This is a thankless task for you I know, but thank you for saying the quiet part out loud. What I noticed is an epidemic of friends needing hip replacements. In their 60's to late 70's. Like they should be in my circle. When I was growing up I don't remember any of my elderly relatives needing a hip replacement. The other thing is severe neurological issues. BOTH of my neighbors. Dear people with everything from "autoimmune disease" to vertigo to POTS. No idea why. I have had two or three good friends say they are frightened that they can't remember things they used to. Age 52 to 70. I assure them that we all have memory slips but secretly I am one of them. Two relatives developed heart issues in the past 4 years. And have you noticed how common phone "hold" messages that need to say "We will not tolerate rude or disrespectful language from our client services" or something along that line. When did we need that? And what could it be doing to the minds of our children? Among my teen acquaintances, a heartbreaking increase of flu-like colds necessitating weeks off throughout the year. One teen had difficulty reading music for weeks following her second or third shot, and couldn't play the trumpet because the air pressure gave her crushing headaches for months. Oh and I forgot - her younger sister (age 11) suddenly developed juvenile diabetes. The specialist who diagnosed her said they are noticing an increase in new onset diabetes and suspect one of the causes is the vaccine. I do believe "they" are killing us bit by bit, and no one is commenting on these unusual changes in health. I mean, I don't blame

who naively trusted the authorities. Imagine if you had to face the truth that something you took has contributed to a total decline in your health. Imagine the terror. I have a great deal of compassion for those who took the shot. Even though I believe "shedding" means I too am affected. We are all in this together sadly.

Oh I am SO sorry. My son also took the shots. I wonder if he suspects. Because he has become very health conscious in the past couple of years. It's so hard! I have a daughter who is a huge believer who now has to care for her 40 year old daughter part time because she has POTS and must recline constantly. I hope your son is able to get some help.

Most vaccine damage is irreversible. Once the brain and the entire neurological system has been severely damaged by vaccines, it's capacities can NEVER be retrieved. Full-blown autism is simply the tip of the iceberg of the enormous neurological damage that has been perpetrated on contemporary humanity.

How can it be that you, the father, are far more aware of vaccines' toxicity than your son? That seems very strange to me!

Was he vaccinated as a child, routinely, as almost all of us were? Did you resist those routine vaccinations, when your beloved son was a child?

Never in my entire life has a doctor...my doctor called me and told get the vaccine early because of my age, and I needed to come in made me wonder what the hell was going on from the beginning. I didn't resist childhood vaccines because there were very few at the time. This was 1971 and 1972. I remember the kids getting two vaccines most. This was from the family doctor who also delivered my wife. I remember getting one flu vaccine when I worked at Mitsubishi Motors years ago. So I am not hooked into the medical system. I was and kind of person to get sick. I can't remember the last time I was sick. I am the type of person who investigates and wants to know what is going on. I have not had a TV for 30 years now. Both of my sons are "hooked into the system" conformists. So they are not going to listen to their own father, who reads and writes poetry.

After years of reading and following the subjects surrounding the flu, I am without a doubt very knowledgeable about it and its effects. I understand the delivery system and its effects on the human body. And finally, I understand that the combination of the vaccine adverse reactions and the coming immune escape virus variant will wipe out a percentage of our population.

So sorry. I too warned younger relatives, but they couldn't believe there was anything funny about the shots. Since I was objecting to what they were hearing on TV from "authorities," and the consensus among their peer groups, they seem to have blindly concluded that I, who they seem to have previously highly respected, had suddenly become a kook. Well, it's the learning planet.

I was always a bit of an odd ball to my kids. All that reading books and not h made me different from most people. My doctor called me early on and tol could get the injection early because of my age. I immediately started inves because this didn't feel right to me. A month later, I told my kids to not get injection under any circumstances. They of course, didn't listen to me. So if they weren't warned because they were. Now, I have to sit here wondering gonna get the call. I think my ex-wife will be the first one who needs to be k only knows how many injections she's taken. I just know that I did what I ne do. Thanks...I am sorry to hear about your losses. We are all going through collective trauma. And it is deeply affecting us in ways we can't understand. We will never be the same. This reminds me of the 1st World War. A resident recounted the trains of wounded coming from the front on a regular basis. Just one such train was pulling 60 cars of wounded from the front. The government didn't want to let the people know the extent of the carnage, so they did their best to censor as much information as they could. The newspapers were full of positive news from the front. I think that support for the war would collapse if their people knew the truth. The authorities of today know that if the people were to find out what happened, there would be riots and lots of hangings. This is why they are silent. Maintaining their world and their power depends on it.

