Nanos are real. The geoengineering nanometals have been sampled in enough place times, for long enough, by enough qualified people outside the matrix. The technology enable the controllers are plain enough to see in action, almost every day.

Adjust the tense from "are going" to (has been) and it's a ringer.

One good thing Jon, I would not be surprised if there is a "question authority" bumper sticker on your car.

Remembered seeing them way back and at an age I didn't understand fully. Years later standing at those stupid 6' marks waiting to buy a few left over scraps of food on a shelf I wondered how those older standing obediently with their ridiculous oxygen robber had the "question authority" bumper stickers on their cars as a young adult.

I think I entered the world with one of those bumper stickers stuck to my bumper.

RFK Jr. is obviously being blackmailed and /or other threats.

"Obviously"? Not not obvious to me. There is no level of blackmail or threat that could be bigger than the health of billions of people. Oh, they threatened to kill him? His wife and kids? Who cares. Totally irrelevant. Those are a handful compared to billions.

Nobody should take a job of responsibility if they don't have the ability to respond appropriate to the level required.

He's controlled op. That's the only actually logical conclusion here. We're too far into it. He's at the TOP of that agency!

This whole thing now...Trump/Epstein, MAHA, getting to the bottom of serious things... is like it is just a great, YUGE! distraction from something else. Heads on swivels folks...

Its so much worse than just the mRNA jabs. Everyone, jabbed or not has graphene oxide them. Its in our food, water and in the chemtrails. GO becomes rGO (reduced graphene o exposed to 5G frequencies. rGO is electrically active and causes inflammation, clotting a damage etc.The process of becoming rGO uses up a lot of oxygen depriving the rest of o of this oxygen. mRNA + 5G + GO ="Neural Chip". That along with Luciferase and GQD is l all connected up to the internet of things. All part of the transhumanism/depopulation age Bacteriorhodopsin: the operating system of the living matrix. When 6G is rolled out it will powered completely by our bodies. An excellent book on this is "GQD Particle-The Trans Quantum Agenda". Available on Amazon.

Some years back, after an operation, I was released from hospital with a very large box of softeners that I never took, along with a laundry list of other sundry products and prescriptions I threw in the trash. Fast forward to covid and all the reading I did regarding PEG.

In 2020 I found that box of laxatives in my bathroom. The only wording on that box and each individual powder package was Polyethylene Glycol. I imagine what would have happened if I had taken those laxatives and then followed up with a covid vaccine or 3.

July 18th 2025 Joint Statement by Secretary of Health and Human Services Robert F. Kennedy and Secretary of State Marco Rubio on Rejection of the WHO International Health Regulations Amendments. Furthermore, these revisions compel countries to adopt digital health documentation. Our Agencies have been and will continue to be clear: we will put Americans first in all our decisions and we will not tolerate international policies that infringe on Americans' speech, privacy, personal liberties. These amendments risk unwarranted interference with our national sovereignty and our right to make health policy. We are proud to have worked jointly to ensure public health policy continues to be dictated by the values and will of the American people, not unelected global bureaucrats. <https://www.hhs.gov/press-room/secretary-kennedy-rubio-reject-ihp-amendments-joint-statement.html>
