The latest excess cancer mortality data has just been posted, and the trend is harrowing:

🇨🇦 Cancer Excess Mortality Continues to Rise 🇨🇦

Our models showed the excess in July 2021 - and the world listened. Pharm threatened me. Paid trolls lied to us all.

Our models have stood the test of time. We must now seriously consider, as society, what steps we are willing to take to confront this multi-decadal challenge and mitigate its effects.

This is directly in line with this Substack’s warnings ever since the rollout of t [altering](#) Modified mRNA slow kill bioweapon “vaccines” many years ago that VAIDS-induced turbo cancer emergency will only ever get worse; to wit:

From Turbo Cancer to Sudden Cardiac Mortality: Excess Non-Covid Natural Cause Mortality: The Never-Ending Adverse Events of the "Vaccinated" The Global Depopulation Program

And these trends are unrelentingly rising.

While some are attempting to rationalize these inconvenient and profoundly troubling datapoints...

...it has absolutely nothing to do with “natural causes” of any boomer die-off...

...and demographics that historically were never ever plagued with diseases such as cancer succumbing to these VAIDS-induced severe adverse events (SAEs)...

This is Danish data.

Hyppigheden af kræft blandt befolkningen har været stigende - og er stærkt bekymrende.
Jeg har grundigt læst rapporten fra Cancerregistret, som Sundhedsdatastyrelsen netop har offentliggjort.
Vi mangler fuldstændig en aldersinddeling. Jeg er særligt interesseret i i hvilken grad

It truly is a canard and an egregiously disingenuous one at that:

The aging faster canard for the uptick in cancer for younger ages is now being pushed down under.

There is a worrying new clue highlighting why so many young Australians are being diagnosed with cancer. Researchers have found that younger generations may be ageing faster internally, potentially increasing their risk. It's prompted renewed calls for earlier testing.

Especially when we have incontrovertible evidence that even the Mockingbird have no choice now but to actively coverup and obfuscate, with children and e infants coming down with cancer at unprecedented rates:

TIME MAGAZINE: OUR CANCER MYSTERY | WHY IT'S STRIKING US SO YOUNG

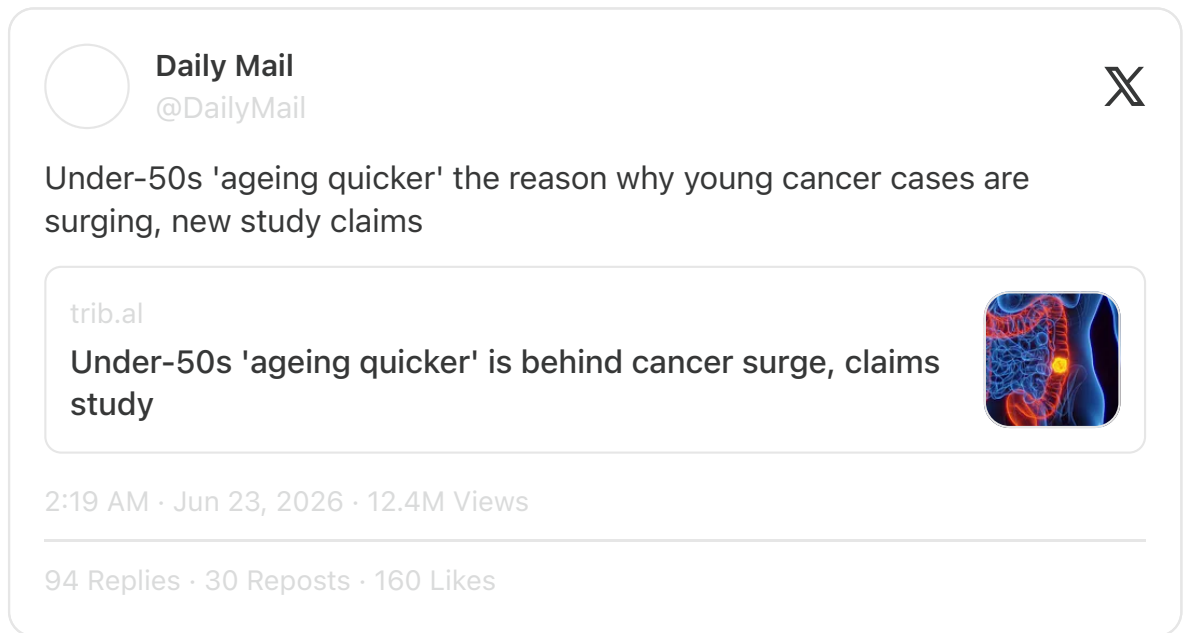

2ND SMARTEST GUY IN THE WORLD • FEBRUARY 15, 2025

As this Substack has been warning for many years now, the turbo cancer epidemic is only now underway as a direct function of the Modified mRNA slow kill bioweapon “vaccine” platform foisted on humanity during the PSYOP-19 scamdemic; in other words, cancer rates will continue to explode, and the genetically modified young people will be ...

To reiterate:

From the referenced Daily Mail article titled, [Young people 'ageing faster' than previous generations - raising cancer risk, new study claims](#):

Younger adults are ageing faster than generations before them, making them susceptible to [cancer](#), research suggests.

Earlier this year, it was revealed that 11 cancers are now rising among adults 20 to 49 – including breast, bowel and pancreatic cancer. Traditionally the cancer has been more common in older age groups, leaving experts searching for a

Several theories have been proposed, pointing to factors such as poor diet, smoking, [alcohol](#) consumption, disruption of the gut microbiome and even exposure to microplastics.

In other words, it is **anything** but the real culprit driving this premature aging **anything but the you-know-what**.

Except that the MSM mendacity may easily be disproven:

All of these data points have on thing in common: this burgeoning turbo cancer tragedy perfectly coincides with the criminal FDA issuing their fraudulent “emergency” use authorization (EUA) for these ‘Safe and Effective’ PSYOP-19 depopulation injections.

And it is not just the turbo cancer SAEs impacting these young demographics are also witnessing the VAIDS-induced myocarditis fallout as well:

These are cardiac medications for 15-45 year olds.

Still climbing too.
