latest FDA COVID pronouncement.

After untold numbers of people have been given antibody tests to determine their COVID status, the FDA now states:

“Today, the U.S. Food and Drug Administration issued a safety communication informing the public that results from SARS-CoV-2 antibody tests should not be used to evaluate immunity or protection from COVID-19 at any time, and especially after the person received a COVID-19 vaccination.”

Boom.

I’m imagining just a small sample of people—perhaps 5000—marching in unison into a hospital, saying, “We tested positive for COVID on an antibody test...and then we had to isolate, and some of us were treated with toxic drugs...and NOW we learn that the antibody test is useless...”

The FDA document, dated May 19, 2021, is titled: [“FDA In Brief: FDA Advises Against Use of SARS-CoV-2 Antibody Test Results to Evaluate Immunity or Protection From COVID-19, Including After](#)

Vaccination". [1] [1a]

Digging a little deeper in the document, we have a statement referring to the COVID vaccine:

“The authorized vaccines for prevention of COVID-19 induce antibodies to specific viral protein targets; post-vaccination antibody test results will be negative in individuals without a history of previous natural infection if the test used does not detect the type of antibodies induced by the vaccine.”

In other words, the FDA is saying, “Look, the vaccine creates specific antibodies against the spike protein, not the virus. If you take the standard antibody test after vaccination, it’ll be useless, because the test isn’t meant to detect antibodies against the spike protein. It only detects antibodies against the virus [2].”

This raises several serious questions. One of them is: Since developing antibody tests is as easy as pie, why hasn’t the FDA developed one that detects antibodies against the spike protein?

And the answer to that question is obvious. If the FDA did develop such a test,

then—in terms of
conventional vaccine theory
—it would be easy to see how
well the vaccine is working,
or not working.

And THAT is not a goal
public health officials want

to achieve. That is not a risk
worth taking. Suppose, after
testing 20,000 vaccinated
people, it turns out that only
800 have produced
antibodies against the spike
protein?

Another (unanswered)
question: Are specific
antibodies against the spike
protein, conferred by the
vaccine, sufficient to
neutralize, disable, destroy
the actual virus if it drops
down out of a cloud and tries
to infect a vaccinated
person?

Of course, as my readers
know, I've spent a year
demonstrating that no one
has proved the SARS-CoV-2
virus exists. However, I
make many forays into the
insane world where people
believe the virus is real; and
I show that even within that
world, the experts contradict
themselves and compound
their egregious fallacies like
rabbits spawning babies.

This latest foray shows the

FDA is both criminal and insane.

We will never find out.
Using the “isolation of SARS-CoV-2” papers (2) as examples, they seem to be the only definitive excuse that a virus may have been isolated.
Has anyone else been able to source any other paper on SARS-CoV-2 isolation, other than the Feb. 2020 Wuhan paper and the CDC in June 2020?

Ok, but note that the Pfizer ongoing trial states, as part of the phase 1 study, they are measuring:

“SARS-CoV-2 anti-S1 binding antibody levels and anti-RBD binding antibody levels, expressed as GMCs [Time Frame: Through 2 years after the final dose] As measured at the central laboratory”

<https://clinicaltrials.gov/ct2/show/NCT04368728>

So, the FDA might not have developed such a test for the evaluation of the spike protein antibody, but doesn't the above indicate that Pfizer has a way to test it?

Reply

Alix says: June 29, 2021 at 4:28 pm

Absolutely, Bobby. The clinical trials use this antibody testing to determine the dosage level and how many doses are needed. Antibodies are the entire reason for “needing” a second dose. To get EUA, however, the studies relied on PCR testing, for myriad reasons, not the least of which is how easy it is to manipulate PCR results.

So the antibody tests used by pharmaceutical companies are good enough for them to say which dosage people should get and how many doses, but antibody tests are not useful for determining IgM or IgG responses to SARS CoV-2.... something is very fishy indeed. By the way, in the COVID shot animal studies, it was antibody testing that helped narrow down which formulation (various sequences of mRNA) and the dosages to try in humans.

Furthermore, who determined the sensitivity and specificity of the antibody tests used by Pharma to test their COVID shots? If this was done, what was their “gold standard” against which they could determine sensitivity

and specificity? Were all the vaccine makers using an independently validated antibody test, or did each one use a proprietary unvalidated antibody test? No one knows.

The FDA is admitting they are not confident in the underlying premise of immunogenicity of the mRNA-Spike product. Boom.

Yeah,

“Set up a screening for Apples, and test for the existence of Apples, when you should be testing for Oranges!”

This is how all of those

questionable “trials” and pop-“studies” operate: They deliberately set the “aim” a little off (to the left or right) of the target – and then reap the false results – because their “tests” were already designed to be BASED!

