The coverups must continue when it comes to all things slow kill bioweapon “vaccines,” with the latest assassination of doctors willing to expose the global PSYOP-19 eugenics project being yet another case in point; to wit:

In the recent airplane crash in São Paulo, Brazil, six prominent scientists were among the victims. The crash occurred on August 9, 2024, and involved a VATR 72 twin-engine plane carrying 61 (2SG: 62) people. 3. Dr. Ariane Risso, also from the Uopeccan Cancer Hospital in Cascavel.
4. Edilson Hobold, a professor of physical education.

Additional information:

Eight cancer doctors who dedicated their lives to saving others and blowing the whistle on the devastating cancer epidemic sweeping the world have been found dead.

The bodies of six world-leading oncologists and two resident medics were found on Friday in the wreckage of a plane that plunged from the sky in Brazil and exploded in a fireball, killing all 62 people on board.

The doctors were on their way to an international conference in Sao Paulo where they were set to present their findings that mRNA and the COVID-19 vaccine were responsible for the explosion of cancer and autoimmune disease worldwide.

Mainstream media are working overtime to brush this story under the carpet behalf of Big Pharma, but the facts are damning and we are not going to let cover up the truth.

Naysayers would ask "would they kill 62 people just to get rid of 6 doctors/scientists?" would be "hell yes they would".

The loss of these doctors is a significant setback to the medical freedom movement in for their families, and keep fighting. Several of us testify in National and international he COVID and turbo cancers and will miss their input
