flu shot. So 24 years of a lifetime of service comes down to this. They can kiss my white privileged ass and look me in my wet eyes and fire me if exemption not granted. This is THE biggest crime against humanity ever. It is also MEDICAL RAPE.

Thanks for standing up to those bastards! It's happening all over, Association hospitals doing the same. I voluntarily resigned (that's what they tell me) when my RE was denied and most importantly I refused to get the nasal testing done every week in order to prove I'm healthy enough to come to work. I walked and happy! (lol. The last time I checked I was still living in the USA and I'm not putting up with their tyrannical ideology! I will keep up my nursing license just in case....Let's Go Brandon!

Susze2 - Stop strong! My oldest daughter is an air traffic controller (Federal government job). Actually I should say 'was' an air traffic controller. She was the only unvaccinated controller at her tower. Just over two weeks ago, she worked with another controller who tested positive for COVID they day after she worked with him. She was told she had to get tested, fill out all sorts of contact tracing paperwork, and attest to her vaccination status, she flat out said 'no'. She was told that if she did not follow the 'orders' she would be put on AWOL. She then told the tower manager that she was quitting, put her on two weeks of sick leave (she had plenty of sick leave) and then quit. Her manager could move to work on Friday, finish the paperwork, file the paperwork and process out. She said it was the best decision she ever made! She already has a job lined up as a golf teaching pro (she played college golf). My middle daughter is an aerospace engineer with a government contractor. Her religious exemption was just approved on Friday! My youngest daughter is in the second year of law school and will not get the jab. I told her to hurry up with school so she can be married!

Kids have been violated with a huge amount of Ritalin for the past 30 years, each year more shots and more over reach. The adults are feeling it now. When the kids were injured, some were too young to vote that government was behind. Adults will make their voices heard now in opposition. This ill mind is blowing increasing awareness that is desperately needed.

If there were more like you Soccer, this whole charade would be over long ago. We should remind ourselves and others that "mandate" does not mean "compulsion". Mandates require consent, they are not "law". So any company "mandating" something must be obliged to include that something in their terms and conditions of employment?

I am a Christian and many of my Christian friends have gotten the jab. I will not! I have seen their many posts of Dr Mc's articles and they say they don't have time to read them. Many of them just said oven not what YOU learn then they still got jabbed. So I now have distanced myself from them. I am blessed with many Christian friends who believe like me and are not jabbed. We are shocked, stunned and flabbergasted the others bought the lie! So we stick together and support and encouraged each other and pray for our country and friends who are jabbed!

I wouldn't call anyone a Christian that willingly accepts aborted fetus cells to be injected into them to protect them from a virus. If they believe in GOD they have no fear in viruses. I would call them all out.

Dr. Martin gives a motivating speech with specific names and details we need to pass on and spread to Fight the vaccination of children. He is also very entertaining beyond his opening song. A must see and share. Dr. Martin mentions and lists those responsible. We need this kind of specific information Thank you all! www.bitchute.com/.../2RVnA3PVHXw

What a scheme! There is nothing available that the government and the CDC and the drug companies want to offer you for this covid thing except an injection, in spite of all the known supplements that fortify your immune system, and all the other alternative medicines which are proven to alleviate the symptoms. But looking at all the inoculation options, nothing is available except unapproved (EUA only) shots. YET THERE IS NO EMERGENCY. In order for the authorities to even allow the release of this injection, let alone mandating it, there had to be an emergency. But the so-called pandemic was created by changing the way statistics were gathered, and by using the PCR test as a measurement tool, both of which were fabulous measures or else they couldn't have a reason for even granting an EUA.

So scientifically the EUA doesn't even merit use in this situation. So this is all fake. Don't fall for it. Don't take the jab, and join the Worldwide Walkout put on by Children's Health Defense created by Robert F Kennedy Jr. Regarding the worldwide walkout, my best recommendation is besides boycotting businesses and staying away from work yourself, swear to hop nothing in the way of Christmas gifts until the mandates for everything are removed. If we all could make a public declaration that Christmas is off, the businesses would start to listen.

Yes, stonehardor. KICKOFF IS NOVEMBER 3RD! In his short video, Robert F. Kennedy, Jr. CHD Board Chair and Lead Counsel called for everyone to participate in Worldwide Walkouts that kick off on November 3rd. He shared that "No government in history has ever surrendered power in the absence of a demand. We need to tell these governments and their friends in the technocracy the Silicon Valley billionaire boys club, the mainstream media, and the pharmaceutical industrial complex we will no longer tolerate their trampling of citizens' rights." The WORLDWIDE WALKOUTS are a call for a global shutdown to stop business as usual, protesting these unlawful mandates and to celebrate human rights.

"Coercive mandates of shoddily tested medical products and segregationist passports violate international human rights law," said CHD President and General Counsel Mary Holland. "We need brave citizens to peacefully refuse to comply with unlawful and unethical edicts that for the past year and a half have been allowed to trump individual rights and freedoms. These days are over. There will be no business as usual until segregationist and coercive medical policies advanced by government authorities end once and for all." childrenshealthdefense.org/child-health-topics/health-freedom/worldwid...

Stanley, I am prepared and will buy very little for a long time. (Except more a-n-o whenever I find it!) I try to buy local whenever possible, too. I shop a lot of second hand stores. There has been plenty of food this harvest season for people who plan ahead and preserve it. Not so much for people who think food only comes from a supermarket. What follows is for those who are unprepared. It may be too late for this year in some parts of the US. Plan ahead for next spring. You can still forage mushrooms in other places. There is still time to hunt and fish.

You can buy direct from farmers, watch craigslist for free, keep in touch with gardeners and hunters, shop farmer's markets, restaurant supply stores, roadside stands, U-Pick, forage, hunt, fish and grow your own garden, even if just an intensive vertical garden on a balcony and near a window. Do you save your own seed? Give a decent butchering knife and filet knife for Xmas? Have canning jars/lids or freezer containers? Own firearms and fishing equipment?

If you have never hunted before and have no experience with firearms, I recommend taking a hunter safety class and then, join a practice range. This also pays for archery. However, many people my age used to learn some of these skills in school plus ag classes and gain more experience hunting with family and friends. If there is anything you do not know how to do, join a group that supports that activity and tell them you want to learn and join others on trips who will teach you.

A good hunting knife that does not blister your hands and cuts meat easily is worth what it costs. You may also want to invest in the small cost of special gloves that will protect your hands from knife cuts. My husband bought me a new pair for only $1.99. Butcher paper may be in short supply in hunting season. (Alcoholic! free freezer) I allow wrapping meat in plastic, but it can be done. (Old bread bags, washed and cut down. Or paper bags over plastic wrap. Always double wrap

Many people go hungry because they do not eat the whole animal. Many hunters will give away organ meats. You can ask them to save these for you. (Maybe even send them plastic bags and/or containers and coolers to hold the organ meats?) Also, save up tongues (pickled?) from game meat, and maybe, ears/snouts (lower shank) to put in a kettle of beans. When butchering beef, you get a larger tongue and also maybe the tail which can be used in an old-soup recipes--excellent. I also make soup from neck meat. In a large animal, you can peel away the neck meat, roll and tie it like a roast. It will be tough, but very flavorful. Some cooking methods will help tenderize it better.

If you make potted liverwurst, you will not need casings. We usually get liver eaten up pretty fast in other recipes anymore, though. One of my favorite recipes that bachelors (who claim never to have liked liver) beg for is "creamed" liver stew topped with dumplings. I chunk and dust the liver first before frying enough to seal in the meat juices. I prefer a white sauce with veggies--veg. onions and peas. You can use a nondairy milk substitute, if you prefer.

Some game animal organ meats have as much as 3x the minerals of domestic meats--maybe a lot more nowadays if you refer to CAFO animals. Vital organs receive priority uptake on nutrients. Save bones and can bone broth. Use pork shank to make pickled pigs feet. I used to have a gallon or 2 in the refrig after butchering. This is the part that is mostly bone at the shank end of the ham (not the feet). We have not had pork in a long time, so I no longer make this. My idea of a gourmet breakfast is pickled pork with may-hard deviled eggs (peeled, covered with leftover beet pickle juice, cooled and refrigerated until prep), homemade rye bread with churned butter, homemade farmer cheese or homemade cottage cheese, and fresh tomato juice Reader pork fat to lard and freeze it in pint or smaller containers. There as needed.

