

BOMBSHELL: Study Involving 1.7 million Children Found Myocarditis & Pericarditis ONLY In PSYOP-19 mRNA "Vaccine" Recipients

⚡ MASSIVE WEEKEND FLASH SALE STARTS NOW ⚡

2ND SMARTEST GUY IN THE WORLD

MAR 20, 2026

All vaccines will kill you and your children, so it comes as little surprise that a to a 2024 research study titled, [OpenSAFELY: Effectiveness of COVID-19 vaccines in children and adolescents](#), the Modified mRNA slow kill bioweapon platform is especially deadly.

Andrew Bridgen

@ABridgen

Study involving 1.7 million children has found that Myocarditis & Pericarditis only appeared in children who had received COVID mRNA vaccines.

Not a single unvaccinated child in the group suffered from these heart-related problems.

Source: Edward Dowd

Abstract

Background Children and adolescents in England were offered BNT162b2 as part of the national COVID-19 vaccine roll out from September 2021. We assessed the safety and effectiveness of first and second dose BNT162b2 COVID-19 vaccination in children and adolescents in England.

Methods With the approval of NHS England, we conducted an observational study in the OpenSAFELY-TPP database, including a) adolescents aged 12-15 years, and b) children aged 5-11 years and comparing individuals receiving i) first vaccination with unvaccinated controls and ii) second vaccination to single-vaccinated controls. We matched vaccinated individuals with controls on age, sex, region, and other important characteristics. Outcomes were positive SARS-CoV-2 test (adolescents only); COVID-19 A&E attendance; COVID-19 hospitalisation; COVID-19 critical care admission; COVID-19 death, with non-COVID-19 death and fractures as negative control outcomes and A&E attendance, unplanned hospitalisation, pericarditis, and myocarditis as safety outcomes.

Results Amongst 820,926 previously unvaccinated adolescents, the incidence rate ratio (IRR) for positive SARS-CoV-2 test comparing vaccination with no vaccination was 0.74 (95% CI 0.72-0.75), although the 20-week risks were similar. The IRRs were 0.60 (0.37-0.97) for COVID-19 A&E attendance, 0.58 (0.38-0.89) for COVID-19 hospitalisation, 0.99 (0.93-1.06) for fractures, 0.89 (0.87-0.91) for A&E attendances and 0.88 (0.81-0.95) for unplanned hospitalisation. Amongst 441,858 adolescents who had received first vaccination IRRs comparing second dose with first dose only were 0.67 (0.65-0.69) for positive SARS-CoV-2 test, 1.00 (0.20-4.96) for COVID-19 A&E attendance, 0.60 (0.26-1.37) for COVID-19 hospitalisation, 0.94 (0.84-1.05) for fractures, 0.93 (0.89-0.98) for A&E attendance and 0.99 (0.93-1.13) for unplanned hospitalisation. Amongst 283,422 previously unvaccinated children and 132,462 children who had received a first vaccine dose, COVID-19-related outcomes were too rare to allow IRRs to be estimated precisely. A&E attendance and unplanned hospitalisation were slightly higher after first vaccination (IRRs versus no vaccination 1.05 (1.01-1.10) and 1.10 (0.95-1.26) respectively) but slightly lower after second vaccination (IRRs versus first dose 0.95 (0.86-1.05) and 0.78 (0.56-1.08) respectively). There were no COVID-19-related deaths in any group. Fewer than seven (exact number redacted) COVID-19-related critical care admissions occurred in the adolescent first dose vs unvaccinated cohort. Among both adolescents and children, myocarditis and pericarditis were documented only in the vaccinated groups, with rates of 27 and 10 cases/million after first and second doses respectively.

It is important to remember that the PSYOP-19 infection fatality rate (IFR) for children and adolescents is zero, and that these [gene altering](#) “vaccines” offer actual protection from transmission, infection or attenuate any symptoms, so depopulation injections are all risk and no reward, by design.

From the actual study...

Opensafely Effectiveness Of Covid 19 Vaccination I
1.61MB · PDF file

Download

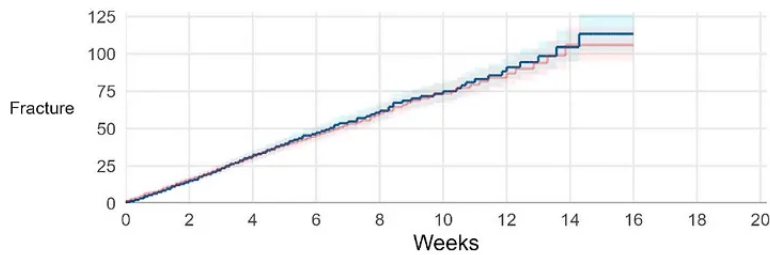

Download

...the SARS-CoV-2 outcomes of the “vaccinated” were statistically similar to the unvaccinated, except that the unvaccinated (no doses whatsoever) were actually likely to be hospitalized...