Probably 12th. I do not exaggerate. Now looks like death warmed over, skeletal, bad case of thrombocytopenia. The other has a whole menu's worth of food allergies and spends hours every day in the bathroom. They wouldn't dream of missing a booster.

I remain vaccine free since my shingles shot in 2010 (flu in 2008) and have been mostly isolated from friends and family since I retired from RTX in 2009. I just received my annual pension notice and noticed something very interesting. The plan was funded 105% in 2023 and 211% last year. Participants and beneficiaries receiving benefits were 164,151 in 2024 and 108,203 last year. Those entitled to future benefits went from 64,703 in 2024 to 56,659 last year. There might be other influencing factors, but not the trend I would expect.

Good article. This needs to be documented but it's hard to read and even harder to acknowledge the implications.

I suspect that we could gather many, probably millions, of testimonials regarding the toxic injections, yet that would be just the "tip of the iceberg".

The "vaccine drive" was launched with the National Childhood Vaccine Injury Act of 1986 then, it has been a relentless stream of injuries that are almost completely ignored. And when injuries cannot be ignored, the vaccine connection is simply denied.

In 2003, my 3-year-old son got an MMR injection (at a "wellness visit") and quickly descended into autism. The immediate, knee-jerk reaction of his healthcare providers was that while they had no idea what could have caused the rapid deterioration, they were absolutely certain that it could not possibly have anything to do with the chemical that they recently injected into him.

Their message to me was - You cannot believe what is obvious right in front of you. You can only believe what we say. It was like George Orwell said of Big Brother:

"The party told you to reject the evidence of your eyes and ears. It was their final, most effective command."

The root is excellent to use but a good organic source from health food store is best if it's strong but many may not. You'll find your balance. I do 1/2 cup of water with a level teaspoon of turmeric. The key is to heat those two with some fresh grated ginger after it boils let it steep a bit. I turn it on and off for a few minutes. Then add the black pepper and honey. You'll have to brush your teeth directly after as it stains but it's not a problem. I never forget that little prayer of gratitude as I drink it. I believe one of the problems preventing people from seeing the trouble with the vax is th who have had the vax have no visible symptoms or problems (the personality changes no withstanding), I firmly believe there were “placebos” in many of the needles deliberately t off the trail. Also, the jab causes so many commonly known causes of death that many ca our argument that it was the jab that instigated/accelerated the death.

Many women have post-shot bleeding issues, not a topic for general workplace table conversation. Also, in many professions, namely the more competitive one anyone know that you have any physical or mental problem whatsoever can be a business. Yes, there are people who will rattle on about a splinter in their pinky finger there are also many people who will be at death's door at pain level 10 and they show their beautiful teeth and say they feel GREAT.

Initially I was quite struck by how in 2021-2023 I knew of all these people dying and also I knew so many people having sudden onset cardiac and neurological issues at the same time, I'd see people at, say, a wedding, and they all looked fine. Now first of all, in any gathering, I need to consider all the people I DON'T see because they're dead or they were invited but had to cancel because they're too sick to attend; secondly, a lot of people who look fine may be suffering from one thing or another that's not obvious and they're not telling me and I'm not asking, either. I have had a large number of people whom I thought were fine tell me, in private conversation, that they had severe problems (mainly cardiac, neurological, and GI) that started in 2021 or 2022. "Doctors are baffled."

This work is still so incredibly important! I do my best to support the handful of people w/ there still working on this issue. We all need to keep supporting them in whatever way we if all we can afford is a repost or a share, then we need to do it. We cannot "move on" from until we know it will **never** happen again. Until there are some **real** monsters put under the rest of their lives. When I say monsters, I mean **anyone**... Government "official", "Sci "Doktor", "Nurse", "Teacher", **anyone** who either knowingly or by using "following ze or excuses after seeing what was happening... **anyone** who collaborated with this by going with it. I'll pitch in to help build the prison we will need for all of them.

I know 7 people who have either been injured and/or have never been the same after the effective". Two of them I've known for 15 years and they are not the same people. It is so put into words how much different they are. It is like they are husks. They no longer have humor, or anything they used to have. It is weird and uncanny.