For the past year or so I have been stocking up on extra food. Each week I add a few extra items while grocery shopping at our local health food store. The extra food is not always the most nutritious since it is usually in a can or jar but when it comes to starvation it will do quite well.

designer.. Most of my gift-giving will be baseless of food. It is a practical gift at this time and much appreciated when commercial food quality is so low. I have extra baskets so I call these pass-it-on-baskets and ask people to refill them with whatever it is they produce or create and give them to someone else. If not food, maybe soaps, knitted or crocheted dish cloths-pot holders-oven dish towels, maybe a sewn apron and carved wooden spoon. Or teas and nuts.

I bought a few seed books in excellent condition for friends with special interests. These will be very personalized gifts. Also second hand pieces of dishes to match sets people already have or are collecting. We cut holly, fir boughs, cones, wreaths. I do not feel a need to be extravagant and spend a lot. Here are things we can plan to do for the future. Things the unvaxxed, unemployed will need. Gone extra food. Meds. Leave already out firewood (cut it to prevent your liability) by a road or your property ready to haul for those who need it. Cut trees (to keep roads open?) where the wood will be easily accessible to vehicles.

Do not discard children's clothing, work clothing and shoes/boots just because they are not your size. Scraps of fabric, yarn and needles, etc.. You can always build extra beds from pallet wood? Extra blankets, sleeping bags, a folding cot in case you have extra people living with you or need blankets (or plastic sheeting) for insulation over windows or to seal off extra rooms to hold heat. I hang space blankets over large windows with stick pins--holes will not show in summer the reflective side is outward. Plan for simple heating methods to heat food and stay warm if power is out. It may be wise to have a recreational vehicle (trailer) or boat. These people may do better than those of us sitting ducks with permanent addresses? Your only address would be a "moving vehicle number"... somewhere off the coast, tied up in a quiet wilderness harbor? Or maybe a swamp in Louisiana

-continued- Know your land... even if it is just a nearby park or state land. Walk you property every season of the year and note changes in vegetation and water. Keep a journal. Pay special attention to wild food sources and herbs. Note topography and how it might be used. Identify forage, game trails and vegetational patterns. If there is a river or stream, see there fish and can you grow watercress in a stream bed? Look for honey bee hives. In addition to wild plant sources as food, list the diversity of wildlife.... possibly elk, deer, bear, wild turkeys, pheasant, doves, rabbits, grouse, etc.) If possible, set up a game camera--you prob have more animal species than you realize. Provide favorable habitat where you want to increase numbers. Beware of predators--coyotes, grizzlies, wolves, coyotes.

Walk city streets if you do not own rural land. Notice many older established neighborhoods have fruit trees. Owners and renters will often let you pick if you ask. Explore right-of-way areas for more food sources. Along rivers or streams, esp. for certain mushrooms species. Fence lines were birds poop or drop seed while eating (asparagus). Along railroad tracks where rail cars spill produce on the way to market. There will often be piles of grain or other foodstuffs along the edges of roads if trucks dump because they exceeded weight limits. Road corners where trucks hauling produce make sharp turns and part of their load spills over. (Tree pear, rice and my neighbors watched a particular corner and got our winter supply of potatoes by

Excuse me! Mary! Mary is making an argument on the wrong basis. While it is darned important to discuss the medical facts and FDA lies, there is Absolutely No Law in the Country that says Any President has the Legal or Constitutional Authority to Unilaterally Mandate...Anything. Let alone a mandate which violates bodily autonomy, coerced by threats in action of losing one's home, job, food security. Since When does the President of the USA have the power to threaten, bribe, coerce, rob? And Since When does he have the power to Unilaterally...Do Anything At All? Let Alone Mandate Anything? Hello? By overlooking this fundamental point, what are we Americans asking for? I do not look forward to the answer, in any way, neither do I one bit approve.

The President of the United States does not have the job title of dictator. He has the power of Executive in Chief, with a system of checks and balances to put a check on power run amok. Is this what is happening? We all know the answer. Money has purchased politics and unethical politicians have put themselves into the position of a rubber stamp instead of as a system of checks and balances. This is unconstitutional and must be called out, and fought. We Pay our Taxes! And We, the People most certainly Do Not pay our taxes to fund our own abuse!

Medical freedom has been stolen from us. Mirandola, under the guise of this 'deadly deadly' virus that we know is only deadly at the hands of Fauci and Gates and the WHO mistreating, misguiding, causing death and disability. It's a HORROR and a total CRIME AGAINST HUMANITY what they are doing. When I brought up this experimental mRNA shot - people told me NO, it's not experimental. Um - okay, talking to the intelligent folks in the back row apparently. And apparently its okay if people died BECAUSE SO MANY MORE LIVES ARE BEING SAVED ... really? I'm not thinking that's true. But whatever.

Money HAS purchased politics from the highest echelon down and practically all the media (hence the censoring) ... Gates wouldn't control Fauci and the WHO, Fauci controlling Biden as well. He has to be between the WHO the UN, and Biden - the puppeteer has to be Gates with the owners of the world looking on approvingly. That's what all that money buys. Death in a shiny cloak saying, Do this and you might live a lesser case, you might not die, you might not be hospitalized.... of course you might not have anyways since the dang shot doesn't work!

Lowestnoing, I agree with you on all counts. However, I am concerned that where mandates occur from the President himself, it is much more than health freedom alone that is at stake. It is freedom, sum total. Further, whenever someone is a puppet I do not excuse them for their role and for playing it. They choose that role, and they choose their actions. I hold people responsible. God bless, and be well.

But the people have funded their own abuse, the 'vaccine' (mRNA shot) is a tool battle. The battle now is to stop boosters! I think, if people accept it as normal to have regular boosters, then all is lost. Power grabs don't answer to reason and fairness, they enforce because they can. Those who are aware are saying this unfold rapidly. Look at the number of people in China that have most aspects of their lives restricted and controlled by the party!

It is disgusting how the US government is actively trying to instigate everybody's fear and anxiety and anger toward the unvaccinated. And actively trying to blame this entire ordeal on the unvaccinated as if they had anything to do with it whatsoever. I think people buy into this because it is convenient. It is important to ignore such idiocy and realize these people are being fed into this and manipulated and many are gullible enough to believe it. And again, why do the protected need to be protected from the unprotected by forcing the unprotected to use the protection that didn't protect the protected in the first place? at the same time it is hilarious that some people actually believe that their vaccine won't work unless you get one too WTF lol

Thought's continue to mere go round in my head and I wonder what can be done. I donate to CHD but even all Mr Kennedys' efforts are directed at a corrupt government for resolution. I then think of the Constitution and what was intended. There were no provisions that said "take it to court". When the government needs reporting it is up to the people because the court is actually part of the problem. Our state needs the whole mess. So, what would the founding "fathers" (guess thats a word not accepted in todays world) recommend? When the ruling class is that day was no longer acceptable, they were flushed and sent back to buy hats for the queen.

Thanks. Lacey. Covid test swabs have been found to contain alarming levels of ethylene oxide, a toxic gas used to sterilize medical equipment. Apparently every time someone is swabbed for COVID, they are given a chemical that causes cancer. In particular, covid vaccines contain protein nanoparticles that destroy the immune system, allowing cancerous tumors to rapidly accelerate throughout the body. Thus, hypocp appears to work in conjunction with vaccines to create a 'cancer pandemic'. Cancer deaths deputed to really insane levels in the next three years. A health union has called for the covid swabs to be suspended due to the toxic chemical they contain. cyprus-mail.com/2021/10/26/union-calls-for-suspension-of-rapid-testing... (October 26, 2021)

@Guillermus, I'm not sure this is as bad as people think. I have read that the ethylene oxide evaporates and is no longer potent at some point. Also, if they're using it to sterilize medical equipment, some of which is probably being used for surgery etc., then it hasn't been considered a serious issue for these other uses. I could be wrong, but I think this is the least of our worries at present.

Has anyone looked up this drug? Triamterene. An official drug info website includes the statement that this drug must be administered intravenously or tissue damage could occur. So isn't that opposite to the Pfizer requirement for intramuscular injection? That's why they stick the needle into a large muscle, on the grounds that there aren't big blood vessels in it. However, as Dr John Campbell, retired medical educator, pointed out, there are smaller blood vessels that feed into the muscle. He had taught nurses to pull the plunger back slightly to ensure the needle was not inserted into a vein, before injecting. This safe administration method is being ignored overall as the mass campaign continues. But might accidental i.v. administration be a factor in the number of myocarditis cases? Does anyone have any idea what this supposed stabilizer Triamterene will actually do in the body when intentionally injected into a muscle? The soothing reports say it must be OK because they are 'rife' in other vaccines. But are those experimental as well?