Caught on to an article on Joseph Mercola’s site, yesterday. It seems that Glyphosate getting into the body, with all of its already-known destructive health problems, may also set up people for even WORSE reactions to these “vaccines”!

<https://articles.mercola.com/sites/articles/archive/2021/06/27/toxic-legacy-how-glyphosate-destroys-your-health.aspx>

This kind of almost has me thinking about “binary poisons”, whereas – one poison helps amplify the effects of another! It makes one wonder how much of this “effect” was previously known within circles? ? ?

Good article, Jon. It is obvious that the FDA and CDC do not want people to know if the vaccines are effective or not. Joel S. Hirschhorn had a good article on the CDC not following breakthrough infections with data as well – (<https://trialsitenews.com/reducing-data-on-breakthrough-covid-infections-not-in-public-interest/>)

Another indication that they don't want the public to know the ineffectiveness of the vaccine. Will be linking your article and Mr. Hirschhorn's article today as well

The walking, talking comedy show that America has now become is no longer funny, it's not even mildly amusing.

Mr. Thunberg has done a better act with art-tempting his child into appearing to have grown up. The usafda itself is appearing yet again as more of a fraud and death agency than it is very much of anything else. The list of absurdities coming out of that morass is too long to even attempt to assemble today. We can, at this time give them one one-thousandth of one percent of credit for having made this recent "Oficious Pronouncement." Their preceding decisions related to the coVid-19{84} story however, begs to rescind that tiny gift. Jon, I totally agree with your ending statement in this post. Once more, I am inclined to repeat the question which lays much of the Allopathorism's efforts to waste. Earlier I observed a video in which an MD said words to the effect of: It looks as though we are witnessing the death of 'medicine' as we know it. "I... [p]lay a lot of golf... I'm vegan."

have you considered the possibility that maybe, for example

example,...

* the glyphosate (a toxic-to-humans chemical) that is sprayed on the golf courses you play at has lowered/has been lowering your immune system?

* a lack of organically-raised/sourced protein-calories has lowered/has been lowering your immune system?

The ‘illnesses’ (e.g., flu, pneumonia symptoms) you and your husband went through can be more readily explained by toxic environmental mitigation factors employed or not employed and life style choices — than a so-called unproven ‘virus’.

Plus, the non-‘virus’ - based questions get to the heart of each individual’s ailments more quickly and accurately.

That FDA notice is dated May 19th. This should be posted out side of every test still taking place today. This should have shut down all testing. Did they see the lawsuits coming? Is this their attempt to say well we warned the public about them?

The (now) known worldwide — Attorney Reiner Fuellmich — is in Germany suing for crimes against humanity and focusing on the per “test”.

No doubt the global predators responsible for this fraud are frightened of these lawsuits because as the test is proven to be worthless -as it was in a Portugal court - word will keep spreading and even reach their biggest audience- the sheeple- and more and more questions will keep bubbling up about the entire list of claims- starting with the initial claim of a contagion.

How many tens of billions have been made selling this “test”? Have they recalled the test yet? Victims need to be compensated-from 1,000.00 per test taken by the average employee-sometimes weekly- to millions plus lifetime care awarded from botched suicides as a result of testing

“positive” and forcibly quarantined and/or worse. These lawsuits have only just begun.

Virology expert Stephan Lanka exposed the test:

“Professor Christian Drosten from the Charité in Berlin... started development of a test process for the SARS-virus before it was clear and could be clear whether the report from China about SARS was true and proven, and above all before the Chinese virologists published their results.

...virologists from the Chinese epidemic authority (CCDC) published their results on Jan 24, 2020.

On Jan 21, 2020 (3 days before the first publication by the CCDC!)

WHO recommended that all nations apply the testing method developed by Professor Drosten.

Professor Drosten triggered and caused the growth and globalisation of the Chinese epidemic panic, with the claim that he had developed a reliable test process for the rapidly spreading virus in China, by not observing the clearly prescribed rules of scientific work, and by violating the laws of logic and the logic of virology,

which are an integral part of his employment contract.” *

We need to set up an elected council, but not really elected; appointed. If you want to get on the council, you must get 10 of some agreed upon number of people to sponsor you via an representative affidavit. I've been working on the system for a while, just waiting for the right situation. And if you don't represent them, the representatives can pull their sponsorship at any time. i was under the impression that the vaccines created antibodies and that the lateral flow test would detect these giving a false positive, at least your body would produce antibodies for a period of time but not forever. I also do wonder if it is possible the pcr test is producing false positives on people who have had the vaccines as the pcr might detect the spike protein. But that is all assuming that the shots actually do anything except make people ill

Another probable cause of
“covid” illness: Graphene
oxide.