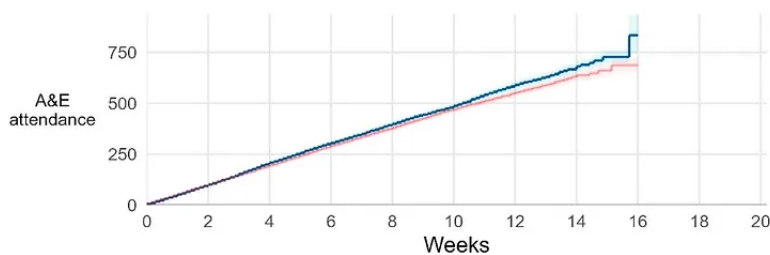

Children

(A) First Dose vs Unvaccinated

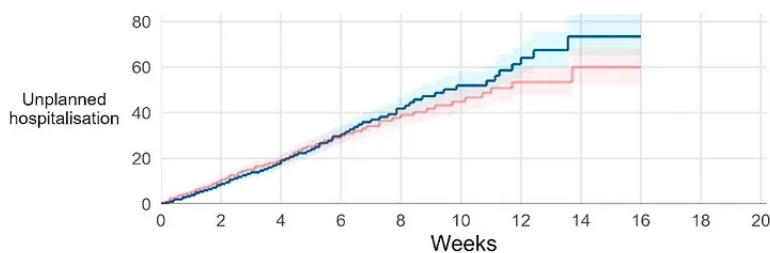

Cumulative incidence per 10,000

Cumulative incidence per 10,000

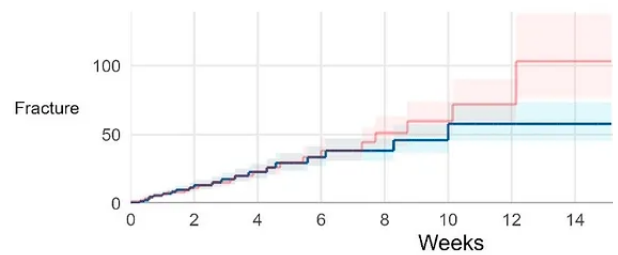

Cumulative incidence per 10,000

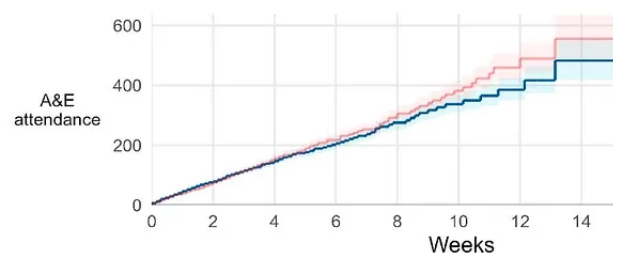

— Unvaccinated — Single dose

(B) Second Dose vs Only Single Dose

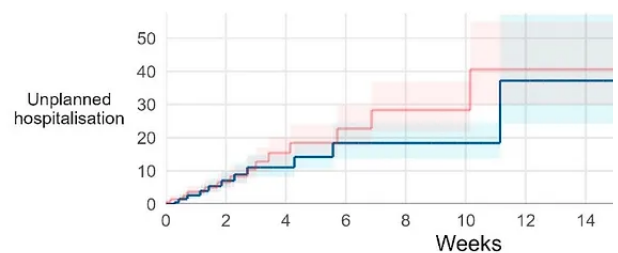

Cumulative incidence per 10,000

Cumulative incidence per 10,000

Cumulative incidence per 10,000

— Only single dose — Double dose

...and yet the devastating heart damage only ever occurred in those children and adolescents that were poisoned by these “vaccines:”

Among both adolescents and children, myocarditis and pericarditis were documented only in the vaccinated groups, with rates of 27 and 10 cases/mi after first and second doses respectively.

These are myocarditis and pericarditis cases that were accurately reported, so extrapolate that the actual numbers are significantly higher.

The study fraudulently concluded:

Protection against positive SARS-CoV-2 tests was transient.

Even according to their own data and aforementioned chart there was no real protection, transient or otherwise, nor could there ever be protection when child and adolescent IFR is ZERO.