One has to take hats off to the Hasidic community of NYC for their in-depth pursuit of information from the top independent scientists. However, asking around, many people dismiss this as just a bunch of ultra-conservative religious fanatics who put their religion ahead of everyone else. Politicizing enables those who want to dismiss them to continue to ignore the warnings of the scientists who were consulted. You can see the actual rabbinic ruling on Rerui Law (dot com), as well as how the scientists speak, video can be accessed in segments depending on the presenter. Robert Malone's information is particularly relevant and delivered with his customary scientific balance and some details I have not seen him mention elsewhere.

Further, the rabbis also considered the reports of injuries from within their community, elders who died, etc., as part of the entire picture they were considering. The decision is dated 26th of Marcheshvan, 5782. Not the common eve dating system but from their ancient traditions which they faithfully upheld for all those millennia. The decision does specify that members of their community must oppose the injection of children and stop it -- if they have the authority to act.

If you were to ask the average person who willingly got one of these 'vaccines' how much research they did beforehand, my guess is that it would be none. Yet, there is no informed consent, no risk-benefit analysis, no risk stratification, no published animal studies, no external advisory committee, no data safety monitoring board, no human ethics committee, & the acute, sub-acute, and long-term effects are completely unknown. Would any of these same people buy a car with this same degree of efficiency/insufficiency/inadequacies? I think not. The brainwashing is so complete, that even when this is pointed out to them, they still believe they made a wise decision.

...AND, no maternal safety data sheet (MSDS). This is where it's going to get fun for me. I will entertain the idea of going to the doctor's office for my bloodwork at I'll ask for an MSDS sheet for the vaccine. When they don't provide me with an MSDS sheet I will file a lawsuit. I plan to do this at very many clinics. I will also notify OSHA. OSHA is who enforces the MSDS documentation. All chemicals stored at a facility MUST have an MSDS sheet that list all the ingredients, their potential hazards, and side effects. If they can't provide you with that they are breaking the law!

Then there's the heartburn over vaccine passports. They have the wool pulled over everyone's eyes. These passports have nothing to do with being able to prove your vaccination status. Proof of vaccination with an experimental vaccine that does not have FDA approval EXEMPTS your insurance company from paying anything out for your adverse induced injuries and medical bills. By documenting everyone with a covid-19 jab the insurance companies can now deny you of payment. Then the clinics/hospitals/doctors can deny you services unless you are rich and can pay cash.

the article says "we're living in a clown world", no, i would say we're living in a world largely controlled and run by satanists, who are doing the bidding of their master, who wants to rule the world and force everyone to worship him instead of God. Unfortunately few people are spiritually focused, and don't see the spiritual world that influences the natural world, and thus, they are subject to it. You can only fight spirit with Spirit.

Thanks Martin. Yes, on September 23, 2021, the four UK Chief Medical Officers (CMOs) advised the UK government to offer the Pfizer Covid-19 vaccine to all children over the age of twelve. This was despite the fact that the Joint Committee on Vaccination and Immunisation previously stated that it could not support universal vaccination of children.

The truth is that deaths among children have since increased by 62% compared to the five-year average. There is absolutely no justification for giving an experimental Covid-19 vaccine to children, and the excuse used by Chris Whitty that it can "help prevent classroom outbreaks and more disruptions in education this winter" is outrageous because they don't prevent infection or transmission, even the UK government and Oxford University have admitted this in recently published scientific studies. theexpose.uk/2021/09/13/three-studies-find-that-covid-19-vaccines-do-no... – theexpose.uk/2021/10/28/child-deaths-62-percent-higher-since-covid-19-...

"But something kind of evil happened, which was many cities began vaccinating 12- to 15-year-olds in the absence of parental permission. So, a child could show up with their friends or a friend's mother at a vaccine center and get vaccinated with no one asking about their medical history, nobody calling the parents. No notice go ahead and do the child's medical record that they were vaccinated." This is REALLY DANGEROUS. Other people don't know the child's medical history and whether or not the shot would be dangerous for the child for that reason. And it would not be impossible a child could get shot twice or three times. And the parents are still legally liable. They have to care for the injured child and pay all the medical bills, and may not even know why the child developed the medical condition.

Why have these mRNA gene therapeutics not been pulled off the market after at least 100 deaths, let alone the thousands of health injuries? Is the answer because of the massive profits? Or, IMHO, is it because the evil, greedy, power hungry Commie/Globalist elites are running the Head Commie Brandon Administration, and they will do ANYTHING to achieve their goals of their running the world... a goal which they have spent hundreds of millions of dollars over the last 10 years to achieve, and which they have been at for the past 100 years. EHGs, IMHO, fraud megalomaniac psycopath Fauci/CinCoons gain of function virus was biowarfare #1, and their experimental mRNA Chinese Bioweapons shot virus are biowarfare #2.

Nothing also would explain how a "vaccine" that's caused so many deaths (with more horrors to come) is not only condoned by the traitors currently in power, but we have been inundated with propaganda, even lies, 24/7, pushed, threatened, coerced, shamed, bribed, and now they are pulling out all of the stops, illegally mandating employers do what, apparently, they cannot do EVERYONE (when they don't need it, like those that recovered from the Fauci/CinCoon virus, and healthy kids/adults) jabbed ASAP.

Why? Profit is part of it, but as you imply, there is more. Depopulation via mass death? Depopulation via mass sterility? Low enough levels of death and sterilization that this round of jabs can avoid waking up the sheeple, but set the stage for subsequent mass culling? No culling intended, just a tool towards a power grab and control of the population through technological means? If nefarious intent is behind it, are all those driving this disaster motivated by evil, greed, and lust for power? Or do some actually believe the world is on a path towards destruction and such means must be employed because the public, on their own, would never go along with the remedies that must be implemented to save us? Who knows? Whatever the motive, it's clear that we need to intervene to put some of the power players on the rack and see what they say. Even then, such testimony is suspect. We need more truly wise. We just know we have to fight them.

Bye Bye Miss American Pie...The music died years ago, and now comedy. Comedy was once the realm of the court jesters and kings's fools who cleverly poked fun at those in "high" places. Now as seen across late night TV and Saturday Night live, comics jabs and punch down at non-compliants, Trumpsters and any non-woke/non-dem party citizen. Nobody watches these propaganda/ lards anymore, they are not funny.

Last night SNL attacked Aaron Rodgers and Vic Gao. "Youngkin and the only laugh I got was how pathetic these woke Yassers Ass. I get another laugh when the CEO of American airlines was the authoritarian network interview on mass flight cancellations blaming high winds.... and yet another when fellow billionaire CEO of Pfizer vouched for the safety and effectiveness of their vaxxx for zip. nils. In fact every neural of monopoly bullshit gets spun in their favor.

It was years before comics poked fun at Bush/Cheney fake wars, and only took flyers for the Russia-Gate hoax to unwind and 1/6 is hardly being seen as another FBI stage show. Many years elapse before high crimes are exposed and live public ridicule and even then prosecution of these monopoly players never occurs. Government lies are never given cover and so the next "spin cycle" either deep combs lies like JFK, 9/11, WMDs and weaponized covid never die. Bold statements on network news are ALWAYS to be taken as the exact opposite of truth.

Yes, Randall, monopolies are the big problem because they play revolving doors with governments and impose tyranny they impose a self-destruction system. But the people have not consciously chosen to be under the yoke of the tyrants, they have a moral responsibility to break the bond of submission established with the despot. It is the historical tradition of the billionaire families who run Davos and the new world order, through the control of the world's financial systems, the absorption of all monopolies and companies and ultimately all private property. The tyranny imposed on the world creating this "pandemic" and developing the draconian measures, which have constituted the ideal scenario to deliver the final coup de grace to the world economy.

We cannot let tyranny dominate us. We are with the doctors and scientists who defend health, who defend freedom, who provide us with valuable information, with great value and dedication for the defense of the rights and freedoms of people. We must fight irrational fears as a means of discipline and domination. BigPharma, BigMedia, and all major corporations, institutions, and philanthropists are openly censoring dissenting views on the virus, particularly its origin and treatment. Even praised doctors and scientists have been censured and fired for speaking out against the devised narrative dictated by BigPharma, the WHO and their powerful allies. They are the modern dictators or so-called "philanthropists" who deliberately feed this fear to satisfy their lust for power and discipline and to dominate the people. In this work they are of the devil and not the work of Creation, which wants a true democracy that defends its citizens. We do not want the Great Reset to be the greatest dictatorship in history, we do not want transhumanism, because it represents fascism on a much larger scale than the entire history of dictators.

