

False Uprising: The Coordinated Effort to...

SAYER JI OCT 26 ❤️ 174 💬 44 ↻ 42

What began as petitions and letters has exploded into an organized push: “public-health” elites Peter Daszak, are orchestrating a full-scale narrative counter-offensive to remove RFK Jr.

Thank you for this excellent analysis and call to action. I miss the days when the media was owned by the entrenched corporations. It is sad that people can still be influenced by the personally so grateful for the hope RFK Jr. has brought to those of us who want medical freedom and true unbiased science to guide the MAHA movement. We need to all be vocal on everything we have to make our support known. Thank you Sayer for making it easy over the years for access research on healthier ways to address our issues.

One of the most ominous revelations to come out in recent years was when David Martin the quote Daszak gave to a group of mRNA investors. He spilled the beans about the mar to get that shit into 5 billion arms. Basically it was with the media hype and the public frig profits are sure to follow. Sick stuff.

Leave RFK JR alone. He's doing an excellent job for the health of the people & YOU p only supporting & pushing bullshit for the health industry. Let him do his job well as h does & get out of his way by thinking of only your best interest which is not the best the people: you just want to keep people sick & compliant.

Do what you do best which is getting in front of RFK JR's way & thinking only of your instead of the American people who deserve better than you have to give. POWER to PEOPLE!!

I have a difficult time spreading news or a petition, since I have been banned from social networks (for speaking the truth).

I am still trying to learn Substack so I can share more readily. As of right now, I know I am losing many things I post. 🙄

Just a little more time, I might have it figured out. 😊

If I ever get the chance to meet RFK Jr., I would immediately apologize for years past when I believed him to be an incompetent curmudgeon trying to destroy industry. I once drove to the funeral of a mutual friend and, though I found him to be a good and caring man, I still thought that their ideas were wrong.

I was finally awakened by the Covid debacle and saw that RFK Jr. was right all along about the destruction and heartache that some industries were causing. Profits over people is their principle. I'm sure I'm not alone as most of my friends have had the same awakening. NO! my liberal family members would wake up!

God sees it all and assures us the wicked shall perish.

Psalm 27: 12-15 says:

The wicked plotteth against the just and gnasheth upon him with his teeth. The Lord at him for He seeth that his day is coming. The wicked have drawn out the sword and their bow to cast down the poor and needy and to slay such as be of upright convers Their sword shall enter into their own heart and their bows shall be broken.

Lemme clue you in. The HHS, no matter who is running it, will never be about MAHA or anything at all. Its very existence or reason for existing is to push germ theory and the need for vaccine drugs. All of these are toxic poisons to the bone. And don't forget the NIH and other departments going whole hog on creating wild viruses and other deadly pathogens. For what reason? ` health of course!

If there was to be any true health in this country, the HHS would go the way of the dodo. It is up to the individual to become their own health mentor and savant. Trusting the government to provide health to a very sick country is not going to work as it is in fact that same government basically has driven the public into the clutches of ill-health.

TRUE Grassroots Movement to Put an End to ALL Vaccine Mandates Nationwide

I am organizing a TRUE Grassroots movement of vaccine injured families. We already have thousands of families on board; there will be 1000s more. We are bringing two Class Action Lawsuits against the federal government and the state governments. These Class Action lawsuits are about the Law, the most people do not know. These lawsuits have nothing to do with science or medical evidence. Because science has been lying for decades. The US Government has declared ALL Vaccines Unsafe in two legal documents. The 1986 Act and in a Supreme Court Ruling in 2011. Vaccine products cannot be mandated for school attendance. Also, the government has been granting Pharma liability protection illegally for 39 years according to the 1986 Act.

Two Historic Class Action Lawsuits You Can Join

If you or a family member has been injured by a vaccine, you can join in on Class Action Lawsuits against your state and the federal government. The details of both these Class Action Lawsuits are outlined in the email that was sent to Mary Holland, the Director of Children Health Defense, in my blog post. (I am not allowed to share links in comments.)

Kennedy is so far from what is needed that I think this alleged campaign to remove him is to keep people like you busy with things of no importance. I know you're impressed by him don't know why. Bringing lawsuits might be a good idea, but I fear you'll just waste a lot of time before seeing a decision from a corrupt wholly owned judge (or nine).

People need to stop participating in the u.s. gov't. Great, let them protect the market with but who are they protecting it for? Psychopaths like Bill Gates? Biggest money-making company ever seen. We need to learn how to create businesses which call for secret cooperation and contracts and obligations to psychopath run organization like the u.s. federal gov't. That just work. "They" use secret cooperation. It works because they own the federal gov't via Israel off-shore banks that they own. If you go in there expecting or hoping for justice you may get but you're more likely to burn resources because of the inherent injustice of the "system" that "system" is a word with a history. It refers to removing fecal matter from the public square. They've gotten that word wrong too, now using that system to keep fecal matter in the public square.

I'm surprised that in a country as populous as the USA they've only got 100,000 signatures showing support for this movement 100,000 is not very many. In the UK there is a petition for the imposition of digital IDs which had gathered by early October 2.7 million signatures, a reflection of enthusiasm on a much larger scale.

