Multipoloniuss Multipoloniuss 6d Well, it's pretty obvious that the levels of corruption in our CDC and vaccine industry run incredibly deep ....and to the uninformed normie, vaccines are great, but to anybody with any real concise information whatsoever, vaccines are known and avoided as the poisonous plague upon humanity they are .

David In New Mexico David In New Mexico 6d Yes, the white Coats have proven they will do anything! Cruelty to animals was the iceberg. Cruelty to humans makes the psychos yawn. Their one question, "Where is the money".

LIKE (6) REPLY SHARE

Sean Garrisson Sean Garrisson 6d I second that.

Crixcyon Crixcyon 6d Edited ... "Second bottom line: This is obviously the way the CDC wants it."...no, that is the way big pharma wants it. They own the FDA and CDC and dictate terms, not Trump or RFK. Furthermore, you will never see the cause of any death listed on a death certificate as being from vaccines or mRNA poisons. We have no way of knowing how many of millions of people have been murdered indirectly or directly by vaccines and mRNA poisons over the last 7 decades. Why would big pharma want to hide the truth about vaccines and mRNA poisons? If these were actually healthy choices that enhanced a person's ability to overcome sicknesses, they would not need to lie about the entire use of vaccines. They lie and falsify all the time and one can only conclude that vaccines and mRNA substances are indeed life taking poisons.

Franklin O'Kanuu Unorthodoxy 6d Curious, why are we talking about VSD instead of VAERS? Also, didn't RFK just support the new Moderna covid vaccine? Didn't he and Jay B support it? There's a true ruling power in place — and the guys we like can't do anything against it: https://unorthodoxy.substack.com/p/the-ruling-class-of-the-united-states https://unorthodoxy.substack.com/p/understanding-the-ruling-class-of

Kat811 Kat811 6d In the medical field there is a big problem linking CAUSES with EFFECTS. Like when they do a drug study, they list anything that might be an effect, but they have no way of knowing what the actual cause was because there is no way to isolate all causes. A human being has numerous causes going on at any given time; you can't isolate them all to prove what is causing what. Like in 2020, anyone who got a cold or flu was now said to be sick with COVID. The dodgy "test" backed it up. The same thing is going on with the vaccine, like it or not. Anyone sick from any other cause could be said to be sick from the vax. The whole field is very murky, which makes it easy for charlatans to sell their fear, causes and "solutions". Just like in the old witch-hunting era: when the crops failed, someone pointed their finger and said, "she's a witch and ruined our crops!" and the fearful people bought it. First it was Covid, then it was the vax. It could be anything. As long as people don't understand what true health is and how to keep it, they will run from one fear narrative to the next.

Sean Garrisson Sean Garrisson 6d Wait a minute. Not every vaccine aware person blames the vaccine for everything. We are the ones that do our best to stay out of those camps. And when you can not prove your virus exists you have no say so. But when known toxic substances are directly injected in the body, do you have a case? I know what you are saying but it isnt the same thing. One does not have a case and the other actually does.

Kat811 Kat811 6d My only point is that it is difficult to completely prove CAUSE when it comes to the human body. It can be probable cause, or likely cause, but proving it is difficult. I agree that injecting poisons into your body is never a good idea, nor is ignoring all anecdotal evidence, which we are seeing a lot of. And as Jon says often, it is often not just ONE cause for various illnesses.

Sean Garrisson Sean Garrisson 6d Yeah I get what you've saying. Take SIDS. A predictable percentage of baby deaths happens within a certain amount of time, like 48 hours after vaccine shots. The parents go under criminal investigation. I know this first hand because i knew parents this happened to. And then the others that survive and make it past the 2 week mark because more die around this time or something like that, live. And of us that do survive their LABEL called SIDS we end up with all kinds of problems like asthma,ect ect that non vaccinated people dont get. No I havent heard of any data on the non vaccinated babies. But that is just it. Medical researchers do not want to do these kind of studies because it would reveal what they don't want revealed, their cons. And because of that factor alone makes them full of shit and completely untrustworthy. Not worthy of any integrity in the medical field whatsoever. Because they wont do true verifiable reseach at all. Look at how they do bogus tests for emergency vaccine approval. Jon and now others are talking about this more now. It is pure dishonesty held up as a-ok. But complete fraud.

Walden Mathews 6d Disclaimer: My comment will be a little out of place. When Kennedy says "we'll know soon and publish the real cause of [Autism|Alzheimer's]," as previously pointed out, he already knows the answer he will publish, and he also knows that if it were published as CURRENT knowledge, it would leave the big money interests legally naked. So I say that doing it this way, he thinks he can butter his bread on both sides. (1) give the people the straight answers they need to improve their lives, and (2) weave in plausible deniability for the big boys, who, after all, fronted the money to put him where he is. Thoughts?

LIKE (4) REPLY (3) SHARE

Walden Mathews 6d Clarification: Making the answers seem like new discoveries is how plausible deniability is achieved.

Sean Garrisson Sean Garrisson 6d Yeah. That seems accurate. Good catch. That is probably where i get tangled up in my view of him. But a good salesman relates well to everyone to make a sale. Is it right? Is it wrong? I dont know but he/she makes the sale.

David In New Mexico David In New Mexico 6d Maybe a third option, he could not careless about the greedy, profiteering corporations. The same corps that made tainted Factor H blood coagulant med for hemophiliacs. Instead of destroying the tainted med, as a responsible person would; the thoughtful corporation shipped the med to less developed countries that would not vet the "med".

RosaryKnight RosaryKnight 6d To be at the upper levels of the CDC, WHO & in fact any 3 letter govt. organization or NGO only happens when you're initiated into & rise up in the pyramid of power within secret societies within Freemasonry, which itself is under the power & control of the traditional enemies of God & of humanity (1 Thessalonians 2:15). They are all involved in the depopulation agenda. "Maintain Humanity Under 500,000,000 In Perpetual Balance With Nature." - Masonic Georgia Guidestones (removed a few years ago after getting too much attention online)

Sean Garrisson Sean Garrisson 6d I have seen religions exercise population control too. Could it be that there are multiple collectivist agendas happening at the same time? Unrecognized? Not fully understanding collectivism? And the honoring of any of them over the other ones does absolutely nothing to stop any of it? A competition? And an honest evaluation of all of them leading to a revolution away from them all allows for everyone to keep their personal connection to god or gods or no gods or sick gods? But the trend heads towards freedom for all as they all loose their death grips of collectivism and dedication to it instead of freedom.

Bassehound Bassehound 6d Things won't change, only tidbits of bones tossed, enough to distract the easily duped MAHA to not be demanding anything be done. Froot Loops and red dye, not much else. The 04 Dec 2025 Maralargo chow down with Susie Wiles and count Albert B should have been a good hint of what RFK Jr would do if HHS Secretary.

Billy Bob Billy Bob 6d What expect the CDC to intimidate itself? Why they are a corporate entity and now have the fifth amendment on their side, silly.

LIKE REPLY SHARE

JulieBelzeski Little Bird 6d Your argument makes sense, but you are supposing this to be the case - if there's any data there at all, which RFKJr seems to suspect there is, it will be damning. Also, the VAERS System does exist as well, and it does contain medically verified reports - it's simply public whereas the VSD is not.