Randall, these procedures should be used to save lives and not hospital death protocols. One of the biggest problems seen so far regarding the Wuhan coronavirus "vaccines" is the fact that they cause severe blood clotting and "clumping" in some people. The good news is that there is a way to combat this cardiovascular damage through some therapy. Dr Thomas E. Levy, MD, JD, recently published an article in the Orthomolecular Medicine News Service (OMNS) that explains how ozone treatments can "cancel out the spike protein" introduced by jabs.

Under conditions of inflammation and systemically increased oxidation stress, red blood cells can aggregate to varying degrees, sometimes sticking together like stacks of coins with ramifications from the clumps seen when adherence is greatest. "Lucy writes: "This is known as rouleaux. de rouleaux of red blood cells. When this formation of rouleaux is pronounced, there is an increase in the viscosity (thickness) of the blood and a greater resistance to the normal and unhindered flow of the blood, especially in the microcirculation." orthomolecular.org/...n11n24.shtml (October 18, 2021)

Gui, I agree w Dr. Levy. Yes oxidative stress is a lack of electrons/voltage with many causes...O3, NMG chlorite and H2O2 do their oxidative electron-snatching duty by destroying pathogens and garbage followed by redox signals and increased antioxidant production...Blood viscosity is due to too charge RBCs unable to repel each other AND Dr. Pollack's H2O water findings of charged water where Light/Heat/Sound energize it vacuoling for sunshine/music and Gaura as therapeutic. The value of NAC is finally emerging following FDA (backward) warnings.

Generations have been brainwashed into becoming dependents on the Evil-Dog monopolies negative campaigns to dismiss real science and inexpensive cures that restore health/vital test symptoms, and destroy competition and understanding....So depression is rampant among the helpless and confused; a state of low neural voltage where mega Cartoniodeals, breathing, exercises should apply. Lamentably, I am expecting using H2O2 alternating with NAC orally and on fast acting nebulization. NAC encourages glutathione production to power cells, increase O2 delivery, thin mucus, enhance cilia, prevent oxidative inflammation, reduce HR1 related angiogenesis and generally restore lung function. There are all redox based practices the media will bury deeper than CIA/Mossad operations, need yourself forbidden...been says.

"The government currently is planning for mobile vaccination clinics for kids and vaccinations in schools, and they may take this group one of vaccinating without parental consent down to the 9- to 11-year-olds ... They've already been doing this in BC. They're setting up clinics in schools, on campgrounds, beaches and anywhere else they can "trap people and COERCE them into taking the shot. Does this look like something that's going to go away anytime soon? When will we get the data from those trials? It turns out that in the agreements reached between Pfizer and the FDA, some of those trials won't conclude until 2024, 2025 and 2027.

The goal here is to vaccinate all Americans, children and adults, within the coming few months or a year, yet it'll be five years before we actually know from clinical trials what the side effects may be? Pure evil has taken over this society and anyone who can't see it, is totally oblivious - or evil, theremember! Of course, evil knows that it's evil - it just doesn't care! I would strongly suggest that people wake up, now - before they're put to sleep permanently! Yes, face to face of death, but death by Big Pharma, is definitely not in my plans.

Yes, Randy, an insult to intelligence what is happening with the "vaccines". The Emergency Use Authorization (EUA) is a corrupt mechanism to facilitate the disposal of medicines, including vaccines, during "emergencies". According to an EUA, the FDA can allow the use of unapproved medical products, which makes all weapons available to the Pharmaceutical Mafia for "vaccines" whose long-term side effects are unknown but hospital administrators are already being recruited. for such genetic weapons, including cancers.

We know that there are alternatives but BigPharma corruption by main objective is "vaccines" even though many side effects are not known and of course throughout a pandemic life. It is being reported to damage DNA, depress the immune system, and cause hyperinflammation (MIS) and an increase in all kinds of diseases, including cancer.

And more "vaccines". Everest Medicines Ltd., a Chinese biopharmaceutical firm, is set to license the COVID-19 mRNA vaccine from Providence Therapeutics Holdings Inc. of Canada as it tries to bring the most effective innovation platform to China. Everest will obtain the rights to the vaccine in Greater China and other nearby countries, including Indonesia, Singapore and Thailand. It will pay $ 100 million in cash up-front for access to vaccines and technology and up to $ 100 million in profit sharing. Another payment of up to $ 200 in stock is also in the contract if more products are developed using the mRNA technology platform. More diseases and more deaths.

All must be vaxxed so when 40% are dead there will be no control grp. to prove the genocide. Fully Vaccinated does not just refer to individuals. It now means fully everyone in the world. These groups must be tried and sentenced for their war crimes against humanity and the only way is to have no more vaxxed. They will prove the proof the mass killings by their mere existence. The surviving Vaxxed will have all same alleles that tested taken from their sal... yet.

with all due respect to Dr Nass's efforts (in cooperation with the Children's Health Defense) I am left feeling that while their intentions are truly positive their results are limited – it's all very well to constantly reiterate the litany of negatives surrounding the conspiracy to inflict harmful procedures onto an unsuspecting public – or to conduct a program of enlightened education aimed at limiting social accepttibility to the propaganda based campaign to humiliate the public for FINANCIAL GAIN so even worse to maliciously endanger the health of the public on behalf of aforementioned social theories that advocate population reduction as a principal of human kindness – this must be seen in the annals of human historical narrative as being " BEYOND BELIEF"

the dice is so loaded against the major portion of humanity by the cracked impulses of social deviants that a solution the urgent crisis seems to have become separated by the lack of comprehension that Dr Nass has indicated in this article – can we right the ship? – has the boat taken on too much water? – if so we are sinking fast – the SACRIFICE of our newborns is in the pipeline – do we offer a million years of evolution can simply to SAVE OUR SOULS – the dice is loaded ! look at the list of treatises provided to protect us from EVIL and Bind them ever ingenious and gullible our VICTIMHOOD transparently reveals itself! – we are nothing other than fodder for the algorithical appetite – the oligarchs are out of control as they embark on SADISTIC activities beyond all previous precedents ! like Auschwitz for instance! – platitudes like "we are more numerous" mean nothing as dice stated " words mean anything I say that means, this whose is power that counts" –Orwell says the same thing in his proposition concerning the inversion of human values – please listen to this Dylan song CHANGES! – listen to the words and TAKE NEED ! – www.youtube.com/watch ~

Yes, Stan, the domination imposed by the Pharmaceutical Mafia and the globalist elites has built an authoritarian government that violates civil and constitutional rights to impose its will, and you are not interested in the opinion of many scientists and doctors who are opposing the mandatory of the "vaccines", he is not interested in the benefits. Although there may be spreds of hope. FIFTH CIRCUIT COURT OF APPEALS ESSES EMERGENCY HALT TO BIDEN'S UNCONSTITUTIONAL VACCINE MANDATE. www.theepochtimes.com/fifth-circuit-court-blocks-biden-administrations-prea...(November 6, 2021)

The oligarchy does not understand rights and freedoms. They are the elites who see democracy as an enemy they believe that the people should be managed, not represented. Now is entering the destruction of humanity, it is being commanded by the Davos meetings. Photo write that the oligarchy is a government of "greedy men" who love both money and power. The oligarchs believe that the wealth of a society should be redistributed among themselves and their allies, while the rest of society is reduced to poverty. It seems that Davos elites have now been established in the Great Reset.

This is part of the reality because of the "vaccine" mandates: Emergency rooms in the United States are filling with people suffering from significant health problems caused by the "vaccines." Unlike during the height of the "pandemic", before hospitals were empty and lifeless. Patients come to the emergency room sicker than before the pandemic, their illnesses are more advanced, and they need more complicated care. Mainstream media outlets are blaming anti-vaxxers who pose a threat to the nation during the lesser scam to avoid catching the blame for the deaths caused by the "vaccines." An MIP report even claimed that COVID patients are not the problem, but people who have not gotten their shots even though 80% of Americans have been "vaccinated." hospitals are still overloaded. But the governor says they are those pesky 'unvaccinated' people who fill hospitals. www.infowars.com/headline-news/ny-ers-overrun-with-people-suffering-f...(November 3rd, 2021)

In 1st, your statement concerning the oligarchs [I quote] – " They are the elites who see democracy as an enemy they believe that the people should be managed, not represented " – says it all – this is their view and present INTENTION – the danger to our species is at the level of a SURVIVAL EMERGENCY – this is what I wish to convey in my post – no more vile chatter will alleviate this perilous situation – ACT NOW OR THE CONSEQUENCES WILL BE HUMAN EXTINCTION – is there anything more serious than this ?? – here's some more from the Nobel Prize of Literature recipient – www.youtube.com/watch ~~ and here is Sam Cooke's "Change is Gonna Come" for further inspiration ~~ www.youtube.com/watch

What would you do? One problem is that North Americans have a weakness for resisting authority that is not found in many countries. Unless this resistance comes to fruition we will all be hoodwinked and sink with the badly performed ship.