But it gets worse, and not just for children, because according to a research study titled, [Autopsy findings in cases of fatal COVID-19 vaccine-induced myocarditis](#) get the following grim data:

 **OUR AUTOPSY STUDY FINDS 100% OF PUBLISHED MYOCARDIAL DEATHS FOLLOWING COVID-19 VACCINATION WERE CAUSED BY VACCINE**

An IMMEDIATE FDA Class I Recall is REQUIRED.

It is UNLAWFUL to recommend products that CAUSE DEATH without documented fatal risks.

And we know that there is not a single vaccine that actually does anything but

If ALL Vaccines Are Unsafe And Ineffective, The Why Are They Being Foisted on Humanity?

2ND SMARTEST GUY IN THE WORLD • FEBRUARY 2, 2025

DISEASE	RISK OF DISEASE DEATH	RISK OF VACCINE DEATH
Diphtheria	< 1/42,509,839	< 1 / 76,341
Tetanus	< 1/1,506,184	< 1 / 76,341
Pertussis	< 1/2,346,718	< 1 / 76,341
Polio	< 1 / 1 trillion	< 1 / 214,973
Measles	< 1 / 106,506,429	< 1 / 108,666
Mumps	< 1 / 40,371,594	< 1 / 108,666

There is not a single vaccine that is safe, effective, or in any way necessary; in fact, all of the vaccines are actually far worse than the diseases they fraudulently purport to protect against.

[Read full story →](#)

And not a single vaccine actually works, with even the NWO globopedo eugen nodes like the Centers for Disease Crimes (CDC) and the criminal FDA knowing well that they are peddling highly profitable depopulation injections:

It is all a giant deadly scam:

They also failed to mention one of the original kids in the trial got very very sick from the vaccine. She nearly died, became paralyzed and bedridden. Giant scam. And it was all covered up.

MAZE

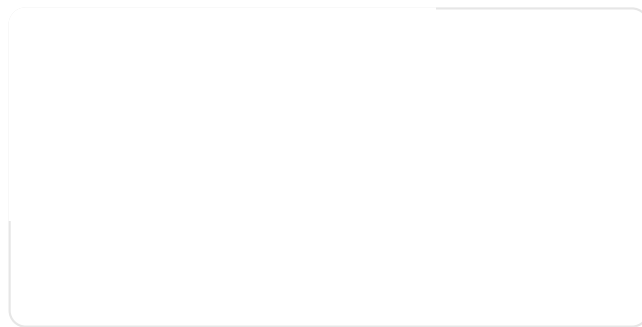

@mazemoore

March, 2021. CNN breaks the "news" that the Pfizer vaccine is 100% effective in preventing infection and sickness in 12-15 year olds. 🤔

That was 100% not true.

Sadly many parents decided to get their children vaccinated based on that lie.

Not only must all of the vaccines be immediately pulled from the market with prejudice, but mass arrests of the various BigPharma executives, MSM quislin the various Intelligence-Industrial Complex handlers along with their apparatus unconstitutional agencies like the CDC, FDA, NIH, NIAID, CIA, etc. need to be rounded up at once, and prosecuted to the full extent of the law.

Except that in America we only have color of law, and a two-tiered justice system. We expect no arrests of any of these murderous pedo technocrats or their vaccine-peddling bioterrorist assets.

Do NOT comply.

⚡ THE MASSIVE WEEKEND FLASH SALE starts now, so please use code F to receive 25% off on the newest product [Hydroxychloroquine](#), as well as ALL amazing lifesaving products that you have been purchasing for many years including the Nobel Prize winning miracle compound [Ivermectin](#), the no less miraculous [Fenbendazole](#), [Doxycycline](#), the full spectrum organic [CBD](#) oil containing 5,000 milligrams of activated cannabinoids and hemp compounds CBD, CBN & CBC powerful immune support nutraceutical and spike support formula [VIR-X](#), an sugar craving reducing, blood sugar balancing and even anti-cancer allulose sugar substitute [FLAV-X](#)! ⚡

THE MASSIVE 25% OFF LIFESAVING FLASH SALE ends Sunday, March 22 (midnight eastern time), 2026.

Upon adding products to your cart, please go to the cart icon at the top right of your browser page and click it, then choose the VIEW CART option whereby you will be redirected to a page where you can enter the code FLASH25 in the Use Coupon Code field.

Only the [RESOLVX HEALTH](https://www.resolvx.com) website offers all of the authentic products that Substack promotes.

I don't trust that study. In Australia, South Australian senator Alex Antic did a FOI request (November 2022) for 15-44-year olds. This information revealed that cardiac presentations per month were steady at 1000 per month, month on month. When the mandated vaxx rolled out there was an immediate jump in cardiac presentations to 2100 per month (an extra 35%). S.A is roughly 10% of the Australian population (approx 26 million), and the mandates v
