

# First- and secondhand accounts of the ongoing "vaccine" massacre in the United States

See what just a few people have seen with their own eyes, or heard about from reliable sources, since the "vaccination" drive began. And millions all around the world continue to tell such stories.

Is there anyone who *couldn't* tell such stories? They *must* be told, to give us evidence of the gravest crime against humanity since human history began. Certainly the press, with very few exceptions, has blacked out this mega-

Holocaust, and, by and large, academics too have turned away from it. And recording this vast horror is up to us, lest people keep on seeing it as “normal” that its perpetrators finally get away with it.

I ask all who read this post to share it far and wide, to get still others to tell *they've* seen or heard of from trustworthy friends, loved ones, doctors or whomever else has recognized what's happening. It would be especially helpful to know similar stories from abroad, since “COVID” was an unprecedented triumph of *global* propaganda; and so we badly need a *global* archive of such evidence, the day when there's so much of it that it will be impossible to keep denying it, at which point we'll start to see *accountability* at last.

And we also need to stop allowing “our free press” and “social media” to distract us, with (for instance) Trump's decline, the Epstein files, the next elections and the like—all important stories, surely; but they should not be uppermost in our minds. The fact is that *they're killing us deliberately*, for the purpose of world depopulation; and it isn't just the “sudden deaths” and “rare” diseases that have caused a *global population crash*, but, as well, the spike in “vaccine”-related stillbirths and miscarriages, suicides and homicides, and mysterious deaths and “drownings,” and lethal “vaccidents” on city streets and country roads, highways, and at airports, and in the air.

(I believe there's solid evidence that “vaccination” also kills the moral sense

makes for an insane belligerence—as in Trump’s cabinet [and Trump himself throughout the Democratic Party, a fervent “vaccination” cult; and Israel (repressive from its founding, but, since Netanyahu forced his entire people jabbed for Pfizer’s sake, now more virulent than ever in its violence and ruthlessness and Russia/Ukraine [the former with a “vaccination” rate of up to 60%, the latter with a rate of roughly 45%]. Just as we’ve seen wild “altercations” spike and random acts of murderous violence on our streets and in the subways, entire nations turned barbaric under COVID “vaccination.”)

In any case, we need a global “vaccination” databank to make it clear *to all* those “vaccines” have done, and to provide as much hard evidence as possible to make the case against its psychopathic authors.

[Bobby Roland:](#)

*OH, you wanted stories? The **bartender** where I was playing piano... **42, perfectly healthy, dropped dead of a “Brain Bleed” caught on camera.** I know **two jabbed medical personnel, both female, who recently came down with **Thyroid Cancer.*****

their **early 40's**. One swears it was from the **job**. **Every member of my group can give you dozens of examples!**

[IKnewSinceMarch2020:](#)

In the office where I work (head count around 70): **one scientist died suddenly in his 40s** in about 2022 (unfortunately a mother of a young child), and one other scientist **died suddenly (50s)** very soon after, also leaving behind a child of less than 10 years. One intern in his 20s had to go to the funeral of his best friend, who had **died suddenly "multiple blood clots"**, (which the intern put down to him smoking and drinking too much) a week after that happened almost the exact same event **happened again** when I was at a conference and one of my close friends/associates was called away from the conference because **his best friend from school days had dropped dead of a heart stoppage**, it was revealed he was also **"full of clots"**.

**Two** people still at the office have had **facial paralysis**, one severely (he was may have been a doctor). Other people at the office seem to just have days off for **extended sickness/flu on a frequent basis**. On my linkedin account, where I have about 1,000 contacts, I can find about **six deaths in 2022-3** of people I knew personally or by reputation, where previously I had only come across one death in maybe 10+ years of being on LinkedIn (suicide); mostly these deaths were people in their **60s-70s**, but some were younger. My partner, who took two AZ c0viD shots before I was her partner and stopped her from getting more, has had a **period of deafness, one eye slightly closed for a period of weeks, joint problems, heart tremors, and a kidney issue** for which she is still having check-ups. She is **45** (now) and was **previously healthy**. My neighbour 3 doors up had stage 3 **cancer** but has survived so far. My partner's next door neighbour had stage 4 **cancer** (in her 40s) and **died**.