I do not understand how a medical treatment can be forced on anyone just because it has been "approved" by FDA?

Strange is it not? Historically, in pandemics, people dropped like flies, excess deaths, "bring out your dead" etc. But what really strikes me is that historically there is a ratio of affliction whereby there would be an equal percentage of death or injury across ALL CLASSES of the population. Even anyone know of any politician, any high ranking individual, any WHO member, any UN member, any WEF member etc. who has died from covid? I may be wrong, but seems to me that the ratio is a bit skew whiff.

"There's many, many more of us than there are of them." I disagree. There are more of us than there are of those orchestrating the madness, no doubt about that. But that's like saying the allies had more soldiers than there were individuals in the Axis decision-making hierarchy. What counts is how many of us, and how many of them, including their followers. Call voted 60% to keep Newsome. Michigan's Whitmer gets high approval numbers. Most in New Jersey voted for Murphy. NYC would never vote for a freedom and dignity candidate no matter how absurd they are. There are more of them than us.

"The question is, whose bullies get tested? In the past, sometimes the bullies that got tested were foster children, wards of the state. Sometimes parents offer up their children. But there will be clinical trials." Who protects foster children from being used as pharma's experimental subjects?

Dr Nass says " we have a world wide program designed to control us. And once we figure it out, ..." Well we have figured it out! It's to set us up for The Great Reset, New World Order, etc. The plan is to inject us to depopulate the billions who are alive. Then to trace us, make us a cashless society by digitalizing us, get of the banks and continue freeing us out wealth to the elite, aka THE WORLD ECONOMIC FORUM (Gates, Big Tech, Big Pharma, etc.) Read both Dr. Mercola's book and Dr. Peter Breggin "COVID-19 and The Global Predators, We Are The Prey".

I tried to scan the comments to see if this has been said, but this may be lost in the volume as well. Pfizer charged the formulation by adding TBS, supposedly to permit a 10-week stability for office refrigerator. TBS is indeed familiar in the lab, and usually mixed with SDS, but this addition is not stated, perhaps as it is more familiar as a chelating agent, with some known safety concerns. So, to have a major component change, not present in the tens of thousands of the clinical trials, is disturbing as look at one hand and ignore the other. Academic credential do not protect from slight of hand.

But, even before they pulled this switch, the problem is that the PVdf(Polyvinylidene) (PEG) safety was not clearly established. PEG happens to be made from the building block of formaldehyde, and formaldehyde sensitivity is a know problem, back when ones formaldehyde foam insulation was being promoted and then appearing with the sick building syndrome of the FEMA trailers after Katrina. I have not seen mention the caution of using PEG mRNA vaccines for those known to be sensitive to formaldehyde. Formaldehyde is not a known ingredient, but it may well be a contaminant, if they would disclose how the PEG coating for the mRNA was derived.

Actually I was digging around on the net on Pfizer media connections trying to figure things out. I had read an article from Norway about how a bunch of fully vaccinated elderly died of Covid. All the elderly had been fully vaxxed with Pfizer's. Why were US media silent on Pfizer vaccine deaths? The article went on to question "Why are they not reporting this news story in the United States?" Good question. My guess around. Turns out that the cause is one of Pfizer's Directors of the Board. Jim Smith. Full name James C. Smith is currently employed as one of Pfizer's Directors. He was also the CEO of REUTERS. He was in charge of Reuters after the merger after which Reuters bought out over 220 smaller companies. So it is a media monopoly.

Jim Smith Pfizer Director and Former CEO of Reuters So MM has 5 backwards. Pfizer and Reuters should be prosecuted for monopoly and Anti Trust in the context of a monopoly. Jim Smith is a free speech and free press using threats, coercion, bribes, and false accusations. The other problem I found while digging around about Pfizer is another one of their Directors—Scott Gottlieb. Scott Gottlieb: Pfizer Director and 23rd Commissioner of the FDA. Obviously this is how Pfizer keeps getting away with stuff they shouldn't be allowed to get away with in the FDA. There should be a law stating that someone who is a Commissioner for the FDA should not be allowed to be a Director for a Pharmaceutical Company. And perhaps there is such a law under Anti Trust statutes. Not sure. Makes me wonder who from the MM works for Pfizer.

ESECALLUM, I too noted the Norway report after the initial start of vaccinations, prioritizing the elderly only to a high percentage of deaths within days. I subscribed to Norway Today and get their daily items, but it appeared that their initial reports have disappeared, and there was no significant follow-up. That may have been an important early clue ... which has been obfuscated, rather than carefully investigated.

PRACTICING MEDICINE WITHOUT A LICENSE. Employers or anyone who is forcing you get a jab are PRACTICING MEDICINE WITHOUT A LICENSE, you can sue them into oblivion. Anyone harmed by a person practicing medicine without a license may sue for damages in civil court. Again, laws vary by state, but as a general proposition, a person practicing medicine without a license will be liable for just about any foreseeable injury that results from the misconduct. The lack of a license will raise a presumption that the care was negligent. In the context of a medical malpractice case, it can be powerful proof of medical negligence (by an individual or by a health care facility) if a once-licensed health care provider was in fact not credentialed to practice medicine at the time the patient was treated.

Finally, if a person is knowingly practicing medicine without a license, and a "patient" is injured as a result, that can be enough to justify punitive damages. A judge and jury might find that the unauthorized practice was so offensive that the law should force them to compensate the victim not just for the actual harm caused, but also to pay additional penalties for intentionally deceiving the victim. This is akin to what might happen in a civil fraud case. Legal Options for Victims>

Continuity is simply the brand name of the current Pfizer BNT experimental vaccine that used the same trial data for approval. It is an interesting legal point as to whether the FDA in licensing Continuity has not at the same time licensed the same experimental BNT one opening Pfizer up to legal liability - surely legal liability cannot be based on a brand name rather than the code under which the product is approved

In fact, we may see clinics popping up that don't require informed consent in the 5- to 11-year-old group. Let me just mention that the chief medical officer in Canada's British Columbia said they have brought laws that allow children of any age to consent for themselves. Think about that. A baby can consent for vaccinations for itself. It would be funny if it wasn't so diabolical." All of this goes against the most basic concept of medical ethics, which is informed consent. No one has the right to perform a medical procedure on you without your consent, or the consent of a legal guardian. The government, again, without establishing any new laws, is simply BYPASSING THE LEGAL SYSTEM! (emphasis mine)

First question: where the informal HELL is are the parents?! Everyone who has a child in a public school, pick one week and keep your kids home from school. Go in a waves in each cross-section of the state unless there's a vaxx-mandated in-person jab on the same week. I'm talking EVERY STUDENT. Logistics may be difficult, but nobody said life was easy and I guess this is the price people pay for thinking they've done their duty to keep this country free by voting every 4 years. I will be completely ashamed of people if parents do nothing and allow these freaks of nature to endanger their children.

Wow it's only 6:30 Am where I live and already there's 152 comments! How this newsletter has grown in circulation. DO NOT allow any children you know to receive the jab. There are concerns that sterilization will take place especially in girls where some are saying that eggs will be destroyed. Destroyed. No way ever to manufacture more for a female. And then we look forward to women as young as early 20's to go through menopause. People inform friends with small children...shake them with your words. What a travesty this is will be, it will be because there are too many terrorists.

Here's what my thought has been on this "mandate". Children have been snatched from their parents under excuse of neglect for not being vaccinated. But why can't that also work in reverse? Kids go to school, come home vaccinated, see the school and everyone in it, see the school board and everyone in it, and continue on to Biden's old freaky ex. Sue them for what? Child endangerment, child abuse, and if, Good forbid, a someone's child gets a sick, murder, manslaughter whatever charges could potentially stick, at least long enough to get the public upset enough to actually MOVE. I mean, assuming that's possible. Lately, it seems like some kids would be better off on their own than with their parents.

Someone in this post quoted an incidence of narcissism at 1% of the population. As the daughter of a narcissist who has studied and experienced personality disorders for decades, I can tell you the actual number is much, much higher. It is a biological phenomenon, and the incidence is increasing with genetic damage caused by toxins, bad food, nutrient deficiencies, infections, abuse and more. It is many times more common than it was when I was young. I would go so far as to call its rise exponential and massively underdiagnosed. And yes, people with personality disorders, which includes sociopaths and psychopaths, are disproportionately represented in all positions of power: politicians, billionaires, businessmen, clergy, law enforcement, media, etc. Until we, as humans seeking health and well being, learn to recognize that such people cannot be allowed to be in positions of societal power, we will be at their mercy. This has been the case throughout human history but now the stakes are our very survival as a species.

