"Rothbard argued that asking the state to be the final arbiter of its own power is a fatal structural flaw." This principle is visible in education. Ask yourself: What are government schools likely to teach about government? What are elite ruling class schools likely to teach about government? Rinse and repeat.

Education is the only way out IMO and unfortunately it will take time. I pray we have enough

It's the bottom of the first inning for unpredictable Ai future.

Some of the wisest ones say the unspoken part.....

No one knows how it began or literally how to slow it.

Should the USA draw a conclusion to halt it.

China and India will make it an even greater effort to expand/bolster it.

Propaganda.

It's not like gossip.

It moves like the speed of sound!!

Too late the obvious, we hear and feel the sonic boom.

But can never identify the source of it.

Try to keep up or catch a glimpse is hardly feasible, and often unverifiable.

Speech Suppression -excellent, and timely topic, thank you Docs Malone.

We must never let, even our CURRENT White House, create systems, methods, that make more difficult for us to Control THEM, Controlling US!

Last week, Controlling us was the topic of a MEHA Event, in Brussels, hosted by MEP Christine Anderson.

Link - 2:40min. Title, "Digital ID Exposed", MEHA Event, March 4, 2026

https://www.youtube.com/live/LHZwxMKINvk?si=kx5_-6R3dpyQLKAH

:41mins -Reggie Littlejohn outlines the 4 Pillars in the Building of THE Control Grid - and the PRETEXTS, to soften us, in achieving each of the 4 pillars/goals. Beware of the use of Pre example, to make us safer, to create jobs, for voting purposes.

The 4 pillars:

- *digital ID -starts out as option, once infrastructure completed, PDQ, can become mandatory

- *central bank/digital currency, any currency programmable

- *artificial intelligence

- *physical infrastructure, required by AI.

:54mins - Reggie L explains - you CAN oppose a Data Center. She advises to Search - 'Where data centers being built'. After this chat, I checked my area. AND yes, in a beautiful park, the middle of suburbia area, across from lovely neighborhoods near to my home, are approximately Two, 1million sf each, AI centers, with permissions for another 5 million sf. !

(especially look at page 17, "Build America's Infrastructure" - and then, search if this is planned in your town.)

I followed the Murthy vs Missouri case closely. It seemed there was no question that people censored and were harmed by the Biden administration's censorship policies. The decision plaintiffs did not have standing seemed far fetched to me. I thought this case was then going forward when they proved they had standing through further documentation and the addition of Bobby Kennedy's suit to this question. However, I've heard nothing. Just an aside, both Brett Kavanaugh, I read, had worked in government positions where they had to push journalists to modify or delete articles they had written. Perhaps they should have recused themselves. That, I think Barrett is just another liberal white woman disguising herself as a conservative clearly doesn't like Trump.

Thank you, Drs Malone, for expanding on this issue. You are right, if this stands, we'll have problems in the future.

I realize we typically only get to choose between two candidates for president that have a win. We see what Biden did censoring social media, manipulating MSM, and worse case v January 6 protestors, outrageous. Does the 1st amendment cover "peaceful" protests of subject matter on college campuses? I realize the second there is violence or property da gone too far and must be stopped, but has Trump put limits on specific subjects. Has a li drawn where a protests subject matter goes over that line, from protest to discrimination' peacefully discriminate? Should people that say things someone find discriminating be ar charged with a crime. I'm just asking, not that I agree or like it but is it not a right to speak Not to bring up another thorny subject but when we are promised no foreign wars, no fore intervention, and only 29% of people are in with it, is it ok or wise to invade a foreign cour not going to damage the republicans chance in the mid terms? Is this just a different way different name, of taking power away from the people? I fear if this is not fixed quickly the republicans will be swept from power in the midterms and we'll be right back into the tyra pan. Is it worth it?

Adding in their views, Trump's actions are a part of returning us to founders directions with sovereign nation states as opposed to elites one world order view. Trump is ending Iran's 47 year war to exterminate us. My take is its helpful to the many views as we reflect on where we are and where we may be going.
