Just yesterday, I sat in a women's group discussing the topic of courage. This group has come together with an overall focus on gratefulness. But, each month there is a different topic of discussion. So, I shared what it was like to stand alone and not take the shot. And how many friends excluded me from their interactions. I told them I was forever changed. I didn't get into the details of the adverse events. I wish I had in hindsight, but I don't think it would've made a difference. I'm guess...

Ed, you've been a leading light and authority on this with Doc Malone since 2020. A great combo, wherein you came from a finance angle and the good Doc drawing on his extensive experience with MRNA on Bannons WR. I live in Western Australia and saw the sheep mentality at its worst and copped heavy criticism on numerous fronts for non compliance. I distinctly recall marching up Perth's main terrace and seeing people in office buildings with masks pushed to the glass watching us as the grea

Last year, I kept hearing from the DOJ that they were understaffed. They let go of a lot of people who were dirty, but they also said it was a challenge to find lawyers a) willing to work for the current administration/work toward its agenda, and b) who weren't compromised in some way that would prevent them from carrying out its agenda. They were left a big mess, lots of criminality to deal with, and I was getting the impression the DOJ, and perhaps FBI, because it also fired a large number of

Ed,

Thank you for this latest article.

To address, your last statement, "As time rolls forward and the cognitive dissonance of those who took the vaccine wears off...our numbers will continue to grow," what is needed is a very simple communication/label to identify what has happened. This is necessary to cut through all the disinformation and details that muddy the water.

What I am suggesting is a very simple set of a few words to identify what has occurred and continues to occur. This label shc

Well said. I lived in NYC at the time and couldn't believe what a ridiculous psy-op I was witnessing. One day all was normal, the next day there were little "social distancing" circles painted all over sidewalks and signs were everywhere telling people to mask up. The teachers unions and SEIU organized a "nurses cheer" at 7pm out of windows every night. What amazed me completely is how virtually everyone fell for it. I would get threatened and yelled at by people for not wearing .

Ed Dowd, you were a light in the dark. This article sums the experience up really well. I might add, we have all experienced the loss of family and friends, whose lives leave a huge hole in our life journey that NOTHING can replace, and we gasp, or choke on the reasoning given for their loss of life, or loss in the quality of life. I find these verses also sum it up perfectly:

I do not claim to be clairvoyant but I saw the ruse right off the bat, probably due to my experience as a public health nurse during 9/11. CDC had a hair-brained idea that the Russians or the Muslims were going to release small pox on us so we spent several years trying to prepare for the likelihood of a pandemic. They tried to put fear on the front burner, coerced us to try to talk people into getting the small pox vaccine and then SARS came out and promptly fizzled out. Reflecting on these ev...

We all lived through it. I saw the lies from day one. One statistician wrote an article in John Hopkins Newsletter that was yanked two days later but archives are forever. He had noted, before the vaccines were rolled out, that the numbers didn't add up. For every subsequent increase in number of deaths, there was a proportionate decrease across multiple categories of other deaths. In plain English, in exchange for government money, the hospitals were labeling everything they could get away with "Covid".

There is not enough shame and contempt on this earth for all those that participated in PsyWar operation bigger than the climate hoax. I've followed you and appreciated your efforts from the beginning.

Thank you for never quitting.

You can understand why the people who supported and enabled the crimes are silent, but I remain deeply disappointed with the majority of citizens, including my friends and family.

If citizens cared, the criminals would be held to account, but most don't, and there will be no justice.

How bad would a crime have to be today for citizens to care?

I remember the Swine Flu fiasco and I have seen the patients over the years damaged by vaccines. Nothing has changed; it doesn't matter the administration. They just rearrange the deck chairs.

At least President Ford had the insight to stop the Swine Flu vaccine before too many more deaths and injuries occurred.

Great stack, Ed. I'm amazed that no country has sued the US for this crime. Fauci created it and we funded it. That makes the USA complicit with the biggest serial killer in history.

I believe the contents in the vials of so called vaccine material is the reason behind ALL the players involved in the coverup and they are being protected. Why was congress and staffers exempted from being vaxxed? They knew it was poison. A slow kill bioweapon. All that sat on their hands and let it happen to the people, the tax payers who essentially funded it, and then hand Pfizer, Moderna and J&J billions to cook it up. All involved are complicit. There will never be anyone held accountable.

And now trump installs a new director in the cdc who believes the covid mRNA shots were "safe and effective". An administration going back on their word is never a good look. Trump will not have to worry about "election interference" when Americans simply turn turn their backs on him in 2028. Who will he blame then?