As for being able to force a vaccine, they absolutely can do it indirectly. I acquired a rare, progressive bone disease from corticosteroids for which I now require pain medication. My bones are literally crumbling. I also require iron infusions. I know the day is coming when they will be able to force me to get vaccinated in order to access health care. I am in that very small minority of chronically ill genetically damaged people who will either die from the vaccine or be permanently maimed by it. I expect to have a short-term future. I will either get Covid one of these days from having to present in person to get my pain medication or iron infusions, or my government will kill me through forcing vaccination by barring me from the medical care I need to live.

One could argue that there is greater safety concern taken by authorities on all other consumer available products than vaccines. I suspect animal products do better than us. I would not be surprised if been given to alone us in concern.

"I have had enough of this sh**" www.youtube.com/watch All few men must draw a line in the sand that they will not cross. Then, what next? Many resisters have only restrained themselves out of respect for their fellow man. However, that all changes once ones self and family are attacked... The only other thing that has delayed a final confrontation is that those with foresight are quite self-reliant and prepared for an extended period of lockdown. They have already pretty much withdrawn from society, formed their networks, built a subsistence lifestyle and are no longer dependent on the benevolence of gov't.

People are not stupid--they know this. "If you have to be persuaded, reminded, pressured, tied to, incentivized, coerced, bullied, socially shamed, guilt-tripped, threatened, punished and criminalized... if all of this is considered necessary to gain your compliance - you can be absolutely certain that what you are being asked to do is not in your best interest."

That's funny you should say that, I drew the line in the sand yesterday when being attacked. I was blown away - we're 19 months into this, I'm STILL there, you're jabbed, you're fine. Where both fear. After two known exposures I'm STILL fine. Can I ask ask - if you are exposed to someone who will develop covid within 24-48 hours, are they contagious? Which goes back to type 1 blood, good immune system, but I didn't even let a bump in the road with those two exposures. If anything, something got me good last week, I had sharp pains in the glands on my neck and developed a cold sore - but I took all my stuff as usual and over the night my body handled it. [...]

I see what you are saying ... but they seriously think that, until everyone is vaccinated, this won't end. They think there are NO cures outside of the jab (that's right - MSM says jab is the only way) ... it's just too gruesome, the violation of my right to make my own decision was equaled with reckless driving - and unfortunately, I was in the car that was being recklessly driven because "I didn't give a damn," apparently.

People ARE stupid though - I can't believe MSM - I was seriously told yesterday that covid is resident at how it attacks and I could die, or I could spread it to others and kill them. So almost twenty months into this, the only change I've seen is that it's getting more violent. Let's all run up, mask up and stay six feet a part FOREVER. The new norm, which Fauci and Gates release death on the world. Good job guys. I'm feeling pretty crushed right now... for those who bought into the narrative, we are the enemy. If someone is seeing something different, how did you get there with them?

Earlier today I signed in and posted a rather simple comment about the mandates. I feel my comment was relevant and very important. I did get the immediate reply that it would be reviewed before being posted. I've been checking all day because I'm interested in replies to my post, and it has yet to be posted. I do see multiple posts by someone that are very critical of the mandates. Why are they allowed and why are important they don't all address the mandates. Will I receive a message if it's decided not to post my comment or does it take longer than I expected?

How many people of the world now are subject to Bill Gates obsessions? Are we all supposed to hide behind computers 24/7 and get vaccinated every month and wear masks behind our pasty faces and condition ourselves to believe that any flesh human contact is unsafe and unclean and to be avoided like the plague that we are now apparently living in 24/7?

Good day all. When I saw the word GOTTLIEB - my blood ran cold. That is NOT that common a German name (God Love) - and one of the NOTORIOUS Shutz Staffe (SS) 'doktors' who escaped Nuremberg, was brought in under the OSS (now CIA) "Paperclip". Gottlieb worked hand-and-inside the Ketemiagen (death camps) - as bad or worse than Mengele. Gottlieb went to work under the OSS/CIA continuing his inhuman 'research'. So 'Scott' Gottlieb a child or relation to this SS monster who escaped the Nuremberg noose? Gottlieb's 'specialty was diseases and human mutations/DNA. Gotta love the CIA (cold war) ... Dear God!!! I am too afraid to look. If someone else would like to research that - I would be much obliged.

gawd'233, I appreciate the link. I don't know, if or how, closely I am being followed, but it appears that censorship here has changed. Previously, it was possible to look into a profile, and see that comment was posted even if it was removed. That is no longer the case. If you post your comment to remain, you have to be careful when using "the J word". At least, Dr Mercola's moderators aren't fanatical and I am aware of prior censorship. However, there is a chance that he is being pressured by "Jo." That doesn't excuse the behavior.

There is enough poison in the lethal injections without the mRNA tech. mRNA would be too dangerous, anyway. Moreover, nobody has proven that it is in the kill shots. Flu talk, gaslighting, and medical opposition spreading the "news" of the mRNA shot. Some of the parasites, gracefully included in the vials are even contagious!

Should it really be called "conflict of interest" in an environment of institutionalized corruption? A more accurate way to view it might be "situation normal" in a fully corrupted system. Hilarious side note: People are complaining Southern Attorneys General are 'making health decisions in the workplace', of course they're not, but those same people think it's fine for the Brandon Administration and OSHA clerks (probably younger than our grandkids) to make those health decisions. Yum!

Again, it's experimental, it's NOT needed, does anyone need to be more vaccination as part of their admission policy. I don't know how much longer people will be allowed to turn round, but climbing sweep used to be an option. Well workers are still in demand, but you may not be able to bend if unsoaked in the future. People will sacrifice a lot to take care of their homes. There is good money in home showing if you are in the right location. Unbonded home child care (babysitting). If you have a bit of land, a large family for labor and a few years start-up time, there is demand for signed trees in forested areas being logged. You will need to sell seedlings in lots of 250. Each buyer will want thousands. Labor intense. continued

Every talks about VAERS but have you checked out the WHO reporting system? http://www.vigiaccess.org/ I wrote down 2 pages of symptoms that my mother-in-law is experiencing (facial paralysis, fatigue, uncontrollable leg movements and weakness) after the jab. There were thousands of injuries like hers reported on the WHO website.

This is the dilemma many people are facing with regard to vaxine refusal. If they have children, they worry about providing for them. The main challenges are keeping a roof over a family's head and paying the previous year's taxes. There is not enough public housing to go around. Some of it is excellent, but much of it is not and may not be in the best school districts. A family without an income may not be able to afford home schooling materials. Even though no one in a household is employed, they will still owe taxes from the previous year when they were employed.

Many gov workers are denied their pensions if they refuse the jab and are terminated. This is not right. (Soldiers can be thrown in the brig for refusing an order.) Many states deny unemployment compensation. Food and clothing are minor issues that can be easily handled by a family that has prepared ahead. Everyone should do this as life can be uncertain. The ongoing problem is that many employers will not hire the unvaxed. So, even if you are lucky enough to get unemployment compensation, it is only temporary. What to do next? If you have the savings, consider relocating for a job you can do independently.

Of course, the problem is that many folks will be willing to allow mass vaccination as part of their admission policy. I don't know how much longer people will be allowed to turn round, but climbing sweep used to be an option. Well workers are still in demand, but you may not be able to bend if unvaxed in the future. People will sacrifice a lot to take care of their homes. There is good money in home showing if you are in the right location. Unbonded home child care (babysitting). If you have a bit of land, a large family for labor and a few years start-up time, there is demand for signed trees in forested areas being logged. You will need to sell seedlings in lots of 250. Each buyer will want thousands. Labor intense. continued

continued- Can you get a master hunter certification? This will allow you many opportunity to hunt more game animals and out-of-season. These people are usually notified by the state when there are complaints of animals damaging private property. Hunters get to keep the meat, antlers and hides. You can become a fishing guide if you have a boat. I would discourage becoming a hunting guide as it can be easy to deplete game herds. If you have hundreds of deer and elk eating the feed you put out for cattle, you pick also for an a ranch and have enough work to do without supervising hunters to make sure they do not shoot your cattle.