I know **two** people who have **brain tumour** (one the father of a colleague in my office and one the wife of my only golfing buddy from a local golf club. **Two** of my three remaining aunts have been affected - **one died of liver failure, the other has stomach cancer** but is still alive, I believe. One of my two uncles has **prostate cancer**. I count really close friends from school days who I still see, and out of those **both had a heart attack** - one of **cancer** previously in remission, the other of **liver failure**. At my medical class, which I go to weekly, there have been **waves of people going to funerals, various illnesses** (including **clots** meaning people wore medical boots), and **several deaths**, within that fairly small community of perhaps 120. One of the teachers went home to her motherland of **Australia**, and when she was back she told me that she had been to **many funerals**” and that it was shocking, (but still **no penny dropped** even though she knows I have spoken out about the shots before). My mother was **forcibly given the shots** **against her will**, while in hospital, and since she has had **heart failure** and seems to have **accelerated dementia and depression**.

Two of my friends are **radiation therapists** and reported to me at their own initiative that they were seeing a **massive number of severe cancers** in incredibly **young people** but again **refused to ponder why** or entertain any of my “scary theories” as obviously true. Finally, during the lockdowns in the UK, I started an “online beers” session with **three** of my professor friends from around the UK. **All three took the shots. All three have had fairly severe issues** - two have **heart problems** which means they have had surgery and medication, and the other has/had **kidney stones** and was not allowed to work for at least weeks. They are all between **40 and 50**. If I went to wider circles like the other people or friends of others then this carnage would be even larger, but this list shows **rare things happening** (including **sudden deaths**) to people at **very young ages** in a quite small circle of either immediate acquaintances or their friends and relations (only when that gets my attention because it is a **death**). From all of that list only

person acknowledges it is the shot - the golf buddy whose wife has **brain cancer**. **rest are in denial or ignorance.**

Two other things I forgot. Several people have told me that they can **no longer hear** **decipher conversations in a moderately noisy atmosphere** such as the office lounge or a bar.

And one person has seemingly **accelerated ageing**. She is **52-53**, but has gone from looking 45 to **looking 75**. She is a nurse and had severe reactions to the **second jab** that I sent her a batch of ivermectin and other things because I thought she might **die**.

[Reader East of Albuquerque :](#)

**Every week**, and oftentimes several times a week, I encounter a colleague, a neighbor, catch up with family or old friends and I get **some story of a sudden death, a tumor, cancer, and/or some sort of "baffling" neurological, cardiac, GI tract, and musculoskeletal issues**. Two weeks ago it was a neighbor who'd had **3 strokes** and a colleague who suddenly **could not fathom what day of the week it is**. Last week it was a colleague's wife who suddenly, circa 2021, **can't walk more than a few steps** and needs a cane. Today, my teacher tells me about another student of his, a man whose **hand is wasting away**. I don't keep track. **It's been like this since 2021**.

[peggy bean:](#)

I've lost good friends to the vax. One friend **died an agonizing death** from an infection of her **spinal fluid**, which is **transverse myelitis**. Horrible. Another friend just had a **stroke**. She felt so guilty because her spouse told her it was because of her poor diet, but it is anything but poor. I explained to her it was from the vaccine and boosters. I thi

made her feel a little less guilty because **her doctor more or less made her take** friends have developed a **fib** from the shot. So sad. I don't mind telling people who believe to be true.

**DUANE HAYES:**

First hand experience, my brilliant aero **physicist** cousin, several degrees, **lost her** a few months went to **3 year old intellect**. She was a **college professor** when she

**Teri :**

I live in the Seattle area where the covid vaccination rate was 88% for the first dose 84% for the second (and in one city the vaccination rate was 99% for the first dose 96% for the second). I don't do any vaccinations and living in this area was a **survery disturbing experience**. In ultra liberal Washington state there was **no problem excluding certain people** from many aspects of every day life (going to events, eating at restaurants, etc.). Even when it became clear that **the jabs didn't prevent infection, hospitalization or death** people **lined up** for more and totally dismissed any claims of vaccine injury (**even for those who died immediately following an injection**). I felt **totally alone** in my beliefs and was thrilled to learn of a medical freedom group which I joined. As the years have gone by I have known **multiple people** who have been diagnosed with **serious health issues and/or died** seemingly as a result of **covid jabs**. There is **total denial** that this could be a possibility - no one even considers or discusses it!