The window for real accountability is slamming shut. How so? Is it the concept of statute of limitations? I recall some headlines stating we (team humanity) only have a short window of time to hold treasonous players accountable. I don't remember if it's 5 years or 6, but the gist is that the covid era ended (in 2025?) And the timer starts. BUT I thought there is no statute of limitations on murder. Sloan Kettering published how the P53 gene was being stripped out of the injections by 06/2021. Senator Johnson is controlled oppo. He is sitting there telling us information we've known, and tried to share with him since 2021.

Pfizer's "Exposure During Pregnancy" (EDP) potocol has been in the public milieu since 04/2021 when excerpts were published on Planet Today. Every geneticist on the planet knew that genetic treatments were contagious, and that the people getting them were VERY dangerous to pregnant women. Go read the protocol. It was verified by dailycloud.io in 04/2022 during the FDA doc release. This Pfizer document has one goal: collect outcome data on exposed pregnant women. It has zero information on how to safely remove or detox the genetic trash they are exposed too. ZIP.

So now we have the dying half of our population still shedding who knows what, onto pregnant women and putting their lives, and their fetus's lives at risk. The C19 shots are contagious - because ALL genetic treatments are contagious. That's why no genetic treatment has ever been successful. That's why Moderna was going out of business until Gates rescued it.

They lied. They knew they were lying. They censored, gaslit, and destroyed lives to protect their narrative. Many institutions including public health, intelligence, media, Big Pharma were all in on it and still propagating the lies today.

There's 4 theys there. There could be 6 or 7 if you include the their. So the question still remains, who's they? Who's narrative is it? I believe I know.

I've always known it was Switzerland. It's the Central Bankers. &WEF.

I see the pandemic as an evil in the absence of Godliness. To outweigh the dominant darkness and blindness we must increase in Godliness. The churches that folded to what was clearly evil, was a test. It revealed subservience to obvious liars. It was obvious for those open to question. We know about the father of lies right? As the few with the clarity of thought, heart and mind did see through it, we see Christians who could not, and now double down refuse to listen, or see the truth. I am the truth said Jesus. Jesus saves, pick your future. If you got through unscathed, I believe Jesus is calling you to help those that are stuck. Start by being humble not conceited. Pray, follow Jesus, repent and answer the call.

Ed, the CONVID scam will not be forgotten by this generation and the appalling side effects will be felt for years to come. However we now need some high level prosecutions and people held to account. Unfortunately the whole medical profession with some notable exceptions, also require their day of reckoning. We must put in place systems that prevent this from ever happening again. I am hopeful that the future medical systems will render Big Pharma redundant and we will all be able to live healthier lives

The CORC Filovirus invites you to a scientific consultation dedicated to reviewing the latest updates on projects launched in response to the Bundibugyo virus outbreak.

Date: Friday, 17 July 2026 ⌚ Time: 13h00 to 15h00 Geneva time (CET)

Registration link: who.zoom.us/webinar/reg...

Preliminary agenda

- current epidemiological situation
- clinical characteristics of patients infected with Bundibugyo virus
- overview of research priorities – ANRS MIE & Africa CDC
- diagnostic overview and R&D update
- partners' update
- EboPep project update
- vaccines – research strategy
- next steps and conclusion.
-

The recording, presentation and detailed agenda will be available here:

Safety and efficacy of mRNA vaccines: a mechanistic and public health perspective

Summary

mRNA vaccines represent a transformative advance in vaccinology, combining rapid development timelines, scalable manufacturing, and strong immunogenicity with a favourable safety profile. Global deployment of mRNA vaccines during the COVID-19 pandemic provided an unprecedented real-world evaluation of this platform, with billions of doses administered across diverse populations. In this Review, we critically examine the safety and efficacy of mRNA vaccines from mechanistic, preclinical, clinical, and public health perspectives. We outline the biological basis of mRNA vaccines, including their transient cytoplasmic expression, lack of genomic integration, and rapid clearance, distinguishing them clearly from other gene therapies. We synthesise evidence on vaccine components, manufacturing quality controls, and regulatory standards that underpin safety, alongside data from randomised trials, post-authorisation surveillance, and active pharmacovigilance systems. We also review real-world effectiveness across age groups, pregnancy, and populations that are immunocompromised, along with the effects on transmission. Last, we address public perception and vaccine confidence, and discuss implications for next-generation mRNA vaccines, including strategies to reduce reactogenicity, improve breadth and durability of immunity, enhance global access, and support sustainable public trust. Together, the accumulated evidence affirms mRNA vaccines as a safe, effective, and adaptable platform with enduring relevance for future infectious disease prevention and public health preparedness, and for the treatment of cancer and autoimmunity.
