## BULK PRODUCTS - BASE MATERIAL

### $\frac{3}{4}$ " ROAD MULCH

$\frac{3}{4}$ " crushed gravel is a mixture of sand and rock that is best used as packing gravel for underneath asphalt, concrete, driveways, pot holes, garage pads and paving stones. It is also known as  $\frac{3}{4}$ " crush, road crush or road base.

**\$34.00/yard**

**\$0.75/pail**

### $\frac{1}{2}$ " CHIPS

1/2" Crushed Gravel is a mixture of sand and fine rock chips. It is best used as packing gravel for underneath asphalt, concrete, driveways, garage pads and paving stones. It is also known as crusher chips, stone dust, or crusher dust.

**\$35.00/yard**

**\$0.75/pail**

## LIMESTONE

LIMESTONE is a decorative rock for around houses and flowerbeds (3/4"-1"). It is a greyish blue rock that is used for complete landscaping. It also compacts hard which is ideal for driveways, potholes and pathways.

**\$47.00/yard**

**\$0.85/pail**

## NAVI JACK

Concrete aggregate mix is three parts 10-28 mm washed rock and 2 parts 5 mm sand. Add Portland cement to make your own concrete.

**\$39.00/yard**

**\$0.75/pail**

## ROUND DRAIN AND CLEAR CRACK ROCK

**Crushed Gravel** – What you typically think of when you think of gravel. It's gray and is made up of sharp and irregularly shaped rock fragments, which makes it easy for the rocks to interlock and compact.

## 1/2" CLEAR CRACKED ROCK

1/2" screened rock is an unwashed product that can be used for weeping tile, drainage, dog runs or driveways. It is also known as 1/2" minus.

\$39.00/yard

\$0.75/pail

### 3/4" CLEAR CRACK

3/4" screened rock is an unwashed product that can be used for weeping tile, drainage, dog runs or driveways. It is also known as 3/4" minus.

\$39.00/yard

\$0.75/pail

### 3" CLEAR CRACK

3" CLEAR CRACK ROCK. Great decorative rock, drain or fill rock. Various shades of blue, grey and black with flecks of pyrite.

\$39.00/yard

\$0.75/pail

### BIRDSEYE

1/8" – 3/16" washed rock is used for landscaping, pipe bedding, mixing in concrete, and as aquarium material. It is also known as pea gravel.

\$39.00/yard

\$0.75/pail

**ROUND DRAIN ROCK** is also called Washed Rock. It is commonly used for drainage applications and as a very low maintenance ground cover. For ground cover applications, put down our **weed blocking fabric** ([http://877joebark.com/tools\\_garden\\_supplies](http://877joebark.com/tools_garden_supplies)) first, then apply the rock on top. The rock is round and smooth so it is **NOT** recommended for walkways or driveways because *it does not pack down*

### **½" ROUND DRAIN ROCK**

½" washed ROUND DRAIN ROCK is a natural color with a smooth, round surface. It is ideal for dog runs (1/2").

### **¾" ROUND DRAIN ROCK**

$\frac{3}{4}$ " washed ROUND DRAIN ROCK is a natural color with a smooth, round surface. It is ideal for use in dog runs and it also used for drainage and roofing. Other names for this product include dog run and drainage rock.

### DECORATIVE ROCK

**River Rock** – Smooth stones that are softer underfoot, provide good drainage and come in a variety of colors, typically grays and browns and typically range in size from 3/8 inch to 6” inches. River rock is often used in flower and garden beds and on walkways for erosion control.

#### 1½" RIVER ROCK

1" - 2" ROUND RIVER ROCK is a washed, colorful rock that gives a natural appearance for use in general landscaping, pond features, and can be used as drainage rock.

\$39.00/yard

\$0.75/pail

3" – 6" RIVER ROCK

3" - 6" ROUND RIVER ROCK is washed, colorful rock that gives a natural appearance for use in general landscaping and pond features.

**\$39.00/yard**

**\$0.80/pail**

## RED LAVA ROCK

RED LAVA ROCK is a dark red lava rock. Lava rock is natural volcanic rock that helps plant growth and retains moisture. It can be used in atriums, planters, pots, shrub beds and also as natural filtration in ponds and in bottom beds of bar-b-ques and fire pits.

