

Mad Dog Massachusetts hearing on revoking...

MERYL NASS JUN 4 ❤️ 66 🗨️ 27 🔄 13

Consider speaking up against proposed state laws. Only 4 states currently offer no religious exemption to vaccination: CT, NY, ME and CA

Why do you need a religious exemption? It's simple, my body my choice. Isn't that the abortion line?

Because killer vaccines come with a "Good of the people adverting" scam, & pharma needs the money!

Thank you for YOUR help! Had a terrific informative Greater Boston Brownstone supper club with Health Action MA last night, making clear what is at stake here. As a result several people there said they will testify, and I imagine most will be writing their legislators. You do NOT have to be a resident to make your voice heard Friday. All eyes on Massachusetts!

 **Elizabeth Hart** Vaccination is political 4d ...
There should not be ANY exemptions to vaccination, religious or otherwise.
Because vaccinators have a moral, ethical and legal obligation to obtain valid voluntary informed consent for vaccination, so how can there be 'exemptions' to NOT have a medical intervention, i.e. vaccination.
This is the dynamite issue that is waiting to explode...
There is NO VALID CONSENT for vaccination, as it's impossible for vaccinators to obtain valid voluntary informed consent for vaccination from people who are being pressured, coerced, manipulated and even MANDATED to submit to the intervention.

I see your superb point. I come at it from a slight different angle for all vaccines. An informed consent document should include all vaccine ingredients (+ percentages), all adverse reactions and number of children experiencing them and also including deaths put into the context of number of deaths from the actual disease over a period of time. Vaccinators should also sign informed consent document stating they're not paid extra for this, plus they've read the patient's consent document; and if applicable, they're aware drug companies have indemnity from liability.

 **Mark Smith** 4d ...
What moral obligation? If the vaccine actually works, why does it matter? Isn't there an abortion line - my body, my choice?

What do you not understand about my comment?
Do you not comprehend practitioners have a moral, ethical and legal obligation to obtain valid voluntary informed consent before they intervene with someone's body?
In regard to 'exemptions' for vaccination, see my email to the Australian health minister, sent in 2023, and a matter I am still pursuing: Doctor Mark Hobart suspended for issuing Covid-19 vaccination exemptions...but vaccination exemptions should not exist!
<https://vaccinationispolitical.net/wp-content/uploads/2023/11/doctor-mark-hobart-suspended-for-issuing-covid-19-vaccination-exemptions.pdf>
Again, there is NO VALID CONSENT for vaccination.
And if vaccinators have not obtained valid consent, this raises liability issues, see for example: Vaccinators DO NOT have specific medical indemnity for administering COVID-19 vaccines in Australia: <https://elizabethhart.substack.com/p/vaccinators-do-not-have-specific>

Vaccinators should prosecute when they harm and kill people! When they fail to inform of all the possible harms! But you have to sue fraudulent evil mass killing and harming big pharma just to get the real death & adverse information! (Not mention the ingredients, like aborted fetal tissues mercury squallines etc.) How sick is that?

This is not an issue of religious liberty. It's about personal autonomy. I should not have to inject anything into my body if I don't want to. Nobody should have to.

CT, NY, ME and CA should be prefixed with Peoples' Republics of CT, NY, ME and CA
I'm rather shocked but slightly relieved that NJ is not on the list because it certainly fulfills most required criteria to get the coveted Peoples' Republic of NJ label
How much longer must NJ suffer such a duss?
SERIOUSLY, they're really trying! NJ has taxes that can compete with the best and offers sanctuary status so that the NJ residents can feel like fools for following the rules
What more must NJ do?
Just let them know and surely they'll comply.
Certainly Rutgers of NJ fame in the home town of J&J was rather draconian about their clot shot mandates. Doesn't THAT bit of malicious potentially murderous show of authority count for something?!!
Considering the looming presence of J&J and the medical schools in Rutgers certainly they must have had an inkling as to the harm of COVID clot shots to college age kids. Particularly the risk of myocarditis to athletic males. Knowing all that they mandated clot shots anyway. The sheer callous reckless indifference to the harm they knew they were mandating should score some points, shouldn't it? How can that not impress? What does it take to earn Peoples' Republic status?
I'm sure many in NJ governance must feel very sad because they really made a good faith effort to be a legitimate Peoples' Republic and must feel it is unfair that the states to the north always get the attention
States can't even get justice in their efforts to be universally unjust.
States must be feeling frustrated

These 4 states have adder-tongued AG's who protect their governors through thick and thin. I must confess we in CT look on in awe at the shenanigans that are pulled constantly in Massachusetts.

In late 2019, there was actually an attempt to remove vaccine exemptions from NJ but the initiative thankfully failed due to public backlash. They also tried targeting New Mexico, Minnesota, Wisconsin, Oregon, and Illinois but efforts failed there too. Sadly, the backlash was not strong enough in California, New York, Maine, and Connecticut and the attacks on medical freedom in those states succeeded.

These are just some of the proposals on the bills that were mentioned in this article:
- Minors will be allowed to receive a vaccine without parental consent
- Religious exemptions will be removed
- Medical exemptions will become much harder to get
- Gives unelected officials in the Department of Public Health the power to change vaccine requirements at any time
- Will stigmatize schools and programs with high exemption rates by labeling them as "Elevated Risk"
Please fight against these bills!

No one should need an exemption (permission slip) to reject having "any" substance, treatment, procedure, or mRNA/saMRNA gene therapy injection done to their bodies. Period. None of us should "ever" have to beg for "permission" to keep our bodies our own. I haven't ever asked permission and I never will ask permission to say no. They can throw me in jail, fine me, quarantine me, or put me in one of their camps. We need to have courage and just start saying, um... hell no! to these monsters. If the people would start rejecting all of this crap, it would stop.

My only gripe with religious freedom is that many practices etc. are labeled religious in nature. Just look at the satanic practices, sharia law etc. I would qualify freedom in that it must not contradict the Supreme Court and the very foundation of rights and law which were founded upon the Ten Commandments.