Hello everyone

It’s been awhile, though I
have been following. Came
across this the other day –
maybe someone has already
discussed.

Apparently, graphene is
being used in the SHOTs, It
is also found in the swabs
and masks – remember the
little “worm-like” things,
remember the Canadian
children wearing face masks
that had graphene in them
and some getting ill
especially in the lungs. Well,
here we go again.

Graphene is being put into:

1. “covid” shots
2. flu shots – apparently has
been for short while

Graphene is being lauded as
something fantastic for the
delivery of vaccines.

However, graphene
inhalation can lead to many
of the “covid” illness
symptoms. So, we have
another thing to add to
“covid” causes.

Here’s a link from a Spanish

Certainly worth a read. There is a video, too, in espanol with English subtitles.

As always, regards in Christ

I thought Graphene was also considered VERY carcinogenic too?

As of 2pm (eastern time), June 30, 2021, the referenced FDA document is gone from the FDA website.

All those weird “magnetic” injection sites?

Graphene “enhanced”?

I was beginning to have my doubts about “magnetic vaccines”. Then, coming across these references from “respected scientific” publications – really started

to make me think – especially along the lines of the Bio-Technology being pushed upon humanity – all in what is trying to become the “post-human”/trans-human age of technology!

Now,

This entire situation gets far more “Twilight Zonish”, the MORE we are able to learn about what’s in store for ALL of us!

KA-BOOM!

Perhaps one of the biggest reasons why the various “health authorities” and their financial-backers are pushing to FORCE-INJECT everyone with these **genetic-modification-capable “vaccines”**:

<https://www.orwell.city/2021/06/dr-chinda-brandolino-patented-dna.html>

As some of us, from years back, have warned and pleaded with everyone we knew – to BEWARE OF THE LOOSE INTERPRETATIONS OF INTELLECTUAL

PROPERTY RIGHTS LAWS,
and what results humanity
can expect to reap – IF these
“mad scientists” were to ever
have their way!

The most profound
argument that must be mad
– for the sake of all
humanity: **Is to avoid at all
costs, ANY attempt to
slip ANY genetic-
modification-capable
substances into OUR
bodies!**

THIS basis of argument
MUST be made loud and
clear. We do NOT consent to
the unlawful and uninformed
transfer of ownership of our
bodies and future to
ANYONE, regardless of
whatever “mandates” and/or
other political or legalistic
excuse for “laws”, policies,
regulations that may be
promulgated under the
falsehood of “public safety
and health”, in which the
current legal framework
under the IP (“Intellectual
Property”) laws on the books
– and as ruled by the
SCOTUS – that “*genetic
modifications (read:
“genetically-modified
RNA/DNA”)* CAN be
patented under law“!

The Cov.Plan / Rockefeller
Lockstep 2010

They hypothesize a
simulated global outbreak
required steps, various
phases, overall timelines,
and expected outcomes. This
was posited in the

Rockefeller Lockstep 2010:

- Create a very contagious but super low mortality rate virus to fit the needed plan. Using SARS, HIV, Hybrid Research Strain created at Fort Dietrich Class 4 lab from 2008 to 2013 as part of a research project to find out why corona viruses spread like wildfire in bats but have an extremely hard time infecting humans. To counteract that, they added 4 HIV inserts into the virus. The missing key to infect the human is the Ace-2-Receptor.

- Create a weaponized version of the virus with a much higher mortality rate as a backup plan. Ready to be released in Phase 3, but only if needed. SARS, HIV, MERS, Weaponized Tribit Strain created at Fort Dietrich Class 4 lab in 2015.

- Transport the Research Strain to different Class 4 lab, the National Microbiology Lab in Winnipeg Canada, and have

it “stolen and smuggled out by China”, Xi Jang Lee, on purpose and taken to China’s only Class 4 lab which is Wuhan Institute of Virology in Wuhan China. For added plausible deniability and to help cement the wanted backup public script as something to fall back on if needed. The primary script being its natural. Backup script being that China created it and released it by accident.

- Fund all the talking heads: Fauci, Birx, Tedros and agencies, World Health Organization, NIAID, the CDC and also the UN, that would be involved with pandemic response prior to

paucity response prior to the planned release of the Research Strain to control the wanted script throughout the operation.

- Create and fund the vaccination development and roll out plan so it's capable of being rolled out on a global scale. Gates: A Decade of Vaccines and the Global Action Vaccine action plan, 2010 to 2020.

[...]

And that is your New World Order: technology on steroids where you have no option but to comply. And if anyone thinks that this isn't true, then go and check out some parts of China because they've already started some of the crypto currencies system in place in certain areas.

So, this is the outline of their plan. And what we have to stop by outing it in as many places as possible.