You can use it in landscaping, as a border. Lava rock is lightweight and porous with angular edges, offering good drainage and usually ranging in size from  $\frac{3}{4}$  inch to 1-1/4 inches.

Lava rock is used in a gas barbecues. The flames heat the lava rock which then act like charcoal.

Lave rock is often used in aquariums and terrariums. It looks good and provides texture to the area but has to advantage of being much lighter than normal rocks so it won't put stress on the glass.

**\$83.00/yard**

## MULCHES

### FIR / HEMLOCK BARK MULCH

BARK MULCH is fine fir/ hemlock used for decorative purposes. As with any wood product, the fir/hemlock will break down over time, turn silvery grey in colour and require top up.

- reddish-brown
- decorative
- helps to suppress weeds
- screened to a 1" minus size
- contrasts well with plants and looks natural in landscaping
- can be used in all types of shrub and planting beds
- made locally from BC bark

\$29.00/yard

\$0.75/pail

### COMPOSTED BARK MULCH

COMPOSTED BARK MULCH is a blend of composted wood fibers as well as green waste compost and manures making the most ideal organic compost used for planting trees, flower and vegetable gardens.

Composted Bark Mulch is a brownish-black mulch that enhances garden-soil bed appearance. Composted bark can be used in all types of shrub and planting beds. Composted bark mulch is finely screened to a 3/8" minus size. The mulch is of the highest quality and consistency. Composted Bark Mulch has many positive characteristics and benefits:

- Provides a dark, rich, natural, decorative appearance to landscaped beds.
- Retains moisture for plants during warm weather.
- Conserves water and reduces evaporation of water from soil.
- Acts as an insulator that keeps the soil cool under intense sunlight and warm during cold weather.
- Adds organic matter that enriches garden soil beds.
- Pasteurized treatment reduces plant pathogens.
- Low nitrogen demand reduces the need for fertilizers.
- Physical stability allows water and fertilizer to be more consistent over time.
- Reduces soil erosion caused from wind and water.
- Prevents crusting of the soil surface, thus improving absorption and percolation of water into the soil.
- Consumes less nitrogen than non-composted bark.

## SOILS AND MANURE

**GLOBAL offers a various blends of soil:**

- Garden Blend –10% Sand (Standard garden bed mix)
- Val E Gro –37.5% Sand (Use in areas requiring more drainage)

**These soils comprised of organic green waste compost mixed with river sand. The composting process naturally heats the soil to more than 55°C to destroy weeds and weed seeds. Produced following stringent guidelines, these soils are regularly tested in a laboratory to ensure the production of a consistently high quality product.**

## GARDEN BLEND

A dark consistent, quality blend of recycled organic compost, peat moss / manures, composted bark fines, and river sand. Use GARDEN BLEND to build all your planters and bedding plant areas that require loose, well-conditioned planting medium.

\$36.00/yard

\$0.75/pail

**VAL E GRO**

VAL E GRO is a rich growing medium. It is a 100% recycled blend of de-watered, "Class A" biosolids, composted bark mulch and sand. The excellent organic soil conditioning properties aid water retention in lighter soils and aerate heavier

soils, so less watering is needed. Great to use for flower beds, bulbs, roses, potted plants, trees and shrubs, evergreens, vegetable gardens, berries, new lawns and established lawns.

\$30.00/yard

\$0.75/pail

## TRANSFORM COMPOST AND LAWN TOPDRESS

### Mission Compost Soil Conditioner

(<http://globallandscapingsupplies.webs.com/raised-beds-cedarn-naturals-pictures.jpg>)

This product is great for mixing in existing flower beds, vegetable gardens and around plants, trees and shrubs .

\$30.00/yard

\$0.80/pail

[Compost Soil Conditioner.pdf](#)

(<http://globallandscapingsupplies.webs.com/Compost%20Soil%20Conditioner.pdf>)

Transform Spring Lawn TopDress

Transform Lawn Topdress is an important part of an organic lawn care program. It eliminates the need for thatching by providing beneficial organisms that decompose the thatch. It reduces the need for aeration by encouraging natural aeration through increased activity of healthy organisms and worms. It is particularly effective on mossy lawns when applied late February through early April and can be applied late September through October to provide stored up nutrition at the first signs of spring, increasing your chances of having a lush, spring lawn.

\$55.00/yard

0.85/pail