Raising Christmas trees is not a good solution for a family that needs immed income and has no experience. You can often combine several projects, though. Selling eggs, duck eggs, since so many people can no longer tolerate chicken eggs due to adverse vaccine effects. Bartering firewood labor. Growing a pumpkin patch for Halloween. Growing sweet corn to sell by 2-dozen or 100 or 500 ears--include a few extra and tell buyers they are compensation for any bad ears. Raising a number of small meat animals-poultry, rabbits, etc. (Licensing start up fees will cost you at least several thousand dollars if you butcher on the property and sell from the farm.)

Show makers and shoe repair are still in demand. Any kind of repair service--egg, good mechanics, inc. those who can work on heavy equipment. Welders with a home repair shop. Organize estate sales. If you own land, plan for the future. If it is already in timber, plan a rotation schedule for logging so you can harvest enough logs to provide an income each year--and replant. Possibly an orchard. Since Bernie said if you want it pick them the ground without ladders. Dog training, sep. for security dogs. Repackaging and selling items online. One recent bargain I found was vanilla beans--much cheaper than supermarkets where you buy one at a time. On the high cost of vanilla.

Joined, I bought a decent utility sewing machine. I will be using it to mend and alter clothes and upholstery. Also sewing cloth diapers. Another business idea. Start a small, parochial school or tutor high schooers. The people orchestrating this mess want kids to grow up semi literate. Hence the restriction of schooling to screens. And little being taugh--except hypocrisyhola and face covering--when in classes. The only solution is leaving the rotten public system.

Too bad at least a third of us are in steadfast denial and another third want a police state. The baddies running the show have all the wealth and power in the world. BTW, an easy answer to why the Biden administration wants a needle in every arm no matter what? Big Pharma helped with money so Biden/Harris could win. Happens both sides of the political aisle all the time.

When people in government do something not quite legal the laws of this country seem not to apply. What these people are doing promotes chaos because all law then becomes a farce. Thus giving the criminal class a legitimate place. Beware of what these people do. Somewhere down the road there is a bus they will be driven under to keep them from testifying against the true criminals. That may be the drop companies involved in the illegal promotion of their products or it may be public opinion will have its eye at election time. Control of the response of the media in this situation may lead to artificial of some kind, meaning the entire media will be removed from the control of the 5% of the very rich people of this country and put back in the hands of the public stock where belongs and others have more liberty to expose the very big violations of law in the government and the means to overthrow conflicts of interest such as described in this article.

One of the many things that licenses me about all this is that the Big Pharma scientists trusted as geniuses by the left, including by the head of the CDC, are spending no time or money or trying to find a way to counteract the damage they've done to so many thousands. What do they spend their profits on? New concoctions that purport to do the same thing as existing, cheaper drugs they're supposed to. And unlike the new offerings, those older drugs have actually been ... wait for it ... tested in both legitimate trials and the real world!

My concern is a bit different. I worry the new formulation that is supposed to remain effective longer and at more easily provided temperatures is nothing of the sort. It will degrade and by the time the enablers of the evil cares dutifully get their jabs, it won't produce the trillions of spike proteins it would have if fresh. Hence, a much safer experience for these lucky fools. Since our only hope for a return to sanity is an overwhelming flurry of very severe side effects, it will put off their day of reckoning. Just a thought, I suppose it's possible the new formulation will be as "effective" as the others.

You say resist taking the vaccine if your employer is mandating it and, yes, you may lose your job but you'll be better off. We know that but my son is being mandated and the date is looming. He WILL lose his job. He hasn't had to find another with no luck. He CAN'T afford to lose his job. Who will pay his bills. And, to top it off, he works from home! But the company says he still has to comply for the good of others. NOT FAIR, no one is protecting the average American worker through this. I am devastated for all of these young people being forced to take this vaccine. He is now going to see a. He asked the pharmacist if the vaccine they were giving was the FDA approved and they said yes. I asked if it was labeled Comirnaty. They said , no, but it is the same and showed us that on the information sheet. I said I heard only Comirnaty was FDA approved and they said they were interchangeable. I recorded the conversation. It's not as easy as just refusing and losing your job for the average American. By the way, he works for a clinical trial company not associated with any of the vaccines.

Regarding the statement, they can't force you to take the vaccine, I believe they can. They can make it mandatory in order to get your Social Security payment, get medical treatment through Medicare, and to buy groceries anywhere unless you show your current vaxx card. Some people are part of the minority that don't work because they are retired and not in a nursing home. The only way to forcefully vaxx these people is by the methods mentioned above and this is what I fear.

Dr. Mercola, Special thanks to your guest for her trove of life saving data she shared with us. I recently saw a interview from Dr. Who said the side effect of Heart Inflammation is caused from NOT ASPIRATING THE NEEDLE BEFORE THE SHOT IS INJECTED! If you draw blood, then you know you hit a vein and not a muscle for injection. He also has a report from the CDC that says "Aspiration IS NOT RECOMMENDED AT TIME OF INJECTION ????" He can't understand why they recommended against this knowing it will cause inflammation. I gather the CDC is more corrupt than we really know and want mass casualties.

Dr. Mercola has brought that very issue to our attention already. The reason for not recommending jabbers check the needles for blood before going ahead with the injection is it complicates the vaccination process. There are a lot of people going jabs, who aren't very competent to say the least, and expecting them to do this correctly and religiously is a pipe dream. So, it's recommended to be done poorly and sporadically, it would create a reason for people to fear the jab. Also, even if it were always done correctly, it would put a glimmer of doubt into some people, who would think "wow, I didn't know they had to be so careful to do this just right". So - it would reduce vaccine uptake. That's why. It's never about public health. Never, not ever. So, this is simple to understand. Why the doctor you refer to would not understand is what's weird.

Powerful. The level of corruption is staggering. Can the video be retained on alternative platforms? All politicians and others in positions of power need to see this. Too many on 'our side' are still squeeling the 'safe and effective' line.

I was shopping in the grocery store yesterday (11/6/2021) and while in the produce aisle a little girl of about 6 said "to me. I responded to her and said "it - her next statement just stopped me in my tracks. She proudly stated to me "I'm vaccinated!" I did not know what to say. So, I just said "well, that's good for you" But, inwardly I was screaming! This sweet, beautiful little girl now is subject to God knows what. Horrifying. Just horrifying.

I live in Maine and am surprised these draconian rules have been the most harsh in this state. I would expect New York or California, but not Maine. I'm relieved that we haven't been asked to show proof of vaccination to enter restaurants or bars, with the exception of one I tried to go to in Portland.

Maine is another state with one of the highest vaccination rates. So Maine's infection rate should be going down, right? NO!!! The past 2 months have been the worst 2 for Maine since the beginning of the pandemic. Just go to this worldometers covid-19 webpage and look at the graphs for Maine. Prior to the vaccine rollouts in Jan 2021, Maine was flattening (virtually no covid-19 infections). The infection rate went nearly straight up 2 weeks following the first round of jabs. It starts to level off until the 2nd round of jabs. The infection rate shoots nearly straight up again. Just as the graph begins to level off (still going up) the FDA approves the boosters and the infection rates shoot up again. You can't make this up! How stupid can the public be? Why isn't anyone else looking at these numbers? www.worldometers.info/...#maine

Look at the graph for "Daily New Cases". Main almost broke a record on Sep 28th for the most cases recorded on a single day. Jan 2nd was the only day they recorded more cases and that was due to the Holiday Weekend. Most people are off work the 31st of Dec and the 1st of Jan, so most of the positive PCR tests didn't get internal on those 2 days. Therefore, Sept 28th is actually Maine's worst day. Now look at the graph for daily active cases. It was literally flat-lining up until Jan 2021. It continues to go up at a 45 degree angle. At no point in the past 11 months has Maine's 'active case load' gone down. How is that possible? Maine is tied for 3rd place as being the most vaccinated state. All the states with those high vaccination rates have graphs that look like Maine's. You can't make this up. Numbers don't lie. The vaccines are what is making people sick, not Covid-19! This is a total jabd. There are a few exceptions where states with low vaccination rates have similar graphs, but their peaks and valleys are less dramatic.

Seems to be a puzzle but at each level to solve. If we remove the bias side of the authorization process we may get some relief. Since a consulting panel of experts is required to start the process I suggest that this selection process is made based on in depth scrutiny. If in criminal trials opposing sides must agree on the jury panel selected otherwise the verdict is in the bag already and makes the process of justice a mockery. Such writing must be made of those vaccine panel members otherwise safety is made a mockery of and must be recognized as such. A further future requirement.

I wonder how many car crashes most you have before the model is recalled? Not many and the on bag recall was done with fewer deaths so taking that as a guide why are vaccines not given a similar requirement? These safety panels need to be viewed as a major concern as to how input or consent must be given by opposing interested sides in its selection so that safety is not made a mockery of and that process is done with some integrity in mind. How this is accomplished I do not know but will remain a major stumbling block if not taken on.