No... we cannot and should not "move on" from "covid." These monsters are not done with why should we just "move on?" They haven't forgotten what they learned, and they are rubbing their hands together with glee at the prospects of another "pandemic." We **cannot** allow happen again.

Do not comply. No matter how difficult it gets. Be willing to lose everything on your terms for principle. If you aren't willing to lose everything on your terms, it **will** be taken away from you anyway on someone else's. It's much easier to make up your mind that you are going to stand for something then have some monster determine what you are going to believe and stand for.

I gave up 6 figures to not comply. It sucked. But, 6 years later, I've never been happier in my life. Yeah, we use rags instead of paper towels. All of our vehicles are old and used. We don't eat on lobster and steaks once a week anymore. But we are as free as we can be in this sick world. We have clean blood. June 2025 my very fit 75-year-old Pilates classmate (who never smoked) died from a super aggressive lung cancer.

As for injuries two of my friends had detached retinas. Two family friends, (a couple), both had strokes. My Pilates instructor & her boyfriend decided to travel in 2023 & heavily vaxxed. In 2023 year he was diagnosed with Prostate cancer; she has had a bad cold or a bad cough ever since. In 2023 months since then. Almost nobody can see the spray lines covering the sky (everywhere) either, Mark. Nor can most people see that the A.I. takeover is not an organic happening but is clearly perpetrated by monsters (whoever they are) that are running this shitshow. This Donald Trump bobblehead is another utterly fake modern manifestation. What's a sane person to do when surrounded by utter madness? You do your part every week to get the message out, and God Bless you for it. But it seems that we are not going to get through this ever bleaker destruction derby until we lie bleeding on the floor. Will anybody notice?

After the swine flu vaccine debacle in 1976, I felt confident that the experimental Covid vaccine would debilitate and or kill recipients so I decided early on I would opt out. I told my husband, sisters and brother that they should avoid the shots, and I also warned them of the danger of wearing masks. My younger sister got the first shot early on because she works for the military and she became violently ill and missed a couple of weeks of work. Even though she had an adverse reaction, she was required to get the second shot, and she again became violently ill. She was sick for more than a year. After her second shot my older sister had a swollen lymph node on the left side of her neck which was the size of a chicken egg. She and her doctor couldn't understand what may have caused it and why it wouldn't respond to medication. Hmmm?? Shortly after the first booster, my brother-in-law developed dementia (age 66) and he was wearing diapers and was completely unable to care for himself within a period of six months. In June 2021, my husband's sister texted me on a Sunday morning to badger me into getting the shot. I finally blocked her number. My husband was annoyed with me for being so adamantly opposed to all of the things that accompanied the alleged "pandemic". Today my husband and his two siblings, who, are still getting their covid booster shots along with their flu and RSV shots, all have cancer at various stages.

Greatly appreciate the work you do documenting the victims of the democidal agenda of parasite ruling globalists!

My comment putting the personal tragedies into a wider context.

Can't say this often enough!

It was NEVER about health! The Powers That Should Not Be were ALWAYS about MAXIMUM PROFITS and they want you DEAD or a SLAVE! This is a painful truth to accept but we the people must wake up and fight back! And poisoning the food supply and toxic injections/pills were a huge part of their arsenal!

MISTAKES WERE NOT MADE! THEY can't get rid of the 'useless eaters' fast enough!

Peddling pure WORTHLESS poison! Folks have to wake up to reality: health comes from a diet, daily exercise and clean living and never from a needle or a pill except in dire, rare traumatic injuries.

Proudly ANTI-VAXX! Reiterating for the sake of newbies and to support this post.

Ban all vaccine jabs! There has never been a 'safe and effective' vaccine since Edward Jenner's smallpox vaccine over 200 years ago as per 'Dissolving Illusions' by Suzanne Humphries and 'Turtles Way Down' by Anonymous. Health can never come from a needle or pills, but from healthy exercise and healthy living! virustruth.net

CREATIVITY! ARTISTRY! IMAGINATION! SPIRITUALITY! HUMOR! LOVING KINDNESS! The best ways to fight THEM!

I also have a landline, a wired laptop and a wired monitor screen, and I never had or will have any of the infernal mobile devices designed to enslave you. I also use cash as much as possible, no CREDIT CARDS. NO TOTAL SLAVERY.

