Technically, the "accelerated internal aging" theory is correct- the mRNA shot technology accelerates internal aging by 25-30yrs. 😐

Through multiple pathways and MoA, and reprogramming the microbiome being just one, knock on effects are cells are wearing out faster than they can be repaired and the repair are compromised through existing lifestyle/tech. A more profitable, consistent, and plausible denialbilty depop program, could not have been designed and scgeduled better. 😐😐

Correct. Premature aging is a result of these injections, as well as premature Alzheimer prion-based diseases afflicting even babies.

Nightmare.

There once was a German movie in the late 1980s, that featured a kind of pandemic afflicted humanity by ageing extremely fast, a real horror scenario with kids having like octogenarians dying within days. I wonder what its title was.

Let me know if you remember the movie name. 🤔

The very first graph shows a lot of seasonal variation with fewest people dying in summer and after the shots even as the trend rises so that also seems to show the effect of sunlight vitamin D on cancers and as most cancer patients are not going to go outdoors much to get D that relatively small change from Summer to Winter on that graph could probably be made larger if more people were given high doses of vitamin D rather than being constantly poisoned by Chemo. Maybe at very high doses the death rates would flatline and not the people themselves.

Read today, I believe on Sasha Latypova's substack, that Congress controllers snuck in a bill that will essentially do away with therapeutic cannabis dosages by November.

Thank you.

Ethical Skeptic is on target with the statistics.

I wrote about this kind of negative effect from the COVID-19 virus itself, and also from the COVID-19 bioweapon "vaccines" (gene-therapy injections).

Both this virus, AND the bioweapon "vaccines" (gene-therapy injections) lab-created virus, damage and/or destroy cells of the person's body who is infected with the COVID-19 virus itself; and certainly damage and/or destroy cells of the person's body who has taken ANY of a COVID-19 bioweapon "vaccine" (gene-therapy injection.)

This cell damage and/or destruction goes all the way down to the mitochondrial level of the cell.

This mitochondrial cell-level damage and/or destruction, in my opinion, is the foundation of the accelerated aging process that can present in persons who were infected with the COVID-19 virus itself, and have recovered; it certainly does present in persons who have taken ANY injectable COVID-19 bioweapon "vaccine" (gene-therapy injection.)

This mitochondrial-level cell damage and/or destruction goes hand-in-hand with the damage and destruction of, the natural immune system of the "vaccinated" person's body.

The combination of these kinds of damage and/or destruction kick the door open to, among other things, the establishment of cancer in the "vaccinated" person's body; and/or the re-establishment of cancer that had previously in remission or under control.

I published the following articles, among others, about this:

<https://www.thetree.com/2023/10/28/the-covid-19-virus-and-the-modrna-covid-19-vaccines-induce-accelerated-aging/>