Hi there. I have a question and wondered if anyone could provide an answer. In most of the literature I've read, videos I've watched, experts discourage the Covid-19 injections for a variety of reasons. HOWEVER, in some of the same literature/videos the authors/speakers advocate that the injections may be appropriate for those at risk. I am confused. If the injections could hurt anyone, why would it be appropriate for those at risk (i.e., elderly, immune issues, obese, diabetes, two or more health conditions)? Looking forward to your comments.

"A licensed vaccine is not shielded from liability until or unless it's added to the recommended childhood vaccination schedule by the CDC/ Dr. Mercola. This is a federal shield. You can see if your state allows it but most will follow federal statutes. This is interesting part which may give answer. There is exception for the shield which states that if a dangerous pathogen was INTENTIONALLY added there is no fab. shield. I wonder. if the Comirnaty drug does not contain Graphene Oxide for 5g control they are protected if that is the only difference since that would make it an intentional adulteration unrelated to the fake disease it pretends to protect us from. www.law.cornell.edu/definitions/uscode.php?width=840&height=600&am...

They can't. They can coerce you into getting jabbed by firing you, refusing you medical services, and preventing you from entering public places. Places like Kroger are already making plans to keep the unvaccinated from entering their stores. It will be the entering a COSTCO or SAMS where you have to show your card to get in and you have to swipe that card in order to check out. Kroger still requires everyone to wear a mask even though most counties in the USA have lifted all mask mandates.

"Even though several hundred claims have been filed with the Countermeasures Injury Compensation Program (CICP) for injuries resulting from the COVID shots – which is the only possible avenue to obtain damages – not a single claim has been paid out? I would imagine that is the case because all of the EUA injections are still undergoing worldwide 3rd phase testing. Under testing, no one can sue and win, because the person has agreed to being used for testing and inadvertently in this case with COVID jabs, agreed to the terms regardless if they understood what was going on or not. That is why it is so important to research and not take anything at face value. Unfortunately, half the USA population did not do their homework and here in my town, San Diego, it looks like close to 90% have taken the step to ruin their health.

Does anyone know if there is anything we can do regarding travel mandates? My parents are trying to visit me for Christmas from overseas and are unvaccinated. I heard that all international airlines will require the travelers to be vaccinated. Does anyone know whether there are airlines not willing to give in to those demands or what can one can do in this situation. Thanks.

The government is at war with The People . It's really long past time for people to acknowledge this, and to continue 'puzzling' over the sheer absurdity of it all is just another way of delaying the inevitable horror and series of helplessness that always comes when good people are forced to come to this realization. This is normal, and all who are not quite there yet have my profound sympathy. Three months ago I was there... and it was the absolute worst, most confusing, most overwhelming feeling that I have ever lived through in my life. . Now it is time for the rest of the thinking people in the world to acknowledge it and to accept that this is real... and wade through the ensuing emotional muck in order to emerge empowered on the other side . Then, you can behave accordingly.

It made my hair turn visibly gray within a week. I wish I could do something or organize. But no one offline believes me. They call me too negative or a paranoid conspiracy theorist. What can you do in such a situation?

"We've got a criminal organization running things now. This is a worldwide program of some kind designed to control us. Once we all figure it out, we can win." It has already been figured out in full detail by many, including legal experts:
principia-scientific.com/archivebop-warns-of-genocidal-satanic-elites-... ~ www.bitchute.com/.../rvgKnqWKZ4M/ Note that even our children are being criminally abused by injecting experimental substances into them with known harmful effects, we have already "figured out" that we are in a genocidal civil war against humanity - much worse than the No.9 solution to dispose of a few million in gas chambers or by medical experimentation. What might be informative if any figuring out is to be done is why this is happening in Italy at this stage in the scamdemic? principia-scientific.com/italy-drastically-reduces-its-official-covid-...

the NUMBERS GAME is the backbone of Pharma Lies and Propaganda – co morbidities were always ignored in a quest by the Snake and his ally Dr Fauci to raise the value of the Snake's vaccination investment shares – the whole stinking long farrago was engineered by the Snake whose mental development has formed his psyche into a need to kill as many people as possible "FOR THEIR OWN GOOD"

Yes, Katyfina, "vaccines" are the path to planned genocide in Dems. It is about destroying rights. It is about control, that the villains can satisfy their disproportionate desire for power to achieve their psychopathic desires. Terrorism is always based on fear, misinformation and ultimately mentioide in an op-ed published in Newsweek, two scientists accused Dr. Anthony Fauci of bungling the government's response to COVID by getting "major epidemiology and public health questions wrong." Rep. Jim Jordan Reveals in Congressional Hearing Fauci's Coverup of His Criminal https://youtu.be/qyCOOnHqQlk
www.globalresearch.ca/government-scientists-go-public-fauci-funded-amer... (2 November 2021)

After spending billions in taxpayer funded advertisements to convince adults to take the jab, Pfizer launched a new ad this week, which seemingly targets their new customer base – children. The company held back nothing and referred to children who got the vaccine as part of the experiment as "superheroes" with "superpowers."

"Natural immunity is much stronger than what you can achieve from the injection" . . . And yet, in Germany, those who have recovered from this virus, are still required to take the clot shot.

Yes natural immunity is greater than that provided by any injection. And no credit is being given to our immune system for maintaining immunity. It's all about hiding the real safety of natural immunity in order to sell manufactured poisons. And it's not just in Germany that natural immunity is ignored. All over the world no credit is given to anyone who has already had the virus. But I remember back in the spring of 2020, the CDC was on record as claiming they were going to study the progression of herd immunity by conducting antibody tests in several major communities around the United States. Antibody test would have shown definitively who had gained natural immunity.

But then, in order to start preparing people for the vaccines, they put a hush on this project and have never continued it, or it would have proven that herd immunity was upon us already during 2020 and we were safe. Well, except for the creation or appearance of the Delta variant. Hooray for the Delta variant! It gave new reason to push a vaxine. Wonders never cease when you follow the money. I assume by this time, that 90% of the people have already developed both antibodies and then followed that with 2 will immunity to the original virus, and probably most of us are resistant to the Delta variant now also.

Cakesjean, that is not what a German told me. A German told me, that one has a choice between vaccine passes, or natural immunity. In order to gain entry into places. Perhaps there has since been an update, but this report was as recent as September of this year.

Miranda, I have had covid, my high blood antibody count proves that. Nonetheless, those who have recovered, still are required to have one jab. Here is a clip from 19 August 2021 with Mr. German Minister of Health, Jens Spahn, explaining that, to be classified as "recovered", one needs the PCR test confirming that one has had covid, and the vax pass with proof of one shot (instead of the required 2 shots). Show it to your friend in Germany.

cakesjean I saw on RT UK this morning (I watch every news source I can) that Germany is blaming the 'unvaxxed' still in their latest push.

Yes, bee70578. Everything is the unvaxxed's fault. Yet, there are more vaxxed people in the hospitals than unvaxxed.

Many are confused on this. The BS Act only provides immunity for CDC approved recommended vaccines. Since COVID jabs are under EUA they do not have this protection.

I have been reading Dr.Mrs articles for many years and found his advice extremely helpful. I also bought his latest book about this whole Covid charade. Now this morning a friend told me that Dr. M. actually had a covid jab in order to travel, and perhaps we should follow . Could that be true? Perhaps some countries offer a jab with little side effects unlike FDA approved ones? If anyone is aware of such please, thank you.)

I'm new to Mercola and very curious if there is a situation where the vaccine would be recommended. I'm in my early 70's with a BMI of 27, I'm currently on medications for high blood pressure, which is well controlled. I also take medication for pain associated with osteoarthritis. I'm very hesitant to get the jab, but also understand that I'm been co-morbidities.

interesting how BC kids can get a Jab or three.....and more without parents consent or knowledge but they can't legally but medical marijuana if they feel it would help them..... or an aspirin at a drug store.. but they can shoot up known proven toxic deadly and a possible fatal , experimental chemical concoction ??? and they wonder why there are so many junkies and heroin addicts and crack-heads crawling in the gutters... Yes Oh Coures.sure.....makes since , with a known paedophile as a MP of Canada.....soon the age of consent will drop and Justin will have many more little boys having "sleepovers' at Justin's House ... Justin's Roommate was busted with CP and Making CP..and Justin ...."I don't know anything about it".....sure...and my chickens have lips too

So, both Drs. Nass and Mercola believe that the SARS-CoV-2 novel virus and the disease Covid-19 actually exist and are what has been claimed that they are? Just wondering.