**Priscilla Schwartz:**

**I lost 4 cousins within 9 months** over 2024/2025. **3 to rapid cancers and one to** **Two friends** in 2022, as they were getting jabs/booster (1 developed fast acting A

other hospitalized with COVID and put on a **vent**). Many relatives with **heart iss** requiring medical inquiries. No real answers given, and so far no further issues th aware of. I'm hoping for the best for everyone.

Donald Wood:

Spoke to a good friend who lives in Utah about this (he is awake) we count **17 fri family members** who suffer we think from the **vaxx**, most of them were vaxx jock had lots of boosters ages **30-79 years.No** deaths but several **just hanging on.**

The Outlaw:

I too have been afflicted by this Madness as they **Forcible Jabbed** my then **95 Ye** Momma when she was **Incapacitated**, non-verbal and Paralyzed following a Strc  
“Momma, I told you not to take the Jab! I didn't have Much of a Choice, now did fine now at 100 years old but my Younger Brother has **Full Blown Dementia, C** will be **Dead** soon--

Daisy Moses Chief Crackpot:

Mah best/oldest friend has **breast cancer** an' wuz so sick from the radiation “trea she **couldn't git up** fer a few weeks--this **ain't normal** fer a gal **under 60** “former **great health** (eats right, exercises, but took all've her dang jabs AND the roosters did try ta warn ‘er...now it's **too late** ta say sumthin'...)...Also, at mah Ma's eldercc **they keep breakin' hips** thar too--I mean they're all oldsters, sure, an' less steady feets, but seems that **EACH time they fall they simply break a hip**--Bones **shat** like dropped measurin' cups on kitchen tile. Ma's neighbor fell on CARPET an' **b her hip!** How kin this be? Oldsters are **fallin' apart**, middle-aged-sters 're all gett **cancers** (lost an'nuther good friend last year at **52!**), an' even the **under 30's** are c

apart at the seams--literally--**bustin' up the joint-s!** I've no doubt all of the above  
their fall flu shots an' will be lining up for Hanta in his Slay (jingle jingle of coins and  
bells....) soon as the vaccine comes out...

Not Me:

**Lost 3 family members in 2 months. 2 to Turbo cancer and 1 to heart failure.  
jabbed.**

Charisse:

*I have a neighbor whom I will not talk to anymore, but when I told her to stop getting  
jabbed she said I've taken every vaccine they have & if they come out with more I  
**going to take them.** Anyways I can't be around ppl like that, plus she seems to have  
**gotten snappier & violent.***

This is a thankless task for you I know, but thank you for saying the quiet part out loud. I have noticed is an epidemic of friends needing hip replacements. In their 60's to late 70's. Like I should be in my circle. When I was growing up I don't remember any of my elderly relatives needing a hip replacement. The other thing is severe neurological issues. BOTH of my

Dear people with everything from "autoimmune disease" to vertigo to POTS. No idea w  
have had two or three good friends say they are frightened that they can't remember th  
they used to. Age 52 to 70. I assure them that we all have memory slips but secretly I a  
them. Two relatives developed heart issues in the past 4 years. And have you noticed h  
phone "hold" messages that need to say "We will not tolerate rude or disrespectful lan  
client services" or something along that line. When did we need that? And what could i  
the minds of our children? Among my teen acquaintances, a heartbreaking increase of  
colds necessitating weeks off throughout the year. One teen had difficulty reading mus  
weeks following her second or third shot, and couldn't play the trumpet because the ai  
gave her crushing headaches for months. Oh and I forgot - her younger sister (age 11)  
developed juvenile diabetes. The specialist who diagnosed her said they are noticing a  
new onset diabetes and suspect one of the causes the vaccine. I do believe "they" are  
by bit, and no one is commenting on these unusual changes in health. I mean, I don't b  
who naively trusted the authorities. Imagine if you had to face the truth that something  
took has contributed to a total decline in your health. Imagine the terror. I have a great  
compassion for those who took the shot. Even though I believe "shedding" means I toc  
We are all in this together sadly.

Had a good friend in California who was healthy, a bit overweight, but got jabbed with t  
and then a third becuase she felt compelled to, to keep catering. Within 45 days of the  
developed spontaneous Creutzfeldt-Jakob disease (CJD), had to check in to a hospital  
dead within 30 days. Tragic.