It is heartbreaking to witness the holocausts happening and so many fellow citizens are brainwashed/bamboozled by the propaganda media, they are oblivious!

This horrifying Congress Critters, Gates, Governor 'Gruesome Newscum', 'Lone Scum', 'Sinner', 'Benedict' Biden and Harris and even Trump, Vance, and 'Ramaswampy' et al are blatant puppets owned and operated puppets of their globalist technocrat parasite masters same as other numerous 'PUBLIC SERPENTS' infesting by design from above, the bureaucratic apparatus of The Military/Industrial Complex and the Biowarfare/industrial Complex, WEF agenda and the forces assaulting humanity are from one and the same source - it is the 99% against the diabolical interests of the 0.01% who should not be in charge of anything!

The monsters in human skin suits who rule the world get a sadistic vampiric thrill and become perpetrators of the vilest most demonic crimes against the most vulnerable (babies and small children) and then corrupting the system to get away with it scot free! We the People must stop them. There are a lot more of us than them!

You are the chronicler of the COVID Holocaust. Millions dead, Tens if not hundreds of millions permanently sickened or disabled. Rancourt's data provides the documentation for the numbers. You provide the personal stories, the blood and tears, the unearthed bones of the dead. What you have created is a necropsy of the COVID era. It will live on so we can never forget with the Shoah, it is not forgotten, but likely will repeat, to give truth to Hegel, who once said we learn from history that we do not learn from history. But for those who read history, that will not be in vain. Thanks for your work, Mark.

I see others here are secondin' mah com'mint 'bout shattered hips...(whut IS that about?! I know TWO young'uns under 30 (both girls) gettin' hip replacements--they're performers neither are prima ballerinas either... this should happen ta perhaps a 78 year old, not a 28. The aggression & the dullin' of senses an' perception is easy ta see now.... a 20-somthin' hitta our car in gas station lot a couple daze ago an' tho' 'twas clear she wuz not on drugs she looked purdy stunned... didnt' even say "sorry"--jus' gave my hubby the insurance card an' wandered off... ain't normal....

I know several people who were probably murdered by these needles, one very-jabbed neighbor's health has been devastated, and some others whose deaths / illnesses may have been preventable. My Mom was a devout disciple of the Vaccine Religion, and the Team Democrat narrative from the pain of cancer treatment in October 2024. She had gotten a 3rd booster / 5th shot

December 2023 - one month before her mouth started bothering her again, which led to March that showed her cancer had returned, in a different, more aggressive (but also not "turbo") form.

She had mouth cancer first in 2017. She smoked when younger, she hadn't smoked in alr years. The cancer returned in 2019, and was again surgically removed. A few years later, : remission, she was told it was unlikely her mouth cancer would return.

Perhaps it would have returned at some point anyway, but jabs are especially adept at wa cancers from remission and bringing them out to destroy lives.

I tried with Mom, it also made us more distant because it broke my heart the lies she was and it broke her heart that I had fallen into "far right conspiracy theories" (none of that wa She didn't want to hear or read any of what I shared, once in awhile she'd read something don't think she tried to process it. Yet she was capable of reading all of Barbara Streisanc 1,000 page book (Mom was very, very Team Blue). Her mind was sharper than the presid United States at the time.

I wrote this for her last Mother's Day, about the one mechanism of action for cancer that I her to understand since 2021 - how by design the shots compromise the Same parts of tl system that keep cancer in check. I thought it was one of several mechanisms of action. I there's more.

This is her obituary -

~~ Other deaths ~~

Friend's mother - Also devout disciple of the Vaccine Religion, encouraged vaccination, f unvaccinated, seemed to consider the NY Times a Bible. Multiple boosters. She was sick cancer that metastisized, and she had to delay treatment due to blood clots.

Other friend's family member - Mid 60's - over 65, booster-eligible by then, vaccinated, a surely boosted, died completely unexpectedly in his recliner, Spring of 2021.

Cousin - Died of a heart attack in September of 2022, 60 years old. Vax'd, boosted. She c lot of other health problems, for many years. She was recently in the hospital and had bec better. She would have been eligible for early boosters because of her medical problems. and/or murderous calculation). She was obese, and sick enough that she may have died a also a poison shot could have done her in.