Of course mainstream pharma-medicine is against Kennedy. However, as one who has a biology (admittedly from decades ago), studied and applied Edgar Cayce suggestions an amount of herbalism personally, often with excellent results (but sometimes finding a sug personally harmful, though without lasting ill effects), and researched alternative approach cancer extensively and even paid for alternative cancer treatments for a friend, I find Kennedy unqualified based on his actions and words.

Science is a valid approach to validating and disproving theories. Yes, researchers have been especially when their studies are funded by Big Pharma. That doesn't make science invalid. The solution is not to choose people who don't understand the scientific process to produce research supporting a politically-motivated desired outcome. The solution is unbiased studies that refute or support studies already done. That is how science works.

Kennedy has defunded a great deal of university research that had already invested money on projects that were part way along. They cannot produce findings because they didn't reach their point. All the money spent to that point was wasted. Much as I don't like torturing animals in scientific research objectives, the loss of funding also caused many labs to kill their animals because 1) the experiments on the animals depended on examining the animals as time elapsed and there was no money to do that now, and 2) they couldn't afford to keep animals no longer used for now-terminated, defunded studies. We're talking about all sorts of research - cancer research, rare disease research, common disease research, regenerative medicine research. Now Kennedy wants new studies, which will in many cases use new animals, to study other hypotheses and theories, as if none of the other studies had any validity - without even looking to see what those other studies were but instead just cutting them unilaterally at huge waste.

Martix  Oct 27 Edited

Thank you, Sayer Ji, for your hardwork promoting authenticity, respect, transparency, mo accountability and real science into medicine. I do understand that those values are a dire to the scum bags fake doctors, psychopaths, satanic and blood suckers, that have infiltra medicine and turned it upside down, in a bid to protect their own entrenched evil interest: course those morons are utterly desperate, as they see that RFK Jr. is doing his utmost to the vulnerable children and teens from the pwases of those psychopaths and help the peop States and all over the world to wake up. The cabal is very worried, as they can see that t now question the official narratives coming from those who captured the medical practice malice and greed. We can understand that the same evil people, who make toxic meds to get filthy rich, will never want to make vaccines to prevent diseases, given that only sick p consume those toxic meds. The same evil people now fund allopathic medical schools. T despicable, but they are not as stupid to train medical students to cure patients, simply b cured patients will not want to keep consuming toxic meds.

Those psychopaths just want to destroy, for the sake of destroying to protect their own s interests. They know that at this moment we will not find anyone better than Trump and R steer the nation and navigate and mitigate the American health predicament. It is, and it l bad indeed!

Where, if not Trump, would you pick a candidate for the President. In the Democrat side, you pick? Would you find any one clean, not captured yet by Big Pharma, Big Food, Big C Big Tech? RFK Jr. would be an option, but we know how he was treated and, as a result, h left, causing an untold damage to the party. The party would not endorse anyone who is c competent, honest and independent.

Yes, you're right! It is RFK Jr. who injected billions of people with biological weapons destruction disguised into vaccines. It was him that injected millions of children with metals-loaded vaccines to make them autistic and to create chronic diseases. It was licensed agrochemicals to cause endocrine disruptions and create gender dysphoria reduce population. It was him that sent 46 labs to Ukraine and funded Whuan lab with his money without consent. It was him that trained medical doctors to fill up our child poisons. It was him that created the new coronavirus and prepared to create plander and worked on cv shots for 19 years and tested them on animals, which all died during experiment. He is multibillionair with Big-Pharma's fundings. Oops, I mean your guys that. They must be satanic, yes? They want to boot RFK Jr. because he dared to boo Grow up, please!

 LIKE  REPLY (1)

Lord Vetinari  Lord Vetinari Oct 29

You're correct, he didn't do those things; nobody did 🤔 For some reason that I fathom, the news outlets have been reporting on the things he HAS BEEN doing they're no big deal, and the only thing I can think of is that they don't see it yet (they'd have to be blind to miss it):

-Despite all of his (and your) crackpot anti-vaccine conspiracy theories having been roundly debunked by peer-reviewed studies performed by reputable scientists from around the world, he continues to push the same misinformation.

-He personally has a standing referral agreement with a law firm that specializes in vaccine-related lawsuits (Wisner Baum), under which he receives 10% of the fee charge on any case he refers to them; a fact that he disclosed during his confirmation hearings. So he's got a significant personal incentive to increase the number of lawsuits that are successful (regardless of whether they're legitimate or not). He has made about \$2.5 million through that agreement over the last 2 years. He doesn't want vaccines, he admitted that if he were to have a child today, he would have them vaccinated against measles (after being pressed on the question during Congressional testimony). He wants the firm to have government backed "research" to support frivolous claims.

- He has stated that he intends to ban all government-employed researchers from publishing in any of the 3 most highly regarded and widely-used medical journals which he refers to as "corrupt", and will instead create an "internal medical journal" for government researchers, which is run by him.

- Getting published in a respected medical journal is a huge deal for any researcher, and that's no small thing to strip government researchers of, and I suspect it will be a
